ABOUT US

Women in digital Bangladesh is a social initiative undertaken by the entrepreneur, Achia Nila. Women in digital Bangladesh is supporting Bangladeshi women to step up and enter the IT world and flourish there.

The Women in digital team gives access to knowledge, trainings and resources to those who shows interest in developing Digital products, such as apps and e-commerce sites. They inspire and encourage women to unleash their capacity in IT industries so that they can be economically and socially sustainable. Their vision and mission is to empower accomplishments of women across the country through ICT and inspire them to achieve extraordinary socio-economic outcomes.

Lumina Digital is a female-led agency, 25 women engineer work together for the international Clients like, software, Mobile application, Games and graphic work. We mostly work for Australia and USA market.

Tech School

Empowering women with the training and job connections, they need to cash in on the digital age.

Women in E-commerce

Empowering rural women with the e-commerce market place to promote their handmade product. So they can earn immediately.

OUR MISSION

Women in Digital aims to support, develop, recognize and promote achievements of women in ICT.

WID 's mission is to empower women in Digital Platform to achieve unimagined possibilities and transformations through technology, leadership and monetary prosperity. Successfully cultivate mutually beneficial networks between industry, academia and government with a focus on women working in the technology industries across the country and the world.

OUR STRENGTH

Women in digital is a tech based social enterprise. we are working for women in tech community development.

1. Women in Digital Agency : where women engineers develop IT product for international Clients mostly in Australia and USA market. Recently we developed a water billing software for our local govt.

2. Women in Digital Tech School- This is where we actually provide computer training for girls to be ready for the job-market.

3. Women in E-commerce- With this we are completely focusing on the rural women. Here we create international market for their handicraft products through our social media and website. The entire team from craftswomen, photographers to digital coder are women.

HOW WE HAVE CHANGED A GIRL'S LIFE THROUGH TECHNOLOGY

This story is about Mithila who found a new purpose of life in Women in digital. But she was not like this a few years ago. She was a person dipped in depression and a very shy person with lack of technical knowledge. She had no career plan and no aim in her life. One morning she came in "Women in digital" with her mother and her journey of learning began. Women in Digital guided her properly and she learnt graphic designing and leadership communication from an Android mentor which was provided by Women in Digital. Despite of not being a coder she learnt very well from her mentor. For her future Women in Digital took an initiative named 9TO999 which is an e-commerce platform with an aim to create social impact. All the products created by the employees of 9TO999 will be sold in 9 to 999 taka limit. And the sales automatically get donated to burn or acid survivors. After learning these, the story of Mithila changed.

Starting from zero with the help of Women in digital, now she's a representative of Women in digital in different districts. Now she has her own identity. She's a businesswomen and obviously she's a tech woman proudly. Now she's ready to help other girls who are interested about Tech career. And this is the way we grow our community.

Mithila
