1.8 Business Partners

WINCOR NIXDORF

People expect faster, more convenient and personal shopping experiences. Wincor's comprehensive portfolio of POS technology, software and retail automation solutions drives efficiencies by accelerating the checkout process and improving convenience for both retailers and consumers. These solutions are employed by some of the most well-known retailers around the globe. 15 out of the TOP 25 retailers worldwide are Diebold Nixdorf customers. 24 out of the TOP 25 European retailers are Diebold Nixdorf customers

Zoho offerings focus on web-based business tools and information technology solutions, including an office tools suite, internet of things management platform, and a suite of IT management software. It is a revolutionary all-in-one suite to run an entire business. Zoho includes more than 40 applications with complementary mobile apps so that an entire business can be run on one suite. That means being able to reach customers, grow sales, balance financial books, and work in productive and collaborative ways from any device.

QlikView

QlikView is Business Intelligence (BI) tool designed to rapidly build and deploy interactive, guided analytics applications and dashboards using a flexible development environment. And with an associative engine at its core, end users get the powerful, interactive data discovery experience that sets Qlik's products apart. Qlikview is currently the fastest growing BI Tool in the world.

COMMVAULT

Commvault software is an enterprise-level data platform that contains modules to back up, restore, archive, replicate, and search data. It is built from the ground-up on a single platform and unified code base. Data is protected by installing agent software on the physical or virtual hosts, which use operating system or application native APIs to protect data in a consistent state. Production data is processed by the agent software on client computers and backed up through a data manager, the MediaAgent, to disk, tape, or cloud storage. All data management activity in the environment is tracked by a centralized server, the CommServe, and can be managed by administrators through a central user interface. End users can access protected data using web browsers and mobile devices.

EIL – Company Profile

Empowered by Innovation

EIL is a certified partner of Microsoft Corporation, the largest software company in the world by revenue. Microsoft develops, manufactures, licenses, supports and sells computer software, consumer electronics, personal computers, and related services; Microsoft Windows line of operating systems, the Microsoft Office suite, and the Internet Explorer and Edge web browsers being its best known software products. EIL is the reseller of these wide range of products in Bangladesh.

EIL is a Cloud Solution Provider (CSP) of Microsoft. Under this partnership, EIL is reselling **Office 365, Dynamics 365, Power BI** and **Azure**, four of Microsoft's most popular products. This partnership enables us to directly manage the entire Microsoft cloud customer lifecycle. We utilize dedicated in-product tools to directly provision, manage and support customer subscriptions.

EIL is a certified partner of DELL Technologies, one of the world's largest technology infrastructure companies. EIL represents DELL for servers, personal computers (PCs), laptops, data storage devices, network switches, software, computer peripherals, HDTVs, printers, etc. EIL has supplied DELL solutions mostly to RMG industries and Government organizations.
