INTRODUCTION

Ambala IT is a customer oriented electronic security and customized IT solution provider with a far reaching vision of adding values to the society and industry we operate in. Most of our solutions are backed up by years of market experience and extensive RND. This results in better understanding of our customer's requirements and satisfy them by providing unique solutions specifically tailored to individual customer's need and also enables us to provide unparalleled after sale service.

WHO WE ARE

Ambala IT is one of the fastest growing customized IT Solutions Company in Bangladesh. Since its inception in 2016, *Ambala IT* system gradually approached towards its focus of emerging as a pioneer customized IT solution provider and today *Ambala IT* takes the pride to have introduced solutions like *Chequeprinterbd.com* (first ever customized Cheque Printing Solution in Bangladesh), *Ambalatender.com* (Online portal in Bangladesh). After years of Research and Development to make them compatible and well featured as per the requirements of our country.

We have gathered certified software professionals to build an expert team and also continuously develop them through proper training to make them capable of taking challenges, responsibilities and delivering work of superior quality.

Our dedicated marketing team is always focused towards building and maintaining forward looking relationships with the existing and prospective clients, which we believe contributes to the sustainability of our business.

Ambala IT Research & Development team is in continuous search for improvement of hardware & software solutions to make our client's job easy, comfortable and efficient. Our R&D team is striving each day to bring the most effective solutions within our customers' reach in terms of affordability and availability guaranteeing maximum satisfaction at the same time.

Our mission is to satisfy our customers' through identifying their unique needs and excel the standards by delivering solutions with utmost quality, professionalism and responsibility.

We envision a society where each life and belonging is secured.

OUR STRENGTHS

Combination of technical expertise and creativity at *Ambala IT* is much diversified in terms of the employee-background and departments which share their work and experience mutually. Our combined experience of over 100 years makes our work easier and more efficient. We have appointed some of the industry leaders as our Company and Technical Advisors to guide us with integrity and professional leadership.

We nurture Expert and Innovative Team Members who have the ability and courage to deal with the complex industry of Security & IT Solutions and conduct intensive RND to make the product's features more compatible for our country in terms of serviceability, functionality and affordability with uncompromising quality.

Ambala IT has a Commendable Client list. Despite being relatively new in the industry, we have been able to gain the trust of a good number of both local and multi-national companies. We have always worked with our commitment of providing quality solutions and focused on building and maintaining a healthy business relationship with all our clients.

Our products and services speak for ourselves through the quality of solutions and their after-sale service. We try to understand the potential needs of our customers and develop our products accordingly so that we can provide the right solution to the right customers. Before we sell a product, our technical analysts properly analyze our customer's needs to find the most effective solution and here we differentiate too through a- *Before Sales Service*.

Our expert team always aspires to provide you the best possible protection for your life and assets. They are devoted towards making the newest technology of security systems available at your disposal and delivering unparalleled customized IT solutions according to your needs.
