

CLOUDLY SHORT SUMMARY

Cloudly started in 2011 around the early days of cloud adoption by helping several global companies adopt and migrate to cloud as a partner of Amazon Web Services. Over time, we have evolved as a boutique cloud software firm and finally pivoted to a cloud-native software development company in 2019. Eight years into the cloud journey, Cloudly delivers technology services focused on cloud adoption and transformation, data engineering and science, serverless application development, application modernization, and DevOps services with one core theme: "Cloud-native Software". We leverage the innovative capabilities of the cloud to help customers build new revenue streams, increase efficiency, and deliver incredible experiences. As an Advanced Consulting Partner, our unmatched expertise with AWS means we've been there, done that, and bought the t-shirt. We focus on results as we help our customers uncover new possibilities to put them on the leading edge of innovation in their industry. Our extended software and service solutions include data backup and recovery, business continuity and disaster recovery, technology integration with a range of different platforms, scanning and security audit and compliance. Core of our company is software, web, mobile and Enterprise technologies.

Cloudly believes only in excellence and superb quality when it comes to delivering world-class software products based on latest and greatest stable hardware and software technologies. Over the course of the past ten years, we have delivered software and cloud services to over 100 clients around the globe: USA, UK, Canada, Australia, India and Bangladesh. Our expert software team has delivered over 100 projects spanning a wide range of technologies. Our leadership team has a deep understanding of the software industry and works closely with our parent company's software specialist group in Silicon Valley. We have broadly experienced software architects, system analysts, business analysts, software engineers, mobile application developers, QA specialists and project managers -- together capable of executing and delivering complex software platforms that can fulfill the requirements of the most demanding customers, whether that is government, military or private Enterprises. We also partner with world's premier CSPs, such as, Amazon, Google and CenturyLink; while we affiliate with industry's most acclaimed associations locally as well as globally: BASIS, WISUN and CSCC. Online enterprise software, esp. CRM and mobile app development are in our DNA and we firmly believe that we are well-suited for any complex government custom application.

We plan to continue advancing our technical capabilities, expanding our products and services offerings, enhancing our sales and marketing efforts to emerge as one of the most powerful ICT companies in not only the USA; but also in South East Asia.
