OUR OBJECTIVES

Our core mission is to provide top-class software development and related consulting and business process management services using cutting-edge technologies, robust development tools and client-oriented approaches.

Our aim is to define a new dimension of quality in custom software development, IT related consulting, IT and business process outsourcing services.

We have succeeded to deliver all our projects in time, providing highly innovative, scalable, reliable and easy maintainable solutions to our customers.

Our major product is “Education Management Software”

Every moment we are trying to help achieving Digital Bangladesh by digitalizing the education sector. We also working in rural area to achieve this dream

OUR PRODUCTS

Biddaloy Education Management Software

“Biddaloy” is an advanced Education Management Software in Bangladesh. It is the best solution for any type of educational institutes to automate management process. It is a paperless automation solution for today’s modern educational Institution. It simplifies the interaction among Administrator, HRM, Exam control, Teacher, Students, Parents, Librarian and Transport Manager.

A dynamic website is integrated with this software with various designs. Our Education Management System is for all kinds of educational institution. For Schools it is the Best School Management System in Bangladesh, for Colleges it is the Best College Management System in Bangladesh.

Wiseman Question Management Software

"Wiseman" is a software that can generate question according to the syllabus and questions set before the exam. Can create all sorts of questions including Creative, MCQ, Bangla and English Extensions. Questions will be given by the best teachers to each chapter's standard, from which Wiseman will formulate the questions as per his choice of syllabus.

Here an operator can define the chapter as a syllabus of his choice but can not determine any question. A question will be automatically generated for any topic from 1 to 20 minutes before the exam begins. At the same time, it can be accessed in all centers through the Internet. In this case it is possible to reach every center through mobile MMS, if by accident, the Internet crashes.

Company Management Software

Rongdhonu a business management software, by definition is an application or set of programs that help businesses support, improve, and automate their processes. Such software assist in eliminating errors, completing business tasks, reporting activities and increases overall efficiency and effectiveness.

Rongdhonu is a powerful business management software and platform that combines all the features you might need to take care of your business. You can streamline your processes, store and share files, share feedback under one roof with Rongdhonu.

Rongdhonu a business management software, by definition is an application or set of programs that help businesses support, improve, and automate their processes.
