

Providing Solutions by Transforming Your Ideas

An Experienced & Robust Software Development Service Provider

Kolpolok Limited is a full-service custom web and app development company in Bangladesh. We are a team of professional website designers, developers and digital strategists. We have worked with over a hundred clients and established ourselves as one of the most trusted online solution providers for businesses.

Overview

Kolpolok Limited is a software development company where we offer extensive expertise in mobile and web application development. We developed numerous mobile apps and have much experience. In addition, we are specialists in providing end-to-end VPN and OTT application development with exceptional user experience.

We use our full potential, passion, and performance to assist our clients and businesses with our creative tools and services. We can help you turn your concepts into reality with our expert developers.

Mission

- Provide top-quality resources for our customers.
- Furnish the best services globally.
- Provide budget-friendly IT solutions.
- Become a trustworthy company that customers can rely on.

Vision

- To assist individuals and businesses with our creative goods and services by maximizing our capacity, commitment, and performance.
- To become the most authorized and desired IT solutions provider.
- Keep up with the most recent and forthcoming technologies that empower and affect everyone.

Core Values We Believe In

Professionalism- We believe that being professional is the most significant pillar behind a success story. We give our best no matter how big or small a project is.

Commitment- Team members are committed to delivering the best outcome. There is no laying back when it comes to providing top-notch services.

Evolution-We strive to evolve with the newest technologies, so we don't fall behind anyone.

Integrity- All team members must be on the same level. After all, unity ensures success.

Software Development Using Agile Methodology

A development methodology is the process by which an engineering team will build a given product. The methodologies mostly followed in the software development industry are Agile or Waterfall.

We follow the Agile methodology, as it is an iterative approach to product development that is performed in a collaborative environment by self-organizing teams.

This methodology produces high-quality software in a cost-effective and timely manner to meet stakeholders' changing needs

Our software development process is as the following:

We start any software development process through assigning a lead consultant who oversees the whole and serves as a single point for engagement communication.

And gradually assign software developers, system/hardware engineers, and other IT specialists as the requirements and needs of the client dictate.

We resolve IT issues and make recommendations regarding the IT network, IT security, software/application, hardware, data, and integration as the scope and the goals of the engagement required to achieve ultimate goals.

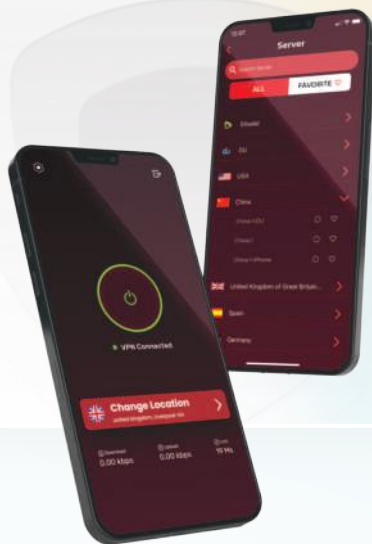

We also often utilize publicly distributed (open source) software for the solutions provided to this project, provided that it is either in the public domain or licensed for public distribution under terms that do not conflict with licensing.

Once ultimate goals are determined, then intermediate objectives and the real timeline for reaching them are established.

At the end of every engagement we measure the success of the engagement through peer review and recommendations for future direction of the organization's IT development and improvement.

We Are Working Collaboratively

Bangladesh Air Force HMS

The medical squadron is a hospital of the Bangladesh air force. We have automated the day-to-day process of the medical squadron. It includes SRS preparation, blueprinting, network infrastructure development, software development, hardware purchase, testing, and project deployment. In addition, Kolpolok Limited has developed an automated system for their hospital to minimize their problems serving the patient.

Hardware

Kolpolok Limited was responsible for supplying all the quality hardware required for the project, including servers, computers, printers, monitors, computer accessories, digital token counter etc.

Software & Network

We have deployed our HMS software with some specific customization per Bangladesh air force requirements. The impact of our software on the medical squadron is significant. We have designed the network infrastructures & supplied all.

Bidyanondo

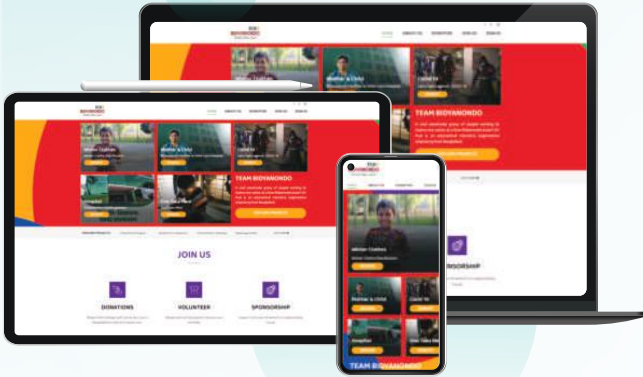

Food Vending Machine

- Hand-to-Hand Delivery
- Queue Management
- Disciplinary Case
- Time Management
- Reduce The Number of People to Distribute The Food

About Bidyanondo: A passionate group of people who wish to inspire a nation and beyond. Bidyanondo is a voluntary educational organization that originated in Bangladesh. Their mission is to foster philanthropic works globally. By designing innovative and inspiring programs, we aim to engage students and professionals to work together to educate, empower and lift the underprivileged.

Project Description:

This food vending machine project is one of the most successful projects of Bidyanondo. It is an organization that provides food twice a day to the street or needy children. The project's motto was to provide food for street children via atm booths like machines so that those underprivileged children can have a feeling of using ATMs. Bidyanondo had chosen us to develop the food vending machine from scratch, and we have developed a device like an ATM. From there, the vending machines will provide children with an RFID through which they can receive their food easily and quickly. We designed and developed this food vending machine in Bangladesh for the first time.

Bidyanondo.org

Bidyanondo is a voluntary educational organization that is originated in Bangladesh. We provide a complete solution of a donation system to Bidyanondo, one of the world's active donation organizations for humanity. They can collect donations through our system. They can show their proof of work using this website. Bidyanondo maintained its financial transaction manually before using this system. Now they are relaxed from this type of tedious work.

One Taka Meal

One taka meal is a project of Bidyanondo. We developed this system, a web portal with many tasks. Under this system we designed it based on this project. Admin can control all these projects' prices and calculate the total cost. We use the latest technology version to make our system user-friendly and protective. They also collect donations and manage the total of the whole system.

We Are Working Collaboratively

bKash Live Chat

Live chat is a more immediate and personal way to engage with customers. The goal was to assist bKash's users and visitors before exiting the website and to make consumers happy. Because bKash believed in us, we created a live chat system with their domain that will be available 24/7 for bKash.

Development

We have used PHP, Codeigniter framework and MySQL (oracle and PostgreSQL also can be used) as a database for the project. Comet technology is used for real-time chat communication. There is a large number of reporting sections to generate KPI.

Maintenance

Kolpolok Limited provided maintenance support to bKash Limited for their Webchat Software. Our utmost priority was to keep the software running 24 hours a day.

We Are Working Collaboratively

Corporate Social App

We have developed a Corporate Social App for General Pharmaceuticals Limited. This is generally a social media platform, and it is pretty much the same as Facebook. It is a social media management system app that allows the user to manage online brands and send messages to various social media services at once. Also, it involves photo-sharing, interactive content, and a file export-import option.

Development

We have used PHP, Objective C, CodeIgniter Framework and MySQL (Oracle and PostgreSQL also can be used) as a database for the project. There is a large number of reporting sections to generate KPI.

Maintenance

Kolpolok Limited is providing maintenance support to General Pharmaceuticals Limited for its social app. Providing user experience is our utmost priority in delivering quality software and getting a better service.

We Are Working Collaboratively

Teletalk CRM

Teletalk Bangladesh Limited is a mobile operator in Bangladesh which has the operation through country wide. To operate the service smoothly it has more than 67 customer care & customer care points where many employees of Teletalk itself are appointed and from other third parties. So, to keep track of all the employees, a concrete system with the supervisor section is essential.

Customer Care Management System

CMP is software as RM Management Portal which helps to get daily/ weekly/monthly sales & stock report as well as it has the system to record the employees' information and even easy way to monitor the individual performance of the agent.

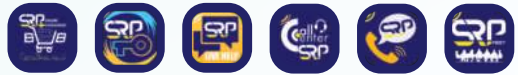

Key Features Of Flex365.tv:

- Advanced Ticketing System
- Stock report, Sales Report
- Auto Attendance System Based on Login
- Automated Agent KPI Report
- Office Management
- Document Management

We Are Working Collaboratively

SRP Turkey

SRP project is from a Turkish client who has developed six apps from us, which include SRP Access, SRP Live Help, SRP B2B, SRPiCall, SRP Call Center, and SRP Meet. App interfaces are flawless and amazingly performing. We always try to make our apps the most interactive and easily usable for our clients.

Noon VPN

Noon VPN is a fast and free VPN service for all android users. It gives 100% free unlimited VPN access with the support of high-level encryption protocols designed by Kolpolok Limited. Since then, we have created a 360 VPN solution for them, and it's been ruling the play store.

Our Prestigious Clients

We Dream Together, We Work Together to Achieve & Succeed

We're a team of highly skilled professionals with years of experience in various fields. Always available to assist our clients by offering professional expertise in achieving set targets for our customers.

Alone We Can Do So Little Together We Can Do So Much

With product inclusion, it's really looking end to end at the design and development process and saying: Who else needs to be in the room? Who else do we need to have perspective from? And I think co-creating is really integral.

TESTIMONIALS

During the ongoing project, Kolpolok proved to be a dependable partner and a hard worker with solid problem-solving and technical skills. I was always impressed by their ability to complete the work assigned to him on time. Kolpolok Limited not only met deadlines but also explained its programs in a way non-experts can easily understand. This skill came in handy when they presented their programs to me when we met soon.

Kishor Kumar Das

Founder – Bidyanondo Foundation

Kolpolok would be an asset to have in any company. To say they are a team leader would be an understatement. During their project at our company, they are gone out of their way to welcome newcomers and resolve any problems they might have. They pitch innovative ideas at company meetings and listen to what others say, including constructive criticism. When budgetary constraints limited the work our company could complete, Kolpolok used its highly creative mind to come up with alternatives.

Ajoy Kar

bKash

Extraordinary professional! It has been an honour to work with someone of their calibre. They are deliberate with their development tactics and implement with great attention to every detail. For me, one of their most important skill sets is their ability to self-manage and keep our projects moving forward, no matter my availability or the lack thereof. No worries, once you have agreed on a plan and a course of action.

Additionally, the Kolpolok team puts their heart and soul into their work. They give you everything they got when they get into a project. I am humbled to have worked with someone of such high integrity and so committed to our mutual success a genuinely great IT partner.

Md Mizanur Rahaman Khan

SMO – Bangladesh Air Force, Bashar Base

Very good vpn. I have used lots of vpn and have never been satisfied. This is an excellent vpn. I have been using this for the last six months. And the support from their team is incredible stars. I recommend this vpn for everyone.

Total Review: 28

I have been using Symlex VPN to communicate with my family members for quite some time. Recently I faced a little bit of a problem regarding my login. I contacted customer service very late at night and I was surprised by the way they quickly responded and fixed my problem. Really happy with the services so far.

Samira Telecom

4.9 Out of 5
Total Review: 69

I required to use a VPN service for my thesis paper and spent lots of time comparing VPNs. I found out Symlex VPN as one of the best. They are providing fantastic service compared to the price. I will recommend checking them out for your selves too.

Linda Sanchez

Total Review: 28

But since I came across Symlex VPN, I have been much better. My anxiety does not act up anymore whenever I use the internet. This VPN really secures my connection. Even on public Wi-Fi. It is also free and easy to use. You need to sign up, and then one clicks for the connection. It also speeds up my internet connection.

Shovon

4.9 Out of 5
Total Review: 69

My journey with Symlex VPN has been amazing so far. Since I work remotely, I use this VPN every day in public places without a worry in the world. The best thing about Symlex is how it almost never slows down my browsing speed and I'm getting all this in a very reasonable monthly subscription. Hoping to continue with this VPN in the coming days as well.
