Our Partners:

Our Sister Concern **HostPair LLC** has been partnered with various web hosting related company, like cPanel, CloudLinux, CloudFlare, Softaculous etc.

cPanel

cPanel is a Linux-based web hosting control panel that provides a graphical interface and automation tools designed to simplify the process of hosting a web site. cPanel utilizes a 3 tier structure that provides capabilities for administrators, resellers, and end-user website owners to control the various aspects of website and server administration through a standard web browser.

Parnter List: http://go.cpanel.net/hostpair

CloudLinux

Cloudlinux is an operating system built with stability in mind with a technology called Lightweight Virtual Environment (LVE). LVE is simply a kernel technology that allows us to control resources for a group of processes, in our cases each cPanel account will be grouped an isolated from each other. Cloudlinux is a huge benefit to a shared hosting environment as it means no single site can slow down or bring a server offline.

Parnter List: bit.ly/cloudlinux

Cloudflare Optimized Partner

CloudFlare is a content delivery network and distributed domain name server service marketed as improving website performance and speed and providing security.
