

SOFTWARE TO TAKE YOU TOP

Company Profile

About Us

Since its inception, Core3Lab Limited has been providing specialized software engineering, research, and development services to offshore and local organizations from different sectors such as construction, telecommunications, transportation, finance, education, etc.

Core3Lab is one of the fastest-growing IT-based services providing startups in Bangladesh. Our talented and highly motivated engineers and developers are always eager to explore technological advancements by working with cutting edge technologies.

We offer Software Solution Development & Deployment Services, Technology Outsourcing Services, Consultancy Services, and Managed IT Services which include Infrastructure Management, Deployment, and System Integration services to the clients.

For many years our specialists have been architecting and building software products and gained the experience that now positions Core3Lab to exceed client expectations. Members of the core team have been in the Software industry for more than 12 years, and most of them have been working together for years now.

Our top three client-tested areas of expertise (in order of priority)

- GIS & LBS based custom applications
- Distributed system, cloud services, and micro services architecture
- Android and iOS mobile applications
