Corporate Profile of UDC Construction Ltd

About the Company /History:

UDC Construction Ltd (UCL) isa private limited company registered in Bangladesh under Company Act – 1994.

UDCCL is a leading ICT solutions company based in Dhaka, Bangladesh with a mission to work with the clients to help them create a business value through the uses of ICT. Since commencement, **UDCCL has** been committed to help the customers gain competitive advantage in their market place through the strategic exploitation. As an organization **UDCCL** is the pioneer of the latest revolution of ICT in Bangladesh and also the biggest Promoter of undiscovered talents in every sectors of ICT.

Mission:

UDC Construction Ltd. mission is to enhance the business operation of its clients by developing and/or implementing premium IT products and services. **UDCCL** smission includes:

- Application Design, Development and Testing (GUI, Database, etc.) ;
- Web-Enabling Applications;
- Device Independent Applications;
- Making access to information easier and securer (Enterprise Business) ;
- Improving communication and data exchange (Business to Business);
- System Architecture and Implementation;
- Client/Server Applications and Distributed Systems ;
- Project Management Consulting;
- Technical Documentation and Training; and
- Providing our employees with meaningful work and advancement opportunities.

Vision:

Quite simply: we write code. However, unlike most software companies, we realize that's only part of the job. We don't just write code. We develop professional software. This is why our Clients choose **UDCCL**. Many companies can find programmers to generate code. However, few have the experience to

produce professional quality software. **UDCCL** develops standards and set goals that help contribute to our success and your satisfaction. These are the goals that we have set for ourselves:

- System Architecture and Design;
- Customized software Development;
- Project Management;
- Device Independent Application Development;
- IT Support and Network Administration;
- Inspiring people for Information Technology Enabled Services;
- To be a part of Digital Bangladesh;
- To develop and participate in new programs for the betterment of the marginalized people through ICT;
- To work for the improvement of various government, non-government and international ICT projects;
- To continually enhance our services with a knowledgeable and friendly support staff;
- To be a leader in the ICT industry; and
- High end training solution with selected subject.

Focus:

UDCCL is focused in Software Development. We treat each of our clients individually and therefore we do not offer set prices on any service. We offer affordable low cost Enterprise Resource Plan (ERP) solutions. Our professionals believe that the key factor for the success of any on-going project is to build a spotless communication bond with our client. Our team members are not just IT professionals but have excellent communication skills with people, to meet with your needs and requirements. Our company takes care of every minute detail for what our client desire during the process of developing the project. As a software development firm our request for you to look at the information technology sector in Bangladesh in recent days. This industry has been improving very rapidly with highly skilled IT professionals and updated clear cost advantage for you to outsource your software development work to us.

Area of Strength:

1. **Strategic Information Systems Planning**

We assist our clients in identifying their entire information needs. We conduct system studies to help our clients evolve information systems blueprints that will support their mission and strategies, and bring about higher productivity and competitiveness. We help our clients streamline their operations through strategic exploitation and business process reengineering. We also conduct office systems planning studies to determine the most appropriate use of office automation that will meet our customer requirements.

2. **Project Management**
   We provide project management services to ensure projects are developed and delivered on time and within budget. Our expertise is in software project management and so far we have successfully completed the project management of several huge software projects.

3. **Software Development:**
   Software development is one of our prime services. We have a large pool of programmer and analysts to perform application software development. We possess expertise almost all latest platforms includes following:
