Objective

Stargate pioneered the concept of providing smooth IT and Internet Service when clients were victim of interrupted service. We in fact have become the first company that led the people get information with latest network technology by in their fingertips in convenience and faster way by giving individuals and small businesses the ability to use Internet as a tool to make their lives more productive and their business more profitable. Stargate is continually developing a new and innovative suite of services that make it a faster, easier and smarter connectivity experience.

Mission of Stargate Communications Limited

The mission of Stargate is to provide consumers with high quality, Network Infrastructures, uninterrupted Internet Network infrastructure access that fits both their needs and their budgets. Stargate has a unique and efficient business model featuring proprietary technologies that enable it to provide members and corporate partners with a service that is designed to meet member's individual needs.

Vision of Stargate Communications Limited

Communication made easy , Stargate sees to tremendous opportunity in working in partnerships with Local Service Provider who have the access to the customers as well as with the content providers who desire to enlarge the reach of their content. Currently, many ISPs and telecommunications companies do not have a viable option to provide broadband service to their customers due to lack of physical infrastructure or a large enough market bases to justify the investment in upgrading their network. Stargate will work with qualified customer by offering its services on a wholesale and co-branded basis. We would like to extend an invitation to qualified customer, telecommunications companies and content providers to work with us to provide broadband service in Bangladesh Market.

Company Values

CLIENT FOCUS: Our clients are our partners and their interests and needs are our utmost priority. We focus on providing them with the best solutions that fulfill their exact needs.

TOTAL IT PROJECTS MANAGERMENTS

Market demand for technology systems integration for large scale construction projects has grown significantly during the past 10 years. The exponential growth has been driven by the release of new technologies and smart building solutions, which require integration to ensure operability and maximum benefit. In addition, many of the traditional systems that have operated manually for Building Management, and other similar scopes, have shifted to become technology enabled.

Stargate has responded to the increased demand for technology in construction throughout the Middle East region, and leveraged its capabilities in Systems Integration and the implementation of infrastructure solutions to offer end-to-end Information Technology Low Current (IT&LC) IP based solutions for contractors in large scale projects. Capitalizing on more than 30 years of experience in IT infrastructure solutions, hundreds of successful implementations, and its highly talented and skilled engineers, STARGATE has launched its LC Systems Integration arm, "Mega Projects Unit", and positioned itself as a regional IT/LC Systems Integrator.

Our Mega Projects Unit has structured its internal resources and knowledge-base to cater to all IT/LC scopes and has made a wide range of partnerships with elite vendors and providers of LC applications and IT infrastructure solutions such as 3M, Cisco, Avaya, HP, Novec, Nexans, Honeywell, Schneider etc. This has contributed to our ability to successfully implement LC projects. With its dynamic business model, STARGATE has been able to embrace and maintain an agile environment meeting today's growing business and technological needs.
