What is HDRC?

Human Development Research Centre (HDRC) is a multidisciplinary research-cum-action organization, registered with Registrar of Firms. HDRC's vision is to accelerate the process of humane development through research and actions. It has a multifaceted structure with a large pool of specialists drawn from diverse disciplines. Most of our specialists have long-standing experiences in the relevant fields of human development. Operationally, the activities of HDRC can best be visualized in four blocks: Mainstream Research Studies and Technical Assistance (MRSTM), Development and Research of Indigenous People (DRIP), Human Potential Development Centre (HPDC), and HDRC Media-Advocacy-Publications (HDRC-MAP). HDRC has already made visible contributions to national policy making areas, particularly in the fields of health; population; education; gender development; land rights; infrastructure; and development of the poor, marginalized, disadvantaged and indigenous people.

Why HDRC?

“Humane development through research and action” – guided by this mission, HDRC tries to accomplish the following:

- Accelerate the learning process of human development
- Design and implement high quality research, studies and training in the field of human development
- Implement human development activities
- Pro-actively participate in policy forums
- Disseminate research, study and programmatic findings, nationally and internationally
- Contribute in all possible ways to promote exchange of best practices in the diverse field of human development.

The major domain of HDRC's interest covers policy and strategy research, operations research, survey, evaluation, assessment, technical assistance, software development, Research and Development, training, communication; and actions in the fields of population, health, reproductive health, primary health care, education, gender, human resource development, human rights, development of indigenous people, land, agriculture, rural development, micro-credit, environment, management and marketing.

How is HDRC managed?

HDRC engages high profile experts and believes in self-management. We believe in 3Cs: Concern, Commitment, and Competence. We hire those who are concerned, have commitment and are competent enough to deal with the issues of concern.

We believe that good management entails, among other things, scientific planning of all phases of our work, precise and timely reporting, appropriate management, effective administrative procedures, and drawing of high quality professionals from wherever they are located. We believe in team-spirit. We adopt and adapt our hard-earned professional experience in all sorts of research, training and other activities by applying the same skills, processes, knowledge, and experiences.

HDRC's management approach has evolved from the best experiences of its large pool of experts. Our approach is to utilize the most competent persons available, give those up-to-date resources and support systems, set clear targets for their performance, and then apply appropriate mechanisms to ensure high quality output. We appraise our performance against specified objectives, and guidance is provided in technical and managerial areas as needed. We have found that this approach yields both well-managed and cost-effective completion of tasks.

HDRC follows a well-designed financial management system. In addition to its qualified accounts staff, HDRC maintains an external audit system through a reputed chartered accountant firm.

HDRC is governed by a Board of Advisors, that meets once a year and provides policy guidance in line with HDRC's mission and changing environment. The Board of Advisors (BoA) comprises of committed and renowned persons and professionals in their respective fields. HDRC maintains gender equity in the BoA. The BoA selects one Chief Advisor (Hon.) who assumes the responsibility of heading HDRC.

Who are HDRC's experts?

HDRC has a pool of multidisciplinary experts in the areas of population, health, reproductive health, maternal and child health, gender development, education, development economics, training, human resource development, IT, management, communication, rural development, environment, marketing, systems analysis, statistics, sociology, anthropology, policy analysis, psychology, law, and research methodology. Each of the resource staff and consultants possess the kind of experience and technical skills that are necessary to produce results that can be translated into practical means for improving desired outputs. They have designed and administered research and training programs for the Government, the NGOs, and the private sector; and all of them are skilled and experienced researchers. In addition, they have all provided technical assistance to different research and training projects carried out by this organization as well as by other reputed organizations, both in Bangladesh and overseas. The combined and complementary skills of the staff and resource persons form the major strength of the organization.
