

Company Profile

e-World Ltd. is an ICT Solution Provider Company from Bangladesh managed by a group of professionals engaged in Mobile value-added services (mVAS), Software Development, Web Solutions and Software Outsourcing services.

e-World Ltd. delivers industry-standard quality software outsourcing service and ensures free prototype development (for new outsourcing clients) along with management consulting service (from domain expert) with every software development and also guarantee 24/7 after sales service support and a dedicated project management team in a very reasonable cost.

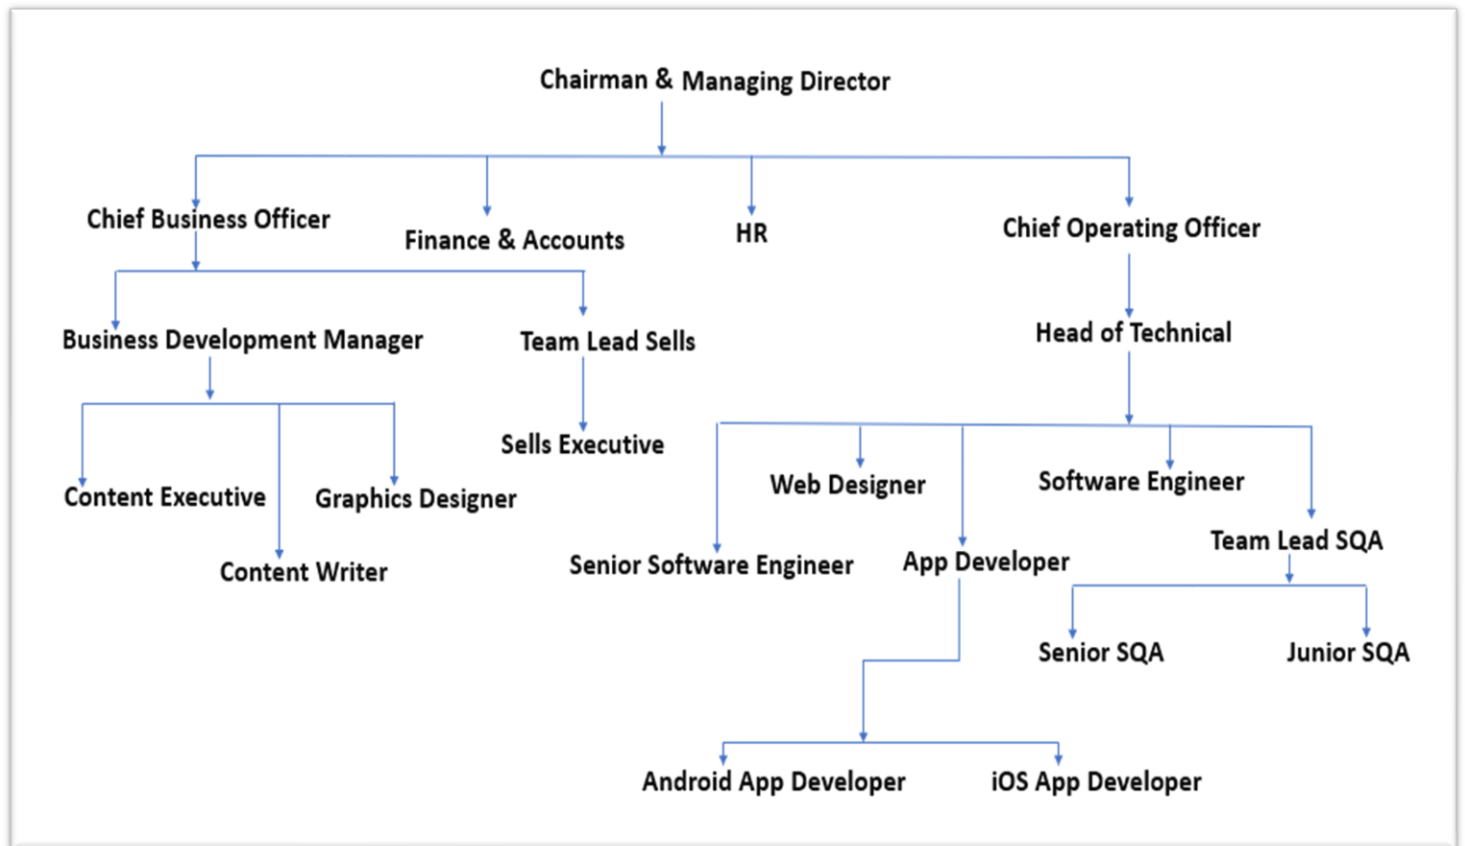

The e-Services produced by the development team of e-World Ltd is fortified through meticulous testing performed by their rich SQA team. The team, responsible for training, have vast experiences to transfer knowledge perfectly to the designated people.

The company has experience in providing professional training management and support service through multiple channels. Training management starts from online registration to printing of attendance of the trainee.

Our Software Development Service provides different kinds of software including Hisabkhata Accounting management, school management, inventory management, point of sales. We do strategy, design, and development for Software & Mobile Apps. We work for startups and enterprises alike. We also know a thing or two about branding, websites, and Result-oriented campaign development. Drive true business value through our engineering-based solution model, that provides innovative and cost-effective software development solutions to complicated problems.

Digital Lifestyle, Business Automation, or any type of interactive Marketing Solution, e-World Ltd. aims to be the global leader in all those fields. Every day we want to exceed our customers' expectation. By bringing together world Class Designers, Computer Scientists, Digital Marketers and published Software Engineers under one roof, we are able to build and deliver high-performing services to clients.
