OUR PARTNERS

Wirecard AG:

With 16 years of experience on the market, Wirecard AG offers more than 25,000 customers state-of-the-art technology, transparent real time reporting services and support in developing their international payment strategies: offline, online or mobile.

The Wirecard Group has been supporting companies in accepting electronic payments from all sales channels. A global multi-channel platform bundles international payment acceptances and methods, flanked by fraud prevention solutions. When it comes to issuing their own payment instruments in the form of cards or mobile payment solutions, Wirecard provides companies with an end-to-end infrastructure, including the requisite issuing licenses for card and account products.

As a software and IT specialist, Wirecard is also constantly expanding its portfolio with innovative payment technologies

Signzy:

Signzy offers a digital on-boarding solution for banks, NBFCs and other financial institutions. Most banking services are going digital but one key process that is still offline and hampers consumer experience is regulatory compliance. There is a pressure to dilute digital KYC however digital has higher risk. We at Signzy believe that through a combination of Artificial Intelligence and blockchain we can ensure that digital compliance is convenient but yet secure.

For more details please visit at <https://signzy.com>

RealVNC:

RealVNC® was founded in 2002 by the original developers of VNC® to promote, enhance and commercialize VNC.

With over a billion copies, VNC is a de facto standard for remote control. VNC has been used widely in hundreds of different products and applications, from helpdesks to virtualization. VNC is available on a vast variety of desktop, mobile and embedded platforms and is the most widely ported application software. It is an official part of the internet, RFC 6143.

Many millions of licenses to our shrink-wrapped commercial VNC products have been shipped to customers throughout the world, and across all sectors. Our customers range from individuals to the world's largest organizations. The customer base is rapidly expanding as more organizations realise the benefits of using commercial grade supported software.

RealVNC is the only organization offering commercial licenses to embed remote control and access capability into third-party products and services. Our OEM customers range from Intel to IBM, with applications for both software and hardware products.

RealVNC is continuing to drive innovation, creating markets such as direct on-chip remote access in partnership with Intel. Our comprehensive mobile product family offers the most sophisticated remote access functionality to and from smartphones and tablets, and our Automotive products are revolutionizing in-car connectivity.
