ABOUT CENTUREON IT

Centureon IT was established back in 2017 to bring **Tomorrow's Solution Today**. Bangladesh being a niche and developing market for IT sector, Centureon IT dedicates its resources to developing solutions needed for the market of Bangladesh. We have crossed the boundary of Bangladesh immediately after our inception. At present Centureon is a regional organization working in the markets of USA, Brazil, France, Jordan, China, India, Sri Lanka and Australia.

Centureon IT is founded by Squadron Leader Shaikh Firdous Mahmood (retired), and co-owned by Saddam Hossain, currently there are 20 full time resources, data scientists, subject matter experts (SME) of different sectors, a strong advisor and mentor panel.

Some of the areas where Centureon IT excels in are Industry IT Solutions, Data Science, Blockchain, Cloud Services, Cyber Security and Intel Solutions (Intelligence for Military Forces).

MD'S MESSAGE

"CENTUREON IS ALL ABOUT WINNING, WIN WITH US"

Today is an era when computing processing power is doubled every 18 months. With the immense computing abilities as of today, and its growth at unprecedented rate, human efforts have been smoothened and bolstered in all fields around us. When I started Centureon IT, my idea was to find out areas where a digitization can make businesses and our actions better and faster. After 3 years of inception, I can proudly say, we are walking towards the goal.

With the team in hand, things have been easier of course, yet challenging. Few of our products are there in the market developed by Tech Giant countries like USA, China, Russia, Israel and India. What makes our products different is scalability and perpetuity, which helps our customers in long term planning, rather than bearing annual subscription charges.

We have a few set of products, which are new in terms of application. Such products will be a necessity in say, 18 months. And this challenges us to convince customers. Luckily though, we have break throughs, and built an international demand for those type of products.

Besides technicalities of Centureon IT, our main focus is on how a customer thinks. Our customer base has initiated from individual needs and excelled towards Top Government Intelligence, with full user satisfaction. We focus on easy interfaces, at low cost, so that our customers do not feel they are using something new, and yet benefitted from unparalleled results at affordable burden on wallet. None of our customers feel the necessity to think about IT challenges for their needs, we handle it for them before they even feel the need for it.

Centureon IT is growing. As of today, we are working on few free source commercial solutions as well, which will be able to address a few ongoing and probable global challenges. We are hopeful of bringing tomorrow's solution, today.

I wish our valued customers a higher business portfolio. Centureon is all about winning. Let us win together.

Thank you
Founder and Managing Director
Centureon IT
