

Corporate Profile

CodeMarshal IT Systems Limited

About CodeMarshal

CodeMarshal IT Systems Ltd. (CM) is a private limited company incorporated and registered in Bangladesh. CodeMarshal specializes in application of cutting edge artificial intelligence solutions to real life use cases with products specially crafted for the Bangladesh market. At CodeMarshal, we believe in a world where identifying a person is hassle-free and natural. CM uses its game-changing facial recognition technology and best in the industry Bangla OCR to solve different types of identification problems starting from due diligence before customer onboarding to forensic investigation. CM delivers products to its customers with non-intrusive identification methods and typing-free data collection for increased efficiency, accuracy and speed.

Story of CodeMarshal

CodeMarshal started its journey as an AI based automatic judgement enabled and highly scalable programming contest hosting platform. Later the team decided to expand the use of AI expertise to solve different real life problems and formed the company in 2017.

Today CodeMarshal proudly helps government and private organizations with state-of-the-art technology to deliver service to millions of people.

CodeMarshal's Technology

Face Verification and Recognition

Based on breakthrough loss functions and deep learning technology, CodeMarshal's face recognition engine guarantees zero false positives and industry leading 99.6% recognition accuracy for South Asian ethnicity.

High Accuracy Bangla OCR

CodeMarshal's in-house Bangla OCR delivers great accuracy on both general Bangla writings and ID card photographs. Current accuracy on ID card images is 97.2% and on regular images is 99.8%.

CodeMarshal's Products

CodeMarshal offers a range of products based on its in-house technologies.

Marshal-KYC is a customer onboarding solution for financial institutions to enable both onsite and remote rapid onboarding with accurate KYC information.

FaceMarshal is available as API, SDK or complete software to deliver face recognition based authentication, identification, surveillance and forensic applications.

FieldMarshal is built for remote activity management and monitoring of field workers.

Team

CodeMarshal is the home of talented innovators under the leadership of industry renowned leadership team and veteran advisors.
