

EMPOWERING **FUTURE**

Hello!

Doodle inc. is a futuristic and innovative platform where we turn your imagination into a living reality by using the most advanced technologies. Our team is comprised of bunch of passionate members who are fuelled by appreciation and success of their projects over anything else. We aim to help the global entrepreneur's community achieve their goals in a much smarter, faster and efficient way.

We consider each of our clients as partners, not just customers. So, we take every one of our projects as personal responsibility and not just a task in our daily to-do list. We make sure to start, develop, execute and finish the complete project just as our partners want it with complete perfection.

At Doodle, we strive for excellence over profit. We handcraft each one of our solutions by a creative approach that can not only benefit the user but also influence the mass community in a positive way. Our team works round the clock to empower the business world and make their daily life much easier.

Mijanur Rahman

Founder, CEO

collectively displayed so much resilience and persistence for a common goal. We believe no matter what you do, big or small, that is helping the community around you. Every drop of contribution is important for a better society and you are a part of it.

I started Doodle with a similar mission 9 years ago. We wanted to participate in the evaluation of technology which has bettered our lives over the years. It was not only to make a living, but to use our expertise at its best for the people around us. Doodle is significantly helping the economy by creating sustainable employment and learning facilities.

Message from the CEO

Dear World,

The period of 2020-2021 and till the time of this year has been challenging and inspiring. All of us are successfully coping up with the new work culture and never before in the history of mankind we have

At Doodle, we strive to empower the global IT community through our creative and agile work methodology. We develop projects to serve a communal purpose that can benefit our clients and their surroundings. Our goal is to engineer powerful digital solutions that can help businesses operate much more efficiently and be more productive.

Doodle as a company values your thoughts as their own to empower your growth. It is one of the key reasons why Doodle is becoming popular in the global entrepreneur community. New business, tech enthusiasts and especially visionary IT companies trust doodle as their helping hand to reach their destination.

We believe our success lies in the achievements of my fellow partners and my passionate work-force who uses their creative tech skills to build something amazing for you and which can benefit society. I am proud of Doodle's role in creating a skilled group of IT professionals and the economic impact it is creating world wide.

1. Executive Summary

1.1 Company Overview

The journey of Doodle Incorporation started with a vision of empowering the worldwide business community and tech enthusiasts with custom digital solutions that can simplify operability and growth. For the past 11 years, Doodle Inc. has established itself as a reliable center of multiplatform full-stack software development, mobile application development, advanced cloud computing solutions and providing technical consultancy to growing businesses.

Doodle Inc. had the pleasure to team up with visionary entrepreneurs from different industries on some of the most challenging projects. Over the years, Doodle Inc. has successfully executed hundreds of highly scalable and secure digital solutions for users all around the world. Moreover, Doodle Inc. is one of the most trusted resource center to hire offshore teams under different contractual agreements for both long and short term projects.

Doodle Inc. holds expertise in PHP, NodeJS, Python and a variety of major programming languages and frameworks. This gives the company the edge it needs to make dynamic and custom-made features for even the most complex systems. Doodle Inc adheres to Agile Methodology as a part of its working culture within the organization. Hence, developers and all other team members stay fully committed throughout the project development cycle and ensure an accurate, cost-friendly and impactful result.

1.2 International Orientation

Doodle Inc. undertakes a wide range of international missions and R&D projects. We are well-known to our customers as a provider of advanced digital solutions in different parts of

the world. Most of our clients are from North America and Europe whom we have been helping with a dedicated offshore team, custom-web development and full-fledged cloud solution.

1.3 Quality and security

At Doodle, we ensure the quality of each product by the effective implementation of agile methodology and structured coding to ensure the best possible performance. We also keep an eye to give users a seamless user experience with the scope of consistent scalability. We assign the best tech experts to projects who would work exclusively with our clients and ensure their desired output exactly the way they want.

Doodle also understands the significance of security and prioritises it. Our company policy covers all short of measures that concern the security of a product regarding performance, control or ownership. We not only provide you with the source code but also we will give you full control over all relevant security features so you can monitor and check everything by yourself anytime. We also have a team of Cyber Security Experts having intense experience in building and executing security plans to prevent or eliminate possible security threats or vulnerability.

1.4 Human Capital

Doodle Inc. employs over 70 engineers, ICT experts and consultants of which around 40% holds MSc and 60% holds BSc or equivalent degree. Our staff is multilingual and multinational with in-depth experience in the delivery of services worldwide.

1.5 Financial figures

Doodle Inc. portfolio of ICT contracts has a value around BDT 19,70,00000. The annual turnover of the company in 2020-2021 is around BDT 4,10,00,000. We invest around 30% of our turnover in R&D, Environment Development, Employee Training and Market Development. We are planning to invest around BDT 25,00,00000 within 2025.

1.6 What infrastructure Doodle has?

Doodle Inc is not only equipped with a pool of talent where manpower is concerned, but it also has that infrastructure that assists them to achieve their targets efficiently. The company is equipped with the latest hardware and other related peripherals and uses up-to-date software for its efficient functioning.

Data Connectivity

- High speed dedicated internet connection and available backup internet connection.

Data Security

- Firewall Proxy Server & SSL Encryption/VPN.
- Network Audit on a weekly basis.

2. What is our motto to inspire ourselves?

2.1 Empowering future through technological brilliance

At Doodle, we work towards a better future which we want to build by the power of technology. We want to share our technological intellect with the world to enable business and visionary individuals globally. We want to use our facility to create more learning opportunities and develop careers in the tech industry.

Doodle is a powerpack team of tech specialists who possesses a great level of brilliance which they have earned by immense hard work over the years. The team makes every possible effort to fuel organizations with technological resources to boost productivity and efficiency.

We commit our experience, resources and skills to achieve the dreams of our clients. Our team uses the most advanced technologies to build powerful digital solutions in order to convert visions and ideas into a workable process for businesses all around the world. Doodle is contributing to making the future equipped with impactful digital experience which can facilitate not only commercial purposes but also the quality of life.

2.2 Doodle in a nutshell

A purposed team

It isn't just about a team, to us, it's about the right one, so we never compromise on it. We not only handpick talented local experts to build a team but also follow a rigorous recruitment process, where honesty, integrity, the capacity of being a team player, etc. get similar consideration as much their technical expertise gets. We make sure each member of our team cares and understands business as they understand technology. And most importantly, altogether we tend to be the passionate possessors of our corporate values that drive us toward a common purpose so as a team we never forget the value of growing together.

full of tech enthusiasts

In Doodle we believe, passion has the power to make real differences. So, to us it is not just about putting an effort to get the job done rather it is more about the enthusiasm that displays our scrupulous effort to go the extra mile and offer true value to our clients. We tend to put ourselves in their shoes, always listening intently to understand opinions that diverge from our own and contribute new ideas.

who know-how

Each of our operating teams is led by experienced tech-geeks as well as expert system designers who are adept to trace the most effective and efficient solution out of numerous possibilities, while encouraging their subordinates to become a passionate juggler of libraries, frameworks, languages, and emerging technologies so they can always keep you ahead of your competition.

and value partnership

Doodle is a company where we grow together. Our work is dedicated to each one of our clients who we treat as our partners and not just another customer. It is our partner's success that nourishes us and makes us feel successful. At Doodle, we do not work to finish the job and hand over it to the client. We strive to give an outstanding output that can truly satisfy the needs of our partners and live up to their trust.

2.3 Mission & Vision

Mission

We thrive to empower growing businesses as well as enthusiastic individuals who seek to take their business and ideas to the next level through the efficient use of information technology and improved digital experience. We leverage our experience, expertise and diverse resources to the best interest of our partners, so we can keep growing together.

Vision

Our vision is to empower the future by enabling the global business community. We want to contribute to the economy by creating improved learning and employment opportunities. We strive to create values that not only reflect the success of our partners and stakeholders but also create an impact around that helps to make this world a little smarter and a lot better place.

2.4 What core values we are driven by?

Five core values define who we are and how we work which helps us continue to build the finest custom apps and tailored digital solutions both on time and within budget. What should you expect when you work with us?

It is vision that sets the right direction.

Our team believes that the first step towards success is dreaming big and visualizing what you want to become in the future. Doodle's present success is a result of the vision we had years ago, and now it is our turn to help others to achieve theirs.

Challenges are precious.

At Doodle, we take challenges as opportunities to overcome our limits. Every set-back excites us more to look deeper and find out a solution. Our team loves complexities, as that is something we have been solving for our partners for decades and still doing.

Responsibilities are always welcome.

Obligations make us feel much more relaxed and focused irrespective of its diversity. We are a team of committed people who are not just working to make a living but trying to make the world a better place by their skills and experience.

Transparency strengthens partnerships.

Our partners are our lifeline not only for revenue but because we care for them as our own. So it is our responsibility to be open, honest and clear about how we operate while we are working together for the same goal and do amazing stuff.

Impact is what really matters.

Doodle believes in benefiting the community with its diverse technological knowledge, creativity, and expertise. In every approach, we create something that can be helpful not only to improve the life of our partners to progress their business but also to create a significant impact around.

2.5 What are our general Policy?

Doodle is fully committed to assess, identify, and resolve any risks related to our services. We ensure proper mitigation and control measures in-out operation. Doodle confirms proactive commitment, accountability, and execution from all its team members.

Doodle highly appreciates and supports efforts made to prevent any sort of adverse effects in its activities to improve OMS. We provide all adequate resources to deliver our products or services in full compliance with our policies and 100% obedience to law, regulations, or standards.

2.6 Corporate Highlights

A Reputed name in International Arena

Doodle has earned a global reputation as a software development company. Our solutions have satisfied a wide range of organizations both international and local. Leading Project Portfolio

Doodle develops projects, software platforms, and integrated turnkey solutions for its customers with a favorable cost/quality ratio. Our solutions are made in accordance with the client’s business needs while providing value-based service. For us clients are not just mere customers, we treat them as our partners. So we enable them to work side by side with us. The Company has built up a particularly strong reputation amongst its client base for quality and innovation.

50+ full-time employees	400+ projects delivered	100+ clients served
----------------------------	----------------------------	------------------------

3. What types of expertise we **serve**?

3.1 Fields we serve

Web

Doodle provides advanced web application development services for fast-growing companies and individuals to accelerate their growth by tailored fit solutions. Our expert web development team consists of programmers that have years of experience in multi-platform full-stack web development.

Our team scans the market to identify the latest technological trends and applies the best methods to develop your project with the utmost accuracy. We ensure an engaging UX and UI in your web application and integrate all the features that you want, no matter how complex that is.

We are experts in developing dynamic web platforms, enterprise-level eCommerce solutions, and Content Management Systems with unique on-demand features. Our development team has a proven track of creating even the most complex Web Apps while ensuring quality and on-time delivery.

Mobile

Doodle fuels your business with ductile and custom mobile applications that can increase your brand awareness and customer reach. Our company is globally renowned for creating digitally groundbreaking, highly engaging, and feature-packed cross-platform apps for both IOS and Android.

Our team has end to end mobile application development experts. Our global participation in building mobile applications for clients throughout the world has created the ground for us to identify the requirements of building a tailored mobile app that fits your needs.

Innovativeness, creativity, and engagement are our top priorities while creating a mobile application. We ensure your mobile app stands out in the crowd with the best appearance, functionality, and user experience. Our development aims to provide a high ROI from your mobile application and perform precisely the way you expect.

Cloud

Cloud technologies help to enhance productivity and reduce cost by storing terabytes of information in the most powerful of servers with ease. You will not need to spend tons of money and time on setting up new equipment, which may become outdated soon as well.

Our development team can optimize your cloud environment to its maximum potential. We check your system microscopically and identify the missing factors. Our solutions are all tailored to your needs and goals, which will improve your overall performance.

Our team uses the latest technology and tools which are specific to cloud services to implement flawless cloud computing. We make the transition from traditional data processing to the cloud very easy and time-efficient.

SEO

Doodle turns your traffic into sustainable revenue by complete white hat SEO services. The Doodle SEO team consists of highly experienced and educated SEO professionals having extensive knowledge of Search Engine Algorithms both in terms of off-page and on-page SEO.

If you are looking for serious growth in your search traffic, ranking, SERP performance and overall Search Engine visibility, Doodl's SEO service can help you achieve these goals in a much faster and reliable way.

We do all the keyword research, its implementation on contents, building backlinks, optimize your web images and also complete integration with Google Analytics. Our SEO team handles all the data mining and analysis to stay up to date with Search Engine Algorithms and ensure a safe online presence for you on your niche search queries.

- Education
- SaaS Products
- Real Estate & Construction

4. What are our working culture?

We have seen businesses succeed, and we have seen them failed, so we bring those lessons to every project. This approach allows us to share that experience with our client and use it to avoid the missteps others have taken while also working as your techno-development advisor. We will tell you what we see, giving you the extra set of eyes and perspective, and guide you through a process that ensures effectiveness and efficiency.

4.1 Agile development

At Doodle, we believe in quality over anything else. Our entire planning and execution are based on perfection and to ensure a flawless output. We deeply focus on the business values and ensure a transparent workflow throughout the product development by consistent collaboration. Our agile work methodology allows us to keep up with the changes and scale when it is necessary without any interruption.

4.2 Lean product orientation

Our work process aims to maximize the velocity of product development by eliminating all kinds of waste or unnecessary elements right from the start. We go deep into your requirements and first draw the blueprint carefully to understand the

overall structure. Our team then communicates at all levels, identifies critical challenges, and continues to solve them during the development phase to streamline the process.

4.3 Flexibility

No matter how deep, complex, or futuristic your aims are, our team members enjoy learning about your requirements and always there to entertain your request. Doodle is a platform where dreams and imaginations are given a face by technology and creative thinking. We adapt with our partners super fast and ensure resilience in our work to provide them with complete authority.

5. Services We Provide

5.1 Software Development

6. What our Engagement modules?

6.1 Project-Based Engagement

If you want to develop a project that has specific deliverables & requirements, our Project Based Engagement module is the perfect match. We will implement & execute the project with our long experienced team of professionals and It will be our responsibility to ensure the successful completion of your project on-time.

6.2 Dedicated Offshore Team

Hiring a dedicated offshore team can significantly reduce your operational expenses. We will manage the best available talents along with the necessary resources and infrastructure to set up a fully functional team as per your requirement. This team will operate under your authority and guidance as your in-house team.

6.3 SLA-Based Approach

We recommend the SLA approach for long-term projects with clearly agreed requirements & limitations. As per the conditions mentioned in the Service Level Agreement between both parties, Doodle Inc will take the complete responsibility of monitoring and guiding your team to successfully implement the project throughout the project lifecycle.

7. Contribution towards building a better society

7.1 We believe in impact

Our team loves exploring new ideas, technologies and tools of all kinds of industries. We have seen it all over the years and yet we are always curious. That is because we want everyone we reach to have that “wow” moment that makes them act all the time.

We create amazing things that strike the perfect balance between quality and powerful technology. Our work reflects our values and heart both for the world and its people. Therefore we take the extra leap to make each one of our projects highly impactful for the society that can contribute to the greater good of the people around us.

Our approach is ambitious and we are proud of it. It is because we make every effort to create value in our services that can positively affect society by leveraging business, lifestyle and education.

7.2 Contribution towards a smarter world

A Smarter World became the underlying framework of Doodle’s growth strategy right from the beginning. We strive to make a more productive, efficient and responsive world through a smarter use of technology. Therefore, we consider every project as a valuable asset which can not only be beneficial to its owners or users but also be a strong contributor to the community.

An improved customer experience

Customer experience also known as CX is the entire sentiment of every interaction each customer has with a company. Doodle believes that with the right technology and process, every customer can be treated with a fantastic experience.

Over the years, Our team has been engaging the right people, with an effective process and advanced technology to ensure a top-notch customer experience. Our primary objective is to help and solve the problem of our customers instead of just focusing on the bill.

Doodle encourages to establish a transparent and delightful experience for every customer who is trying to get help. Being one of the leading tech firms in the world, Doodle believes that aiding a customer is one of our key social accountabilities.

Help businesses around the world to go beyond

Doodle believes that technology has no border and we are all part of the growing digital world irrespective of our nationality, race and culture. So we are not limited by demography, borders, liquidity and investment to extend our helping hand.

Our team loves connecting with enthusiasts all around the world and helping them achieve great feats by using our technical skills and resources that we have built over the years. We go beyond the conventional ways of partnership to to facilitate growth for business worldwide.

Doodle wants to share its success and achievements with everyone who wants to make the world better, smarter and more intelligent. Our team does not hold back nor believes in restraining knowledge. We strive to give you the edge you need to transcend in what you do.

Reaching communities worldwide

Doodle is continuously working to empower the surrounding by intricate and salutary technology. We do not believe in confining our services or be selective. Instead we love working on projects that reach out to different segments of people all around the world and extend our helping hand to experience the positive results of high-tech solutions.

We inspire communities to come closer with advanced tech solutions that can better their lives. Our team rigorously works to connect with the central population from every part of the world and introduces latest ways to upgrade their business and lifestyle.

Our services are easily adaptable and tailored to the needs of our partners. Therefore, we are able to ameliorate more numbers of communities from various demographics by offering our experience as well as expertise in business and technology.

7.3 We keep ourselves socially responsible

-  We want our actions to positively affect society
-  We do our best to benefit our city and country
-  We strive to make a meaningful difference

Sustainable employer

At Doodle, we have a work environment where our team members can be creative and have the liberty to dream big. We take every word of our team members for granted and make them feel a part of a family where they have an important role to play. Hence, we have a low employee turnover as most of our team members are willing to remain a part of Doodle at present and even in the future.

Ethics and business integrity

Doodle's success in the international market is a result of demonstrating the highest level of integrity and ethics in every business interaction. We are committed to maintain the highest standard of ethical conduct in all our business activities. We ensure total compliance with laws and regulations internationally. Our approach is transparent with no hidden terms and conditions related to any of our services or contracts.

8. Life in Doodle

Only having the right team isn't enough if they are not given a proper environment to flourish. We believe it affects the motivation and productivity of employees, so at doodle, we do whatever it takes to keep our place full of life. We constantly keep trying to ensure a proper work environment that motivates better result.

Happiness First Approach
