“Transforming Ideas Into Technology”

About Us

We are here to build something for the long-term. Anything else is a distraction.

At Workspace InfoTech

We have always put our client first.

As a result, we enable our clients to put their people first; helping them build the people-centric environments they need to grow in order to meet their business goals.

As A Result,

We enable our clients to put their people first; helping them build the people-centric environments they need to grow in order to meet their business goals.

We Believe,

Software should work for the people and not the other way around. Customers choose us for our sophisticated people management technologies delivered in the cloud.

We Execute,

Every project with persistent accountability. We listen to your goals and develop strategies based on your business. We also track our performance.

Our Mission

01

Our mission is to become a market leader by consistently exceeding our Customer's expectations.

02

Providing them with best of breed technology solutions like business management system or any kind of software.

03

We will continually communicate with, and learn from our Customers, in order to improve our products and services.

04

We will keep on top of today's and tomorrow's technology.

Our Timeline

We are here to build something for the long-term. Anything else is a distraction.

We Started The Company

Trying to connect dots

Dreaming and starting a fresh from a tea stall. Got work from some clients on creating dating portal in Germany. Chat server worked. Licensing in Bangladesh and forming a PHP and Design team.

Arranging more dots

Hired employees, setup office, delivered dating portal and photo booth software, arranged a Python and JAVA team.

Dig down to the depth

Expanding business. Making team in CMS and Database Expertise.

2014

Expanding the radius

Opening a training center in Bangladesh. Conducting workshops and trainings for universities in Bangladesh. Expand business in USA, Australia and Sweden.

2016

Cope up with the new era

Expanding Django, JAVA and Mobile team. Released an app and setup office in Australia.

2020

Trying to make it remarkable

Creating a client base in Europe with focus on Germany and Sweden Germany projects in Bangladesh. Conducting training sessions all over Bangladesh on behalf of Government of Bangladesh.

It's 2020

We are Still Growing

Launching our own new products.....

Our Working Process

STEP
01

Gather Requirements and Quick Prototyping

1. Decide the stack.
2. Analyze requirements.
3. Split story with module and create milestone.
4. Create Low/High fidelity prototypes along with iteration process.

STEP
02

Use Case and Dataflow Diagrams

Create dataflow of the project and use case scenario for future testing.

STEP
03

Setup and Track projects

1. Choose tools to develop the project.
2. Create task management systems.
3. Track the project progress.

STEP
04

Implement Design and ER Diagram

1. Design templates for the product and review.
2. Finalize the ER diagram for the product.
3. Design case model and use it for testing.
4. Plan for QA team.

STEP
05

Finalize Product Release Plan

1. Split the whole product into small features as part of the release plan.
2. QA team test the features before a release.
3. Determine Beta release date.

STEP
06

Handle Change Request and Documentation

1. Handle change request smartly.
2. Write product user guide and source code documentation.

Our services

Software Development

For the last 12 years we are developing various kinds of desktop and mobile application in different platforms such as; E-commerce, Ride sharing, ERP system, CRM, Management software and so on.

Web Development

We believe websites are the virtual ambassadors of your products. To that end, we are building 100% responsive websites by maintaining typography, color and layout for full satisfaction. Also Mobile First Approach is our priority.

UI/UX Design

User centered design is our one and only approach to make products remarkable and successful. By following iteration process we develop low/high fidelity prototypes, interactions and user flows for the products.

Quality Assurance

We believe quality can ensure products success. By maintaining picture perfect user interface testing and functionality checking, we ensure furnished product at the final delivery stages.

Digital Marketing

We are mainly creating trendy/stable graphic contents like vector images, motion videos for social media marketing especially on Facebook, Instagram and so on with boosting

Hosting Service

Our services are located at a Tier 1 facility; they are protected from and rated for tornados and earthquakes. Your site is safe with us and we ensure any problems that arise will be solved.

Our Footsteps

Our team is working hard to put our footsteps in every portion of the world with great hope and success.

We believe sky is the limit

For the last 12 years we are delivering projects in different countries and in the process we learned that language is not a barrier in this age of technology.
