Company Overview

With offices in New York, London and Dhaka, naztech Inc Ltd. Inc., is a dynamic technology consulting firm that builds advanced solutions for the industries across the various vertices. The executive team has over 75 years of combined business, in-depth technical and management experience with each member an expert in their respective industries and having had roles in leading global top tier organizations.

We have a stellar track record of successful project delivery in highly complex and demanding environments. Our agile, iterative methodology combined with informative management reporting allows us to deliver fast and frequently, giving our clients total control and visibility throughout the project lifecycle.

Our clients range from some of the world's largest investment banks, prestigious retail & manufacturing firms, leading e-commerce sites to start-up companies.

Accelerance, the leading consulting firm for software outsourcing strategies and best practices, has surveyed 8000 software companies worldwide and selected best 3% companies among them. naztech Inc. Ltd. is one of the five selected software companies who have been selected out of 226 software companies all over Bangladesh.

We have expertise in the full end to end project lifecycle and entire top to bottom technology stack.

Our desire for creativity & innovation coupled together with our in-depth understanding of core technology gives us the flexibility to choose the most appropriate tool/language for the jobs. All of our engineers including most of the executive board have a degree in computer science.

To be the very best at what we do we invest heavily in R&D of the latest tools and technology.

We have expertise in the full end to end project lifecycle and entire top to bottom technology stack, including:

Software:

- Full-featured Advanced Graphical User Interfaces (GUI) using Microsoft .NET, WPF, Java and JavaScript.
- Dynamic Rich Internet Applications (RIA) using Web 2.0 technologies such as JavaScript, CSS, AJAX and Reverse AJAX.
- Native & Web based Mobile Application Development for Windows7, iOS, Android & Blackberry
- Complex, robust yet high-performance, low latency server side application using leading-edge technologies such as CEP engines, data/compute grids, and high-speed messaging bus.
- Large-scale databases for high-volume transactional processing as well as complex business intelligence and reporting applications.

Hardware:

- Multi-site Cloud Enabled/Virtualized green datacenters including active DR Sites
- Private Public/Cloud development, deployment, monitoring & management

- Virtualized Networks & MAN/WAN Optimization
- Virtualized & Ultra Cost Efficient Storage Servers
- Resource Efficient Virtualized Servers& Virtual Desktop Environment
- High End Super-Servers

Training and Skill Management on:

- *Basic computer programming*
- *Machine language*
- *Big Data*
- *IOT*
- *Block Chain*
- *Server configuration and installation*
- *Networking*
- *Cloud Management*
- *Virtualization*
- *Mobile apps development*
- *Website development*
- *Digital Marketing*

Significant facilities and Teams, who enriched the organizations profile:

- Highly skilled international standard Programmers Team
- Internationally experienced skilled Business Analysts
- Internationally experienced skilled System Analysts
- Internationally experienced skilled QAs
- R&D unit
- Technical Support Unit
- Full-fledged training development unit
- Network Support Unit
- Developers Unit
- Department wise skilled trainer
- Facilities to work with real time market experience

About Us

With offices in New York, London, Nepal and Dhaka, naztech Inc. Ltd., is a dynamic technology consulting firm that builds advanced solutions for the industries across the various vertices. The executive team has over 75 years of combined business, in-depth technical and management experience with each member an expert in their respective industries and having had roles in leading global top tier organizations.

Delivery Focused

Everything we do is driven by the needs of our clients. We add value by blending our technical expertise, strategic thinking & creativity

Innovation

We strive continually to be the very best at what we do and continually invest in our people and processes to drive innovation at all levels.

Uncompromising Standards

We assure you of the highest ethical standards of integrity, transparency and corporate governance.

Leadership

Naz Ahmed, the founder and Chief Executive Officer of the company has been involved in the banking and financial services sectors in the U.S. and Europe for over a decade and brings a wealth of knowledge that puts us in an advantageous position over other local competitors who have not had the exposure to those markets and therefore are unfamiliar with the sophisticated business logic that is required to produce financial IT tools that are on par with the global standard. Prior to leaving New York to fulfill his desire to build a world-class IT company in Bangladesh, he held several senior positions including playing the role of Head of IT/CTO at several Wall Street banks, Consultants in Bank of America, Consultants in USB. Mr. Ahmed holds a 1st Class bachelor's degree from the University of London in Computer Science and Business.

Faroque Ahmed is one of naztech partners since its inception. Faroque has a co-founded AGP and he is responsible for overseeing the whole practice, though he is predominately based in the Chiswick office.

He gained all his experiences from working for small firms to top 10 international firm, where he was a manager for blue chip multi- national companies. He has experience in Hotels, Construction industries, Car dealerships, Travel companies, Yatch companies, Mobiles homes and small individuals. He specializes in providing audit, accounting and business advice. His clients include FCA regulated clients, pension schemes, charities and not-for-profit organizations and a mixed portfolio of owner managed businesses including contractors.

As the designated audit partner, he oversees the firm's audit clients, which means he get to be involved with many of the larger sized businesses.

As a client manager to many of the smaller sized clients, this means that he oversees the activities of many of the smaller clients too, which gives him a much broader view of the firm's activities than would normally be expected of a managing partner in a busy accountancy practice.

What We Do

We are expert in Technology and originate from the businesses we serve. We have extensive experience in working with large, medium & small institutions, in all the major international financial centers. It is our ultimate desire to build a successful and long lasting relationship with your organization.

Services:

- Business & Technology Consulting
- Project Management
- Training and Skill development
- Application Development
- Mobile Apps Development
- Business Intelligence
- IT Infrastructure Services
- System Integration Consolidation
- Build Data Centers
- Provide Cloud Management Service

COMMITMENT

Our approach focuses on new ways of business, thereby combining IT innovations and adoption while leveraging an organization's current assets.

Our team is committed to provide IT

Services with:

- Quality
- Technology, Innovation, Support

Quality

Our main emphasis is to deliver best quality in every project we undertake. With our time tested business methodology, and structured solution building approach.

Technology, Innovation & Support

Technology leadership is the most successful strategy to challenge competitors and consolidate our position since business and technology work hand in hand. Our firm's belief in this synthesis has motivated and enabled us to deliver solutions with a decisive competitive advantage. naztech Inc. Ltd. today, is a new generation framework of technology innovators to accelerate growth.

In each of our project, we emphasize on innovation. Our structured team works with a methodology and knowledge to innovate and deliver excellent services. We are committed to provide development and tech-support to software and high-tech companies with the required infrastructure at a competitive rate. On the support side, we provide Team leads, Senior, and Junior Technical support personnel on a 24 x 7 basis.

Values

Quality | Technology | Innovation | Customer Satisfaction | Win together

We aim to be the best at what we do.

We are proud to have built our organization on the strong pillars of integrity, honesty, and self-respect.

Mission

To produce excellent services in the field of IT Services and Consultancy with maximum efforts driven towards customer satisfaction.

Vision

To build upon a reputation of being one of the most innovative IT Solution and Service provider. We believe in doing our work in the most efficient way with robust and structured methodology, with gradual evolution from hard-work to smart- work culture, at client's end also.

Services

We offer a full spectrum of Technology Services:

- **Problem Identification & Analysis**
 - Process Review & Automation
- **Infrastructure Consolidation & Setup**
 - Technology Platform Consolidation (e.g. OS Platforms, Databases, Processes, Storage)
 - Data Center Virtualization
 - Network Virtualization
 - Storage Virtualization
 - Server Virtualization
 - Virtual Desktop Infrastructure
- **Software Development**
 - End to End, Front to Back, Enterprise Quality System (Procurement to Delivery)
 - Develop robust standardized re-usable components
 - Extend/Customize Existing Systems
 - Integrate and interface with current systems
 - Customize/tailor open-source products
 - Extensive experience of building
 - Systems from scratch
 - Interfaces to heterogeneous and disparate systems

Zero maintenance Disaster Recovery

- **End to End Support**
 - Skills profile tailored to meet clients' requirements
 - Real Time management and monitoring
 - 24 x7 Support Model
- **Assist & Advise in Strategic Technology Direction**
 - Lower Technology TCO (Total Cost of Ownership)
 - Identify alternative competing products
 - Standardize development procedure
 - Agile Methodology
 - Automated Nightly Builds & Integration Testing
- **Project Management**
 - Planning, Estimation & Forecasting of Time & Cost
 - Project Tracking & Reporting
 - Vendor Selection & Management
 - Dependency Management

Areas of Expertise

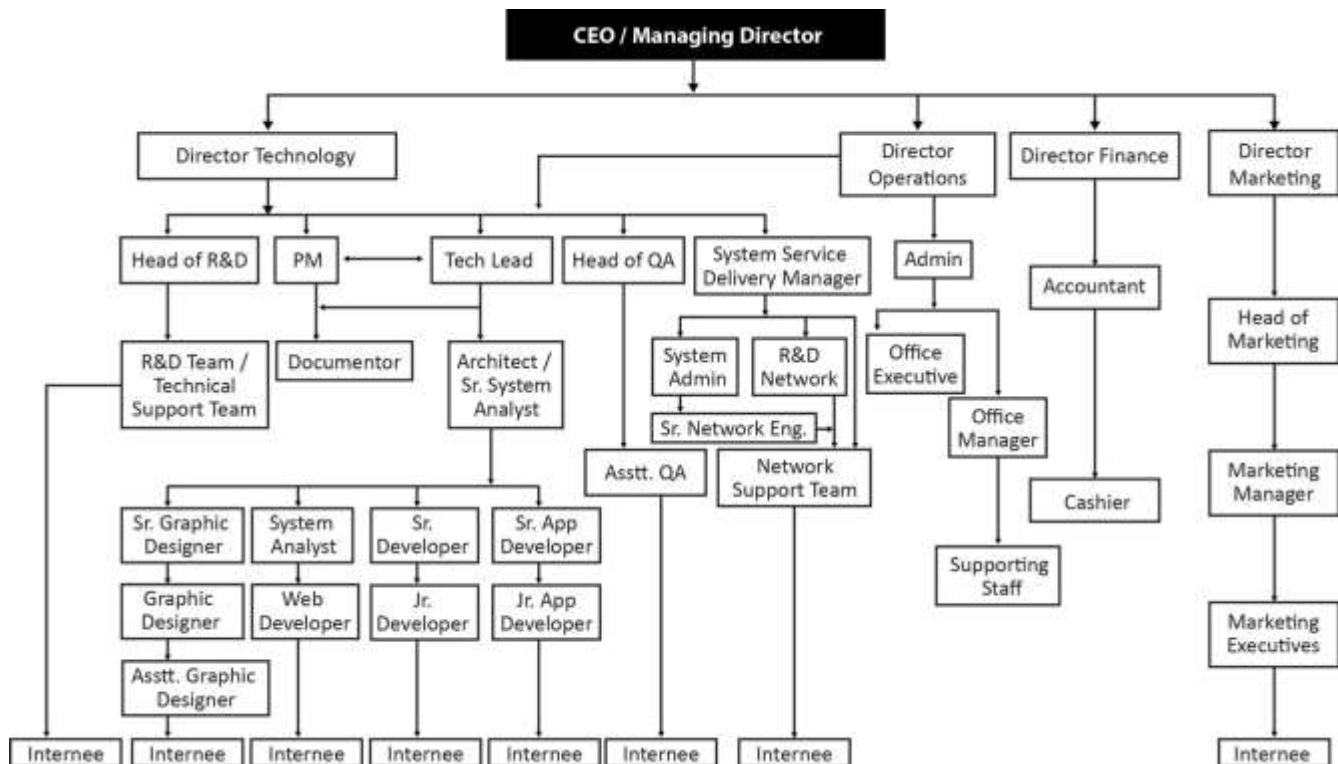

It is this ability that has enabled us to accumulate experience in so many diverse areas. A few of these includes:

- Application Design, Development, and Testing (GUI, Database, etc.)
- Web Development (Internet/Intranet)
- Web-Enabling Applications
- Training and Skill development
- Engineering, Scientific, and Data Collection
- Semiconductor EDA Applications
- Point-of-Sale and General Business Services Applications
- System Architecture and Implementation
- Client/Server Applications and Distributed Systems
- Systems Integration
- Platform Migrations and Code Porting
- Object-Oriented Design and Analysis
- Project Management Consulting
- Technical Documentation and Training

Hardware

nSmartClient	Smart SSD based PC in an ultra-small form factor
nSmartDrive	Ultra compact PC in a USB Size Form Factor with build in Battery
nThin	Sophisticated, simple & energy efficient Thin Clients
nZero	Secure and Stateless super-low energy footprint Zero Clients
SuperServers	Energy Efficient, high density, high performance modular servers
nSAN	Enterprise Storage Server utilizing 128 storage bit with the latest features at an unrivalled price
nRack	SM@RT Data Center in a Rack with precision direct air cooling or unique ultra-compact liquid cooling system.
nInteractive	Portable and ultra-slim smart board.
nDisplay	Document Projection
nSense	Sophisticated Data-Center Environment Monitoring and Alerting System. Real Time Sensor to capture Temperature, Humidity, Smoke, Food, Motion, Tilt/ Vibration, Door Open/ Close.

Projects/ Experience of Firms in Similar Assignment

- Continuous Physiological Monitoring System (CPMS)** - Continuous Physiological Monitoring System is a portable human wearable device that is able to monitor various physiological parameters, and transmit this data via Bluetooth/ Bluetooth Smart (Bluetooth Low Energy (BLE)). This is a developing a system to interfacing with this device to capture, store, process and display this data in an intuitive and meaningful way. Furthermore, it will have the ability to format and forward this data to other systems that maybe interested in this data.
- nSMS Notification Services** - SMS Notification services runs on our state of the art software with a flexible intuitive modern web based GUI, with it you can avail real time view of all SMS Messages with delivery status and delivery times. With our software you can also view, filter & sort all current & historic SMS Messages & Augment / update missing fields. SMS Charges Report (By Customer, By Date (day, month, quarter) or by Network Operator) is also possible.
- nSM@RT is our Global Cash Management Solution** of which nOFAC is our Sanction Screening Software Module. nSM@RT encompasses many functions such as LC Creation/ modification, payment processing, auto nostro reconciliation etc. nOFAC is a module in nSM@RT. In today's market place, the stakes have never been higher for preventing fraud and money laundering Financial Sanctions prohibit an organization from carrying out any transactions with a listed entity, individual or country While financial institutions may avoid being directly involved in embargoed transactions, potential violations of sanction laws can be more subtle and the penalties for non-compliance can be severe naztech Inc Ltd. nOFAC/ nSM@RT solution provides a single unified system to perform AML & SWIFT related activities with an unlimited and unrestricted license. nOFAC with its highly-flexible architecture, blazing fast performance, unrivalled connectivity and the most intuitive user friendly GUI is a one-stop solution for streamlining your AMLscreening process & risk assessment, in real-time.

- **nREMIT** is a retail remittance management software planned with both I-phone and Android native app versions. This software will allow remittance of foreign funds to local client, available to withdraw from any authorized local branch. nREMIT will have built in KYC features and well as SMS and Email based alerting.
