ABOUT US

Since 1993, Honeycom has been an established brand in the building automation sector, providing system integration and maintenance services in Bangladesh. We are specialized in providing personalized, user-friendly, innovative and integrated solutions for your business in the field of fire safety, integrated building management, electronic security, IT infrastructure and home automation.

From fire detection and suppression to IBMS, intrusion detection, access control and video surveillance, we deliver products & solutions to meet the needs of customers in a variety of applications and settings.

BUSINESS VERTICALS

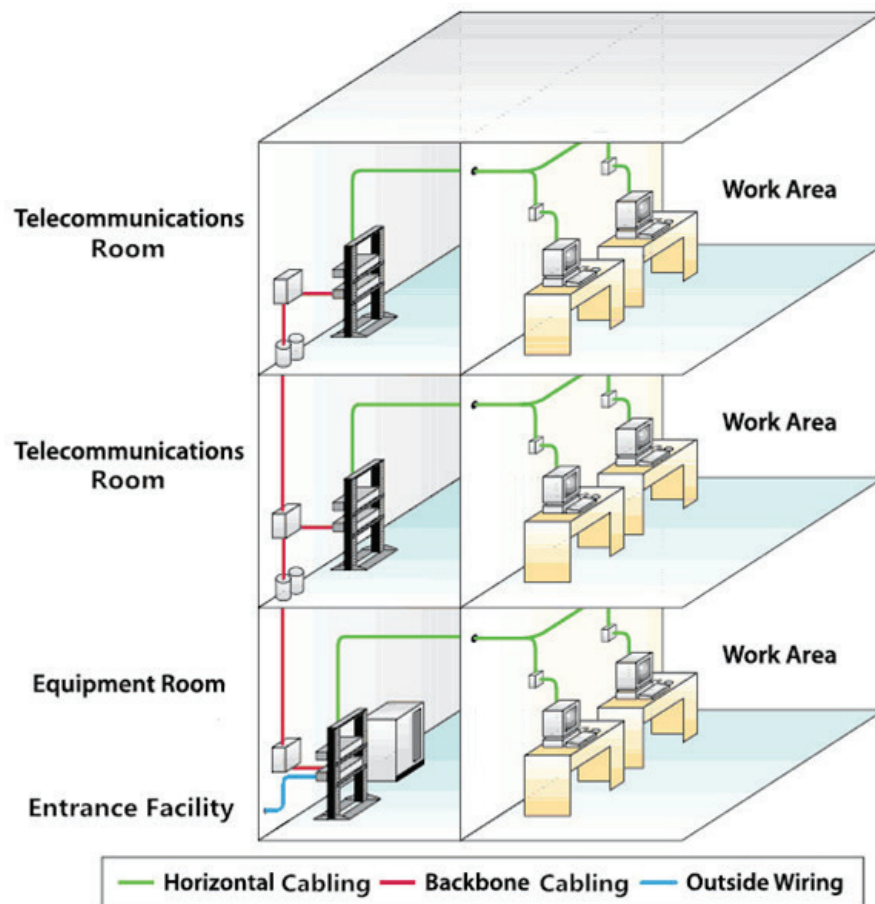

- Fire Detection System
- Fire Hydrant & Sprinkler Systems
- Gas Suppression System
- HVAC, BMS and Energy Management
- Smart Home & Building Solutions
- Video Surveillance System
- Access Control Solution
- Intrusion Alarm System
- Public Address (PA) System
- AV Intercom
- IT Infrastructure and Software Solution

SERVICES

- Technology Consulting & Design Services •
- Project Execution •
- Warranty & AMC Services •
- Professional Services •

Our highly efficient and experienced team of employees are dedicated to support our customers through delivering on-time and on-budget solutions. Backed by our maintenance and service support team, you can be assured that we would secure and protect your investment for a longer span of time.

We supply a comprehensive range of products for the emerging Bangladesh market, each of them designed and tested for local and international standards and various environmental and weather conditions.

We endeavor to meet our customers' ever-growing demand, and with the help of our business partners' extensive research & development, test facilities and experienced design teams.

FIRE DETECTION & PROTECTION SYSTEMS

Honeycom offers turnkey fire safety solutions for industrial, commercial and residential market segments. As a leading company in the market, we are technology driven at our core, with an overriding commitment to quality. We consider customer satisfaction is the primary measure of Honeycom's success.

A serious fire can have a devastating effect on an organization. Lives are placed at risk, physical property and operations can take months to rebuild. In many instances, the businesses can never fully recover.

Honeycom has been protecting lives, property and operations through comprehensive fire protection solutions, ranging from engineering design and risk analysis to certification and fire training, across the commercial, industrial, private and public sectors.

We have been working closely with leading engineering consultants, architects and major users, and additionally availing training & educational programs to gather the latest available technology and solutions in the field. We believe in rendering Total Service & Solution to customers for fire detection & protection arrangement.

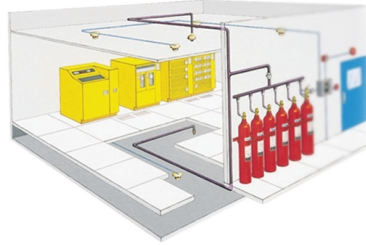

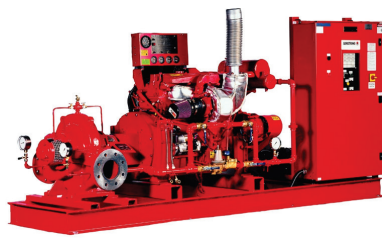

Honeycom offers customized fire safety solutions to address your specific needs, no matter what the size of your business. We are highly flexible, because we know those needs are as diverse as the businesses of every one of our client.

We carefully analyze your needs and intended purpose, before offering a solution. Our design and installation teams are also very thorough about relevant regulatory needs (i.e., BNBC, NFPA) where applicable.

WE OFFER WIDE RANGE OF SYSTEMS INCLUDING:

- Conventional and Addressable Fire Alarm Systems
- Fire Hydrant & Sprinkler Systems
- Gas Suppression System
- Foam Suppression System
- Vehicle Fire Suppression
- Kitchen Fire Suppression

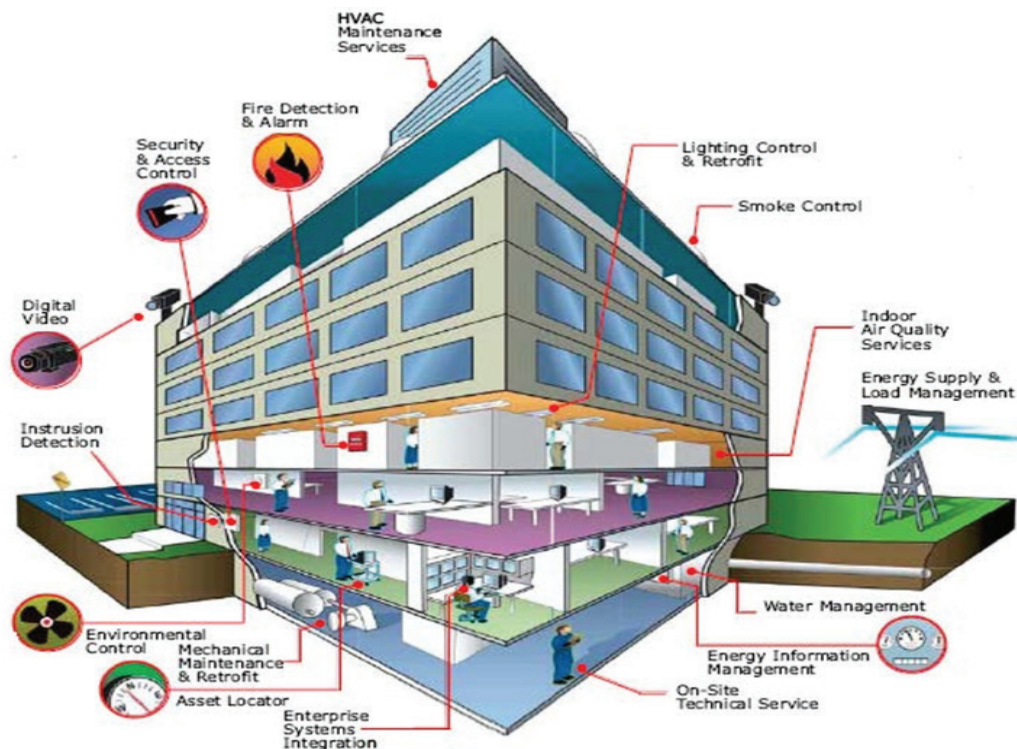

All our fire system works are fully tested, approved by the Authority Having Jurisdiction, and guaranteed with a full parts and installation warranty. Every solution is designed to comply with all relevant Standards, codes, and legislative requirements, including environment, health & safety. All our products are third party certified (e.g., UL, FM, VdS, LPCB, EN, CPR, Intertek etc.) to meet specific customer needs.

We provide performance report of your fire system, after successful installation and commissioning. This includes testing the equipment and confirming that it is compliant with required Standards and legislation. We also provide upgradation and enhancement of your existing systems, where needed.

Honeycom Servicing teams are specialists in testing, maintaining and repairing fire detection & protection systems, as part of AMC or for emergency support.

HVAC, BMS & Energy Management

We offer Honeywell Building Management System (BMS), which is one of the best and widely used brands in the world.

Advantages of having an Integrated Building Management System are:

- Modular BMS with intelligent field devices, programmable and state of the art MMI
- Utilizing industry standard open protocols (e.g., BACnet, Modbus)
- BTU meters, tenant billing apps, energy management apps
- Damper actuators & VFDs
- AHU & FCU controls
- Options of integration with other building subsystems
- Indoor air quality systems
- Water treatment, control & distribution
- Lift, lighting, generator controls and many more

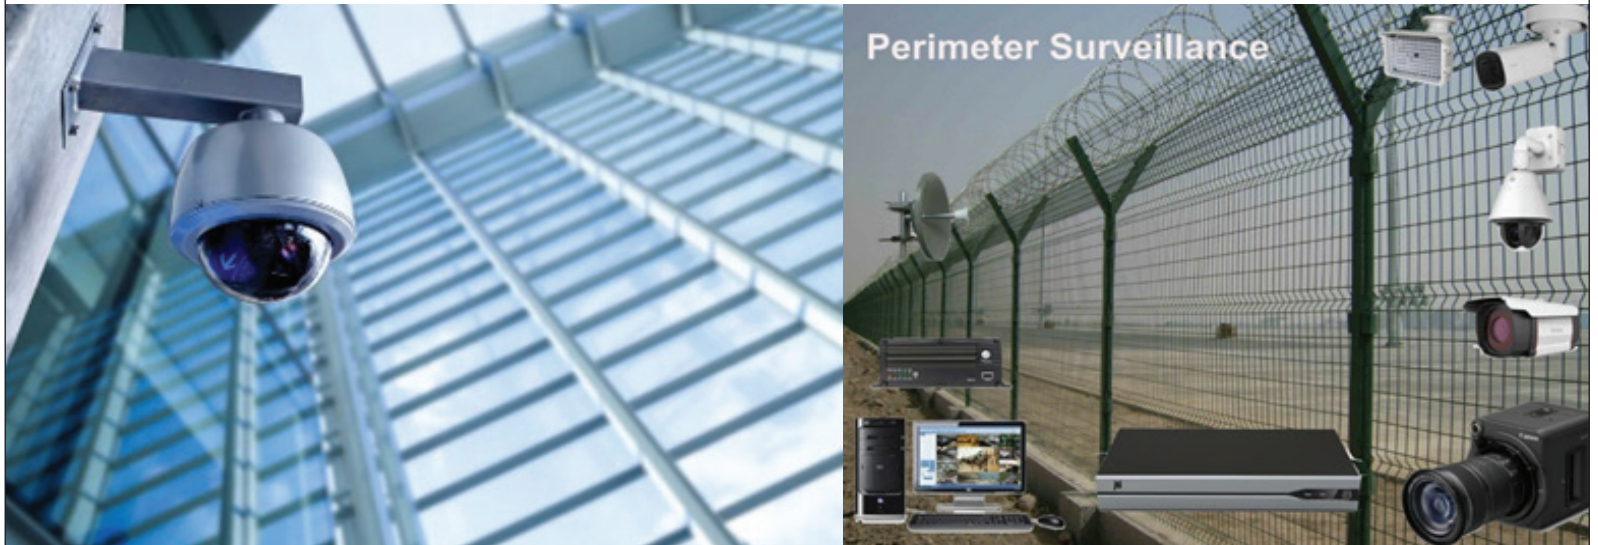

Honeywell BMS also features:

- Scheduling of weekdays and holidays
- After-hours usage tracking
- Management reports and logs
- Dynamic and interactive color graphics
- Direct digital control and custom programming routines
- Comfort monitoring by zone
- Energy-saving software including chiller plant control, demand limiting, optimal start / stop, and night setback
- Operator interface that is easy to learn and use

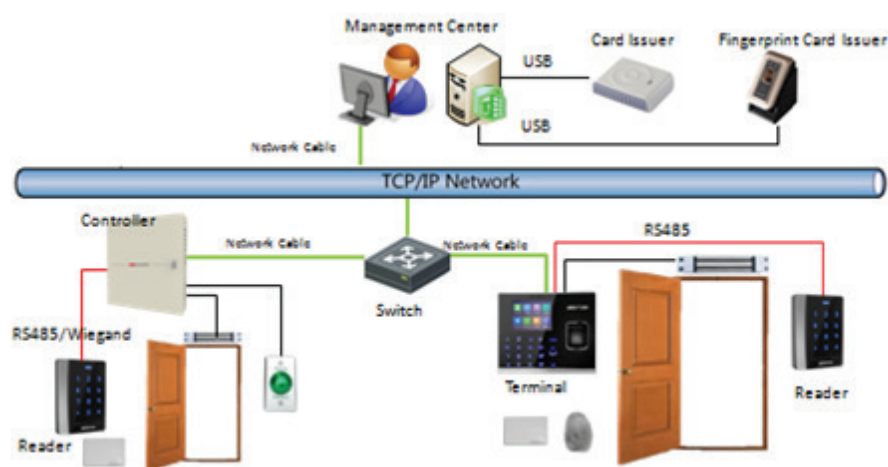

Video Surveillance

Honeycom's IP-based CCTV solution provides seamless management of digital video, audio and data across any IP network. Its open and distributed architecture offers the freedom to design a system that truly matches your needs.

When it comes to electronic security, we believe 'application dictates the equipment'. On many occasions we assess the exact needs and scale down the quantity to mitigate specific risks. Regardless of your system's complexity, the intuitive user interface ensures that security personnel can easily assess and respond effectively to events. Innovative failover and redundancy capabilities eliminate any single point of failure, making our product as the most reliable security solutions available today.

Access Control System

From simple access control applications to enterprise-wide implementations, Honeycom solutions enable businesses to better manage their security and business infrastructures.

Our products are scalable and customizable open-architecture systems, enable both remote and on-site management of data security, premises security, ID management, alarm monitoring, physical asset management and digital surveillance video.

With choices ranging from proximity and Wiegand to smart card and biometric, Honeycom offers a reader for any level of security required.

Open architecture maximizes your flexibility, enabling interoperability with industry-standard databases. We have access management solutions for the below applications.

- RFID based Vehicle Access
- Visitor Management System
- Smart Card Access System
- Time Management Solutions
- Asset Management
- Guard Tour System
- Elevator Control
- Intrusion Zones
- Event & Alarm Management

Entrance Control

Honeycom offers a complete range of automation solutions for car parking, traffic control, pedestrian access and traffic management. With wide range of products and accessories from our leading suppliers, we can provide the most up to date & cost effective solutions for your needs.

- Automatic Cantilever Gates
- Swing & Sliding Gate Automation System
- Automatic Barriers & Bollards
- Parking Management System
- Boom Barriers

Our physical security solutions are suitable for any environment; utilize proven designs, intelligent controllers with highest safety standards and the highest quality materials to provide super reliable and rugged service over the longest period.
