TechknowGram Limited offers its own Enterprise Resource Planning solution called TKG ERP, which can be tailored to meet the unique needs of any business entity, including those in the Construction Industry, Education, Manufacturing, Workshops, and RMG industry. This ERP is developed and supported with the latest 4IR technology.

TechKnowGram has created Prostuti, an exam management platform for institutes to administer exams. The platform was designed with the goal of automating the exam process, which can often be tedious and repetitive. Prostuti simplifies the entire process and provides convenience for both examiners and examinees. It streamlines exam arrangements, management, and attendance, making the entire experience more efficient and user-friendly.

Bridge Management System called BMS is a versatile tool that enables Bridge health and performance tracking, evaluation of their functionality, and planning of maintenance and repair work. BMS comprises four critical components that management can utilize to effectively oversee their bridges: Bridge Basic Data Input, Bridge Inspection, Bridge Evaluation, and Bridge Remedy. Ideal solution for Government, City corporations, and any Development Authority.

QuizWin is an interactive quiz platform for knowledge enthusiasts, as its name implies. We offer a range of quiz events that users can participate in and potentially win prizes. The leaderboard provides a complete competitive experience. Ideal solution for effectively organize for any Quiz or assessment event.

<https://khoz.net>

KHOZ is a recently developed project for Beacon-based Indoor Navigation System that incorporates IoT technology to deliver precise and up-to-date location data to users navigating indoor environments. The system operates by using beacons - small, cost-effective, and battery-powered devices that emit a Bluetooth signal that mobile devices like smartphones can detect. Ideal solution for event management at supermarkets for location and promotion.
