Dhaka 1230, Bangladesh

Company Goal

A company to build itself to go global and be the largest smartphone apps and games developer in the world market by year 2025.

Who we are

Softzino Technologies was founded in January 2015 by Md. Hafizur Rahman, with the purpose of providing customized software (games/applications) for the smartphone and/or handheld device's user market. From the very beginning of Softzino Technologies has got a developer membership program license with Apple Inc. California, USA for delivering company's strategic real time iPhone/iPad games and applications.

Now Softzino Technologies has developed and delivered to user over more than 100 games/applications/websites/ web apps over the Internet to global iPhone/iPad Market (App Store) and for PC/ mobile browser.

What we do

We are specialized in developing custom games/applications, currently sold by Apple Inc. California, USA under its brand and developing on demand software for offshore stakeholders.

Company Services

We provide all the range of services required for a successful business software integration of a modern company:

- > Assessments

Celebrity Quest iOS App	Quiz Game, Multiple choice questions & answer game
Voice Generator iOS App	Voice to text app, specially used for disabled people around the world
Tap n Fun iOS App	Bubble wrap type game using a time limit

** More work references will be provided upon requests

How we did

Company Cultures

There is a trend in Bangladesh that software engineers usually switch from a company to a company and never stay for the lifetime during a product development. Because of short term stay in a company they

never care about what happen might happen to existing projects. As a result, software projects fails and the money invested disappears in a pit.

This is not the case at Softzino Technologies. The company is here to stay, and the employee turnover is next to zero.

This is because we believe our human resource and we care about their work deliver in excellent products. We aim to deliver the best possible software/ app and be proud of it. We favor the technical decisions as opposed to political ones. Our relationship with the customer grows naturally with the successful delivery of each new product.

We do not want to lose our customers as the same time our potential talents in house.

The Software Development Process

Our engineers know the software industry's best practices for managing software development. We are not (yet) ISO 9001 certified and, of course, but with each projects our internal coherence is growing. We are developing and introducing best practices all the time, in a controlled way.

The appropriate tools must support every development practice. We use:

- > Sub Version
- > Standard internal coding style
- > Standard internal naming style specialized for programming constructs, file names and path.
- > Standard projects organization, deliverable, version naming.
- > Standard internal code versioning management, ranging from patch management, code branches management, database structure versioning, releases organization.
- > Standard software tools
- > Standard backup practice

Human Resources

Softzino Technologies' greatest assets are the people working for it. We consider that software engineers are very much alike with artists: they require a special environment and a special state of mind to be able to unleash all their creative potential. They are special men who require and deserve special treatment.

Infrastructure

We have rented and owned a IT infrastructures with a 1100 sq. feet space worth BDT 50 Thousand. We also have significant manpower. Various Desktop & laptop computers and there are some iPhone, iPad, iPod Touch, Galaxy S devices for our development.

Support Terms

We are taking special care for our customer/ clients by providing 30 calendar days free support for issues and bug fixings. We have 24/7-dedicated Skype support personnel.
