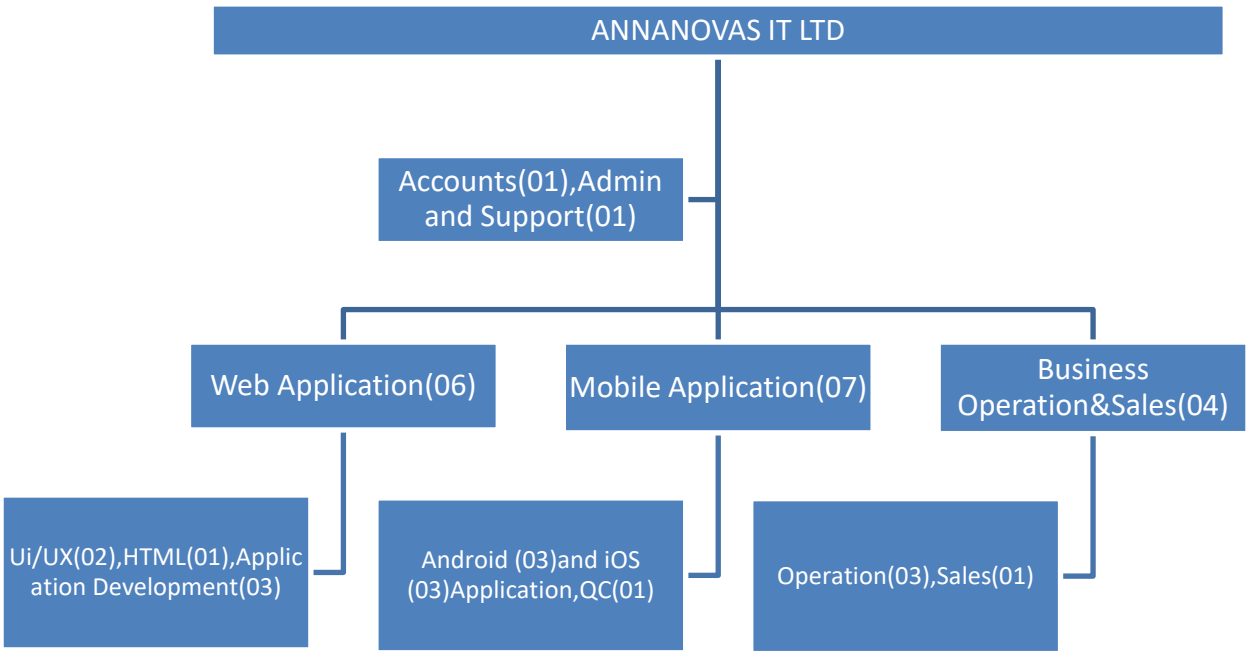
Our Organization



Support & Maintenance

On top of the custom application development services Annanovas provides, the company also strongly supports its clients by offering a wide range of software support and maintenance services to ensure that the delivered software runs smoothly and in full accordance with its clients' requirements. The full range of support and maintenance services the company provides encompass activities from bug fixing, troubleshooting, application upgrades and enhancements, training, product performance support, and more. The aforementioned services are divided into two main bouquets of services, namely IT Support services and IT maintenance services.

IT Support Services

IT support services attempt to help the clients solve specific problems that occur through the utilization of a product or a service delivered. Annanovas can offer different types of IT support services:

- Online Self-Help Support – FAQ (Frequently Asked Questions), Knowledge Base, product/service specific mailing lists, product/service support centers, chats, help database.
- Contract-Based Support Direct access to technical experts any time, e-mail and/or phone support, problem resolution support, advisory and information services.

IT Maintenance Services

IT maintenance services help the company / clients prevent problems mainly associated with software and security. Annanovas can offer different types of IT maintenance services:

- ✓ Software Maintenance – updating of application programs in order to meet changing information requirements, such as adding new functions. It also includes fixing bugs and adapting the software to new hardware devices.
- ✓ Security Maintenance – ensuring that the systems remain secure 24/7. Security maintenance service may include backups, checking permissions and ownerships in critical files and directories, checking the assignment of rights, monitoring system logs etc.
- ✓ Preventive Maintenance – performing proactive maintenance in order to prevent system problems. Its purpose is to minimize breakdowns and excessive depreciation.

Quality Assurance

Annanovas invests in the quality of the services it provides. Towards this end, the company combines technological expertise and know-how with a strong business focus so as to develop and deliver effective and efficient solutions to solve business challenges or exploit new business opportunities through the use of technology. Annanovas invests resources in order to meet its technological and business which include focus on meeting the business objectives, on controlling risks and on effectively utilizing new technologies. The Quality Assurance processes supported by the company include on the one hand Software Quality Assurance processes and on the other hand Risk Management services.
