

Company Profile
of
FINGERTIPS INNOVATIONS
Ltd.

Background

Dreaming is the first step to make something happen. We were dreaming, few years back, and were trying to crawl, to make it happen, to bring our dream to reality. At this point, it was a self-esteem of a young girl, who made that go ahead. Our most active partner as she is, we trust her and believe in her and so we decided to strengthen her, standing with her.

Empowered, endured, extended. That's how the dream is now on the floor of reality. We do not just say for empowerment of women, we make it happen. With a mother's care Nishat nurtured the crafts industry, since 2007, along with designers and our footstep was moreover brought to the people's view. The girl, was cherishing this dream with the motif of making a bigger platform for the heritages of Bangladesh.

Started as to nurture the entire field work with the artisans, designers, craftsmen and their families; we decided to let the battle begin. After seeing the response to our dream, its support required to make it wide open for all, we decided to extend our efforts and support and build the pathway towards the globe with e-commerce based marketing, strongly and effectively; Suhrid came to the scenario. We wished to form the IT for Handicrafts as an affiliated registered official platform so that we can make our journey smooth.

Belonging to Bangladesh, a name born with bloodshed of the martyrs, all of us intend to start reloading to get these designer works to the markets. We wish to get our craftsmen to be highlighted, focus the lights on their face, not on us. It's they who need to have the fame. To initiate this, three dreamers wanted to walk long way together, to create a platform for not only Bangladesh, but "The World" as one stage.

Firstly, this team was working hard to make people aware of the products. Now, its the time is to bring the craftsmen to the podium. The skills, the ideas, the craftsmanship, all stitched in the needles to make the products to use. Shital-pati, nakshi-kantha, khadi, saree, ornaments, clothing, decorations, essentials, whatever you name, artisans are there to bring that to light.

Our rich and famous heritages should be brought to the daylights. The really efficient people should be recognised. Nishat and Suhrid together, started to dream big with higher ambition, with all their strength and thus **FINGERTIPS INNOVATIONS Ltd.** is formed.

What is Fingertips Innovations

FINGERTIPS INNOVATIONS Ltd. is a joint venture offshore IT Technologies provider, uniquely established to rebirth the heritages of Bangladesh with its handicrafts, music, arts, sculptures and literatures. Experienced and talented team of professionals is the core of the company to provide Technologies to any small, medium or large corporate business houses. Since the inceptions of the IT industry, Bangladesh has always emphasized the growth of software and hardware market locally and globally.

Our solution methods are simple as our goal is simpler: We want to help our valuable partners and customers grow more, by utilizing their resources to achieve their grand success.

Based in Dhaka, with offices around the world with partners we are planning to support globally.

How to achieve

'FINGERTIPS' has a massive plan to develop jointly with the people working with us. We are not alone without our partners; we feel stronger with their supports. Our partners are our artisans, designers, suppliers and valued customers indeed.

We are not like 'the others' and here it is why we are Unique

Emphasis on Executable Technologies:

Developing together we achieve our goal. We are bonding bridge between us, the artisan, the tech people, the designers, the musicians and our customers. We analyse the complex issues and provide implementable friendly Technologies, working together in close contact with the clients to meet their hi esteemed expectations, where a long-term relationship is prioritised.

Thinking beyond the box of imagination:

Our innovation and Intelligence touch every assignment, our ceaseless efforts are to add extra value for clients' further requirements. Developing our artisans will let us produce more to the global requirements and meet the needs of these days.

Skilled and Experienced Innovative Intelligence:

We have innovative, Experienced, Highly Skilled Talented consultants from different areas, working with their integrity and commitment to build a new way for others, to lead the global market.

Long History in Short

Bangladesh has a rich heritage in small and cottage crafts, hand-made articles etc. for centuries. We are proud to represent that to the globe. We are trying to brand our crafts globally and introduce the latest technology to the artisans, designers and others. We intend to introduce our people in this arena to the international market so that our craftspeople are enriched and able to manage their own market. We are trying to develop the entrepreneurs, so that they can change their life-pattern.

'FINGERTIPS' is keenly interested to enjoy its achievements with all the partners. Its success is to be shared and enjoyed by all.

'FINGERTIPS' dreams big to make this platform a global platform for crafts.

Our dreams are now turning to reality with our past efforts and efficiencies. Certainly, we are trying to keep our goals set with

- women entrepreneurship
- empowerment of women digitally

We are not ready to compromise with any obstacles in our vision of women leadership.

Reliable Professional Team with the Experience You Need

'FINGERTIPS' is not with only a few people in the team. The core team of **FOUR**, is working as an initiator or coordinator

- to manage, train, develop, plan or the entire group of craftsmen and artisans who are working in the field level
- organize with the designers, suppliers
- plan to market their products through e-commerce
- work together to represent the country to the international market
- build a platform of all the related skilled people in one place
- share ideas with entire nation
- share our vision across the globe, believing in beyond the borders
- create similar platform globally with international support

The Long and the Short

'FINGERTIPS' plans for the entire project as phase wise plan. In this first phase, we are interested to start the marketing with our very own e-commerce site, where

- the BANGLADESHI products shall be displayed for local and international market
- range of products will be regularly posted and updated
- make proper use of electronic transactions to make life easier for the partners to earn money
- develop, design and manufacture products as per customer requirements

Our Commitment to You

'FINGERTIPS' believes in **empowerment of women digitally towards innovative technologies.**

Our contribution

'FINGERTIPS' plans in a broad range with dream to achieve together. We are expanding our very old, first project **IT for Handicrafts** in our company, in 2017. As we plan for this, we are also planning for the rest as well with variety of people of our country and the legends of our country. We are interested to grow together, build the nation together. We are all responsible for building our country. Our martyrs, freedom fighters have given us a free country, our leaders plan for this country and we visualize the development of our people with our own ability and team work.

Our Projects

FINGERTIPS' plans in a broad range for the country and wants to be part of it effectively. Our overall dream is to work for “**Branding Bangladesh**”. As we need to put our footsteps in the global market with our identity of being Bangladeshi, a nation with pride.

IT for Crafts	– Phase One
IT for Women	– Phase Two
IT for Arts	– Phase Three
IT for Sports	– Phase Four
IT for Literature	– Phase Five
IT for Music	– Phase Six
IT for Travel	– Phase Seven

A glance at our Projects

IT for Crafts – *Phase One*

Background

Handicrafts, very important because it represents our culture and tradition. It promotes the heritage of a country by using of indigenous materials and it also preserves traditional knowledge and talents.

Handicraft is the expression of our history and we should always encourage artisans to continue the craft production to show the beauty of this art always.

The handicraft industry in Bangladesh is nothing new; it is in existence for centuries, heritage of thousands of years.

It was started by entrepreneurs who wanted to capture the small market with their products.

The products which are produced by handicraft industry are: Jute item, wood crafting, imitation jewellery, sand portraits, wood work, metal, glassware, metal showcase, brass and copper statue, woven clothes, etc.

Bangladesh's picture has always been synonymous with its arts and crafts. In olden days, these crafts were symbols of pride and artisans and craftsmen, were looked upon with great respect in society.

Campaign

In the current scenario to promote handicraft industry it is necessary to do some promotional works and it is IT knowledge that people should have to know about the products range in the handicraft industry.

Now promotion is very important in every business. To promote handicrafts industry, we should communicate with people provide them the knowledge of IT, handicrafts and some of its new aspects to encourage new creativity and innovation in the field of handicrafts.

With the help of handicrafts, we can change the view of people about the small business that they can also achieve success and spread their creativity worldwide.

Being indigenous arts, skills were passed down from generation to generation and for artisan, it was a matter of great pride and respect to pass down his expertise to his or her offspring.

The handicrafts industry is struggling to adapt with changing times. People today are increasingly opting for machine made goods, plus there is also a general lack of awareness about such crafts.

Most artisans come from the rural parts of the country and thus lack the skills or even the resources to sell or promote their products.

We provide them training and all kinds of e-support and they get to decide the prices of the products. We act as their mouthpiece, helping them promote their creations and provide access to a global audience, something that they would never achieve with a physical shop.

Technology can be a wonderful tool for connections and ventures such as these can revive and bring a fresh spurt of life to the flagging crafts industry.

IT for Crafts is working and promoting the handicraft industry in Bangladesh.

IT for Women – *Phase Two*

IT for Women is an initiative to let women prove their strength, knowledge, qualities and capabilities. This is not any platform to support feminism or equal right. This is a platform where the women are encouraged, empowered and enriched with their immersed qualities which will let them stand with their own abilities. We are not any placement portal, yet we shall value you and let you find your own way to recognition. It's not any revolutionary project, rather it's a project, where every woman shall be nurtured to build their confidence and values.

The women are to lead the family towards happiness. While making a home happy, they often refuse their own identity of self-requirements and live a liberal life. We wish to let them grow furthermore to make their home not only a paradise but their own life as a whole full of happiness.

People have different talents, they're always evaluated being male, female. Mostly it is seen that a girl is not having enough support or encouragement to prove their talents. We plan to cherish these flowers to flourish properly with a smile.

Living a life of women is not for looking after the family only. It needs to be evaluated and respected accordingly. The women never share their dreams at all. We wish to let them dream and make that dream fulfilled.

Empowered women, as we believe on our moral, we literally wish to work accordingly. Not as for our publicity, but to make that as visible. We wish to make dreams reality. An era of bright and sunny days ahead.

IT for Arts – *Phase Three*

Bangladesh has several famous artists and sculptures. Their creations not only surprised not only the nation, but also the people round the world. With the limitations of resources, and facilities, sometimes they had to move out of the country and prolong their stay in a foreign land.

'FINGERTIPS' wishes to change this. We wish to stand together with the artists and sculpture, to create a global market where they can sell their product anywhere in the world and live with the earnings by their own. Every Bangladesh can have benefit from online market for arts and sculpture.

IT for Sports – *Phase Four*

Bangladesh, may not be super performers in sports. Yet we have legends, since we perform. Football was the game which introduced us as a FREE nation in 1971, "Swadhin Bangla Football Team", They were playing around to build the awareness of our freedom and as a nation newly born. Do we remember them at all? Keeping these in mind, football, cricket, athletics, shooting, ASIAD, Olympics, we need to rebuild the sports arena. To respect the history, need to maintain that.

We can certainly devote our mission to work for Crafts, Arts and Sculpture, Literature, Music and Sports. Together we can stand to initiate the journey towards a better future with legends in our memoir.

IT for Literature – *Phase Five*

Literature is the reflection of life, culture and tradition, of a particular land, made universal. The literature produced by our famous Bangla writers, poets, dramatists is appreciable. We do have and had so many writers but we never spread their creativity worldwide. Whatever they achieved, it all happened by their own initiatives. We shall create a "Bangla Pathok Forum", where all Bengali people

will be able to read, discuss and speak to their beloved writers, who are our living legends. The legends, whom we have lost, certainly shall not be ignored. Rather their family members or their descendants shall be in loop to be benefitted. Respect is always adored and showing respect is always appreciated.

IT for Music – *Phase Six*

Music is the refreshment for soul. Bengali music, is well rich and prosperous with its legendary composers, performers. The legends, whom we have lost, certainly shall not be ignored. In this view to maintain our trilogy, we plan to value their life and work from beginning. The lyricist, music composers, directors, performers all should be equally respected, remembered and remunerated. Value the creation shall value us as nation. We see several artists suffer a painful life towards their old age, that makes us ashamed of whatever we achieve. We need to value to let them lie a life full of peace in mind.

IT for Travel – *Phase Seven*

IT for Travel is our project to reintroduce our heritage to people around the country and globe. We love to enjoy holidays, mostly to different locations abroad. We love to travel to historical places on other countries. In view to these, we feel that our own country is neglected, and we do not do the needful to publish our heritage or history properly.

Bangladesh, filled up with cultural, historical and natural travel points, never been highlighted at all. Not only the natural longest beach, but several other natural scenic places around our country can generate enough revenue and contribute to economy along with the local communities.

We dream and plan to rephrase our country to local people. Every region in our country has their own heritage, history, culture and people with values. The freedom fighters our living legends, scattered all around, but not recognised nor been introduced.

The heritage of our crafts, food, jewellery, literature, arts, culture are so filthy rich, that we always just ignored them, being illiterates. We wish to combine all these properly to show our pride, prejudice and dynasty.

Together we need to work, respect and make people work more at their own home, own places rather than moving to cosmopolitan cities and live in hardship of life.

This will help grow our image, our youth, our future. Reduce pressure of unemployment. Together we can go miles beyond our imagination, fly high.

In consequence, we shall guide on global travel and tourism as people always love to explore new places. Certainly, in a comfortable and reasonable accommodation for family time, we shall arrange your holidays ahead. Let us plan, you just enjoy!

Our Services – IT for Crafts – Phase one

Development of our own e-commerce site

Develop solution for the artisans

Enrich our artisans with latest technology, trends in design and market

Custom Software Development

Dream High – Think positive

‘FINGERTIPS’ has its dream with vision and mission to accomplish. It is we who will have to put our efforts to fulfil our dream. Certainly, together with all, nothing is impossible that we dreamed. Bringing the dream to reality is our mission, passion and aggression. To achieve this, we are putting them in phases-not to miss anything nor to disappoint anyone. We shall make this happen and will set an example to get others involved with us to join their hands together.

Works in progress

‘FINGERTIPS’ have extensive experiences in diverse areas of both software development and hardware management along with systems integration. Our experienced staff have worked with a wide variety of tools and languages under an array of platforms in regard to various projects.

‘FINGERTIPS’ is presently working on different areas to achieve their goal in time accordingly. We do

- Software Development
- Web Page Development
- E-commerce site Design, Development and maintain
- Hardware and networking solution
- Customized and tailored System Integration
- Support and maintain pre-installed and on-going systems

'FINGERTIPS' is not the company who only develops programs or codes, we develop professional software. This is the reason, we have managed to establish a firm foothold within our client markets.

Being a "custom" oriented firm, 'FINGERTIPS' is able to provide the clients with a variety of services which include:

- System Architecture and Design
- Development
- Project Management
- IT Support and Network Administration
- Complete Turnkey Systems
- Testing and Quality Assurance
- Feasibility Studies
- Technical Documentation and Training Services, and
- Placement and Recruiting Services

We provide services on both fixed and flexible cost basis based on client's requirement.

Partnerships... Our goal is to establish a firm and lasting partnership with our client base. As a part of this goal we do strive to ensure client satisfaction. It is upon this foundation that our clients feel comfortable to come back for future development needs.

Experience... Our approach is based on two aspects: experience and dedications. Our professionals have years of experience in design, development, and testing countless software projects. It is this experience, along with our dedication that gives the clients the best quality service, which sets us apart from other firms.

A Proven Track Record... 'FINGERTIPS' Professionals have a proven track record in providing high quality, custom designed software and project management services.

Can we help you?... Certainly, we can. Why don't you to share your requirements with us? Our expert team will promptly come out with the right solution and will help you in achieving your goal.

'FINGERTIPS' believes in working together to achieve success. We provide support and services to all required fields and activities. We feel comfortable, by making our customers happy.

Areas of Expertise... 'FINGERTIPS' consultants have experience in different fields of the IT industry. Because we are a custom firm, there are no limits on what projects we can undertake. It is this ability that has enabled us to accumulate a vast amount of experiences in many diverse areas, including the following areas:

- Application Design, Development, and Testing (GUI, Database, etc.)
- Web Development (Internet/Intranet)
- Web-Enabling Applications
- Engineering, Scientific, and Data Collection
- Semiconductor EDA Applications
- Point-of-Sale and General Business Services Applications
- System Architecture and Implementation
- Client/Server Applications and Distributed Systems
- Systems Integration
- Platform Migrations and Code Porting
- Object-Oriented Design and Analysis
- Project Management Consulting
- Technical Documentation and Training

Windows Experience... ‘FINGERTIPS’ developers have been working with different versions of Window based applications since the beginning. We have implemented many applications, utilizing all aspects of the MS Windows environment (such as ODBC, DDE, OLE, DLLs, drivers and threading), and has gained experiences with most of the major integrated development environments (IDEs, such as Visual and Borland). Ported applications, interfaced with external hardware (scanners, data collection devices, etc.), and implemented distributed network solutions.

‘FINGERTIPS’ Professionals have also years of experience in GUI design, both for the Windows operating system and others. Our consultants work very closely with our clients to design the best GUI possible for their specific application. We proudly mention that we have the right experience to help the clients in choosing the right tools for their development project.

Web Experience... Although Windows and Web development share many common traits (GUI design, backend database interface, etc.), there are also many significant differences in the underlying application architectures that one must fully understand to create a successful Web-based application. Over the years, we have gained this type of experience through our projects running under both the Windows and Unix environments. We have Web-enabled existing applications, developed numerous Web-based systems, utilized various backend databases, and setup/administered: Web servers, email servers, FTP sites, and firewalls. The Web development market is a fast-paced environment where technology is always changing. We stay abreast of the latest changes in tools and languages including XML, Java, and others.

As a custom software development firm, we have amassed an impressive resume of Software Development projects. It’s the custom nature of our development projects that has enabled us to acquire vast experience in many diverse areas of the software design. Our experience, in conjunction with our high-quality personnel, enables us to be dynamic enough to tackle almost any complex project. No matter what your development challenge, our consultants can be a valuable resource.

Available Services:

‘FINGERTIPS’ provides its clients with a wide range of services spanning the entire development process. Clients can utilize our expert professionals for the entire development

cycle or a part of it where they require some additional support and consultation. Our flexible services are available on an hourly or project basis.

Here, we draw upon our vast experience to provide our customers with the best possible services. As a custom software development firm, there are no limits on what projects we can undertake. However, most software development efforts require the same basic types of services. Some of the common services available from **'FINGERTIPS'** include:

System Architecture and Design... Design is often the most critical phase for any software development effort. In many cases, the quality of the finished software is directly proportional to the quality of the initial design. One metaphor is particularly appropriate... Ask yourself this question: What quality of house would you get if you build it with no blueprints? Custom software development is an investment. As with any substantial investment, planning is crucial. However, there is a trade-off. It is possible to over-design. This leads to loss of time and money. We have the experience to strike the proper balance.

Development and Project Management ... The key to quality development is expert people with well thought-out plan. A good organization allows developers to modulate the development process. This results in rapid implementation of a system that can be easily tested and expanded for future versions. We provide a highly qualified technical staff with years of software development experience.

Our clients often require additional consulting and managerial support to supplement their in-house development efforts. We always uniquely qualify to provide this vital support. The professionals here, with us, have worked on countless software development efforts, and as a result they are well equipped to quickly anticipate and address problem areas on a given project. We can serve as trouble-shooters or, as a part of the management team to trouble-shoot the entire project.

IT Support and Network Administration... we have IT network professionals who are familiar with all types of heterogeneous networks. Clients have utilized our services to design, install, and manage their network systems. Some clients have even outsourced the IT support for their entire office to 'FINGERTIPS'.

Complete Turnkey Systems... Integrating hardware and software to form a new automated system is a classic utilization of our resources. We can provide integrated systems to help our clients in building their hardware needs.

Testing and Quality Assurance... With our experience in the software development field, we can provide an extremely valuable third-party perspective, when brought in to test/QA another vendor's software. System testing is fundamental to the quality of any software. Although many developers take short-cuts and settle for only testing their software during development (Alpha-Testing), we always encourage our clients to include a distinct testing phase to any software project. This testing phase allows the system to be tested as a complete

unit, and is usually carried out by someone other than the developer. In this manner, additional user feedback on the functionality and usability of the software can be integrated prior to its initial release. Completion of the testing phase is accomplished through preliminary use by actual end users of the software in the real-world conditions within the client's site (Beta-Testing).

Feasibility Studies... Prior to committing substantial resources to a given project, often clients want to obtain more data on a 'prototype' version of the main project. Our team members have experience in serving this type protocol and efficiently identifying the primary and secondary "hot spots". This, forms the basis of providing a Feasibility Report for the client. This report contains a ranked list of all the technical, logistical, and managerial problems associated with the proposed project. In addition, it provides preliminary estimates for cost and time.

Technical Documentation and Training Services... Our consultants have developed numerous user manuals, reference guides, and introductory training materials to accompany our custom software over the years. This experience has provided us with the ability to quickly generate production quality documents. Rather than hiring technical writers (who are often unfamiliar with the underlying technology) to extract information from developers, many of our clients simply have developed the supporting materials. Many clients have engaged us for the sole purpose of creating technical documentation and providing complete training programs.

Placement and Recruiting Services... Finding just the right person for a challenging technical staff position can be quite difficult. Standard placement services often provide overwhelming lists of "candidates," however many of the resumes provided to the client firms are seldom worth reviewing. This is because the placement firms are not technical people and therefore cannot properly filter the resumes for the hiring managers. 'FINGERTIPS' Technologies team solves this problem for managers by taking a low volume, high quality approach. With our technical background, we can serve as a front-end filter for managers who don't want to spend their time reviewing every resume with "C" listed as a language.

Clients' Reference's:

We value our client's feedback. We are always willing to listen to their valuable comments so that we can progress and we can reorganise while learning from our mistakes.

For more details about our clients' comments, please contact us by email and we will be more than happy to provide the details.

Brainware - The Team

Nishat Mushfiqua

Youngest and First female editor, from Bangladesh, an online daily news portal in Bengali "Sonali Sokal" and leading fashion and sensational monthly magazine "Lifestyle" does not introduce her talents only but endures her vision and innovation towards development of people is one of the few of her ideas shared with. The humble mission of adoring the hard-working artisans, develop for their steady and progressive future is also one of her key dream to make real in LifeStyle Technologies.

Being a software designer and animated film maker, gives us the pride to have her ideas and devotion with us. A person very soft by heart in real life, but stubborn to stand against any injustice for anyone in need is her strong dignified characteristic. She never hesitated to fight for the right. Dedication of herself in development of excellence in people is her nature. Children always gets her special attention and care which leads her guide them unconditional to build their great future as a forever friend.

Completed her MBA, with major in Marketing, Nishat knows how and where to represent what and to whom. Being a smiling personality, she never misses any opportunity to make her country a pride.

Working devotedly for the last few years, since completion of her MBA, she had been spending most of her time in the rural areas with the people to build their future, depriving her own health or luxury in life. Reckless stamina, made her fight, all by herself against all obstacles in this journey.

Honesty, with unconditional values of humanities, Nishat, is setting example to the entire society to encourage other women. Never stopped her journey, while she was severely being discouraged by other urban designers, who always tried to diversify her focus and vision from local crafts to imported one, Nishat proved, she cannot be a selfish. Spending the busy days with the crafts designs and training, spontaneously she had sleepless nights with the kids of artisans, helping them with their studies, once again shows her motherly nature.

Having a long journey by the roads in humid weather, she spent her time again in organising the events of metropolitan glamour fashion parade, but with local products, encouraged the industry.

Taufiqul Karim Suhrid

Technology Marketer, System Analyst, Software Designer, Network Planner and Support Engineer, Project Manager, Suhrid is the second generation in the ICT industry from Bangladesh. Started his career, in pioneer software company of Bangladesh, IBCS-PRIMAX, he introduced Microsoft products in Bangladesh since 1995. With a proposal of SMART ID for every citizen of Bangladesh, in 1995, he presented his vision with Abu Ahmed, who helped him to take it to the right pathway.

Introduced Sun Microsystems Inc., competing with solution giant like IBM, DIGITAL, COMPAQ and HP, made a strong footstep by achieving his installation permission in AERE, SRDI, and telecom operator GP, AkTel, Sheba, he can be identified as the First Sun Support Service Engineer of the country to support installations in Bangladesh, Nepal and Myanmar.

Initiated the journey of national software service industry platform, dream of his father, he contributed his efforts and supports for the birth of BASIS, keeping himself behind the scene always.

Serving other local software companies like, CNS Limited, TechnoVista Limited, he moved to Ericsson AB, as Project Manager for Telecom giant Grameen Phone. Installed several MSCs and BSCs, he was involved with the southern belt microwave connectivity and GPRS solution along with the upcoming 3G at then.

Following the days with Ericsson, he was contributing with Orascom Telecom in view to acquisition of Sheba Telecom. Joined the journey with Orascom in 2005, he played a vital role on rebranding of Banglalink. Planned, initiated, monitored and supported the technical team along with marketing, sales, customer care, admin and HR, as the cross functional activity manager, he was involved as the first only Bangladeshi Management Member in the board. His Environment, Health and Safety Policy has been accepted by IMF and World Bank and been implemented globally in telecom sector.

Leaving country apart in 2011, he still never hesitates to contribute his efforts with Nishat, since her dream project of IT for Crafts. Understanding the requirement of strong presence of official endorsement, Suhrid, initiated to establish IT for Crafts to transform it as the 'FINGERTIPS', to make the project stronger, to make it a real success.

Believing in 'togetherness, any success can be achieved', and 'supports to empower the women, who can dream with a vision', Suhrid is always ready to take any bold step. Never forgets his roots in Bangladesh, and endeavours to take any initiative to represent his country to make the country proud.
