About REGENCY

Regency Tech City Limited

Regency Tech City Limited is one of the leading IT solution providers in Bangladesh. Our efficient workforce delivers the best in class products and services.

We work with various government projects under ICT ministry. We have been working in nationwide projects like LEDP. Many other projects are in pipelines.

We understand customers are our best ambassadors and our existence depends on their wish. With the countrywide service network, we are set to go beyond the border. We are committed to create landmarks in the international marketplaces.

Have delivered more than 10,000 portals and published **150+ mobile apps** on various app stores and still counting. We have expertise in the latest technologies such as: Microsoft, .Net, Java, PHP, C++, C#, Ruby on Rails (ROR). We also work on mobile platforms such as Windows, Apple iOS, Android, Blackberry. We at Regency Techcity provide a complete range of services by leveraging our domain and business expertise and strategic alliances with leading technology providers.

We completely understand your business category and create design, which is according to your requirements and lets you stand apart from the crowd. Our designers make amazing designs that can fulfill your dream of having a unique brand recognition and identity.

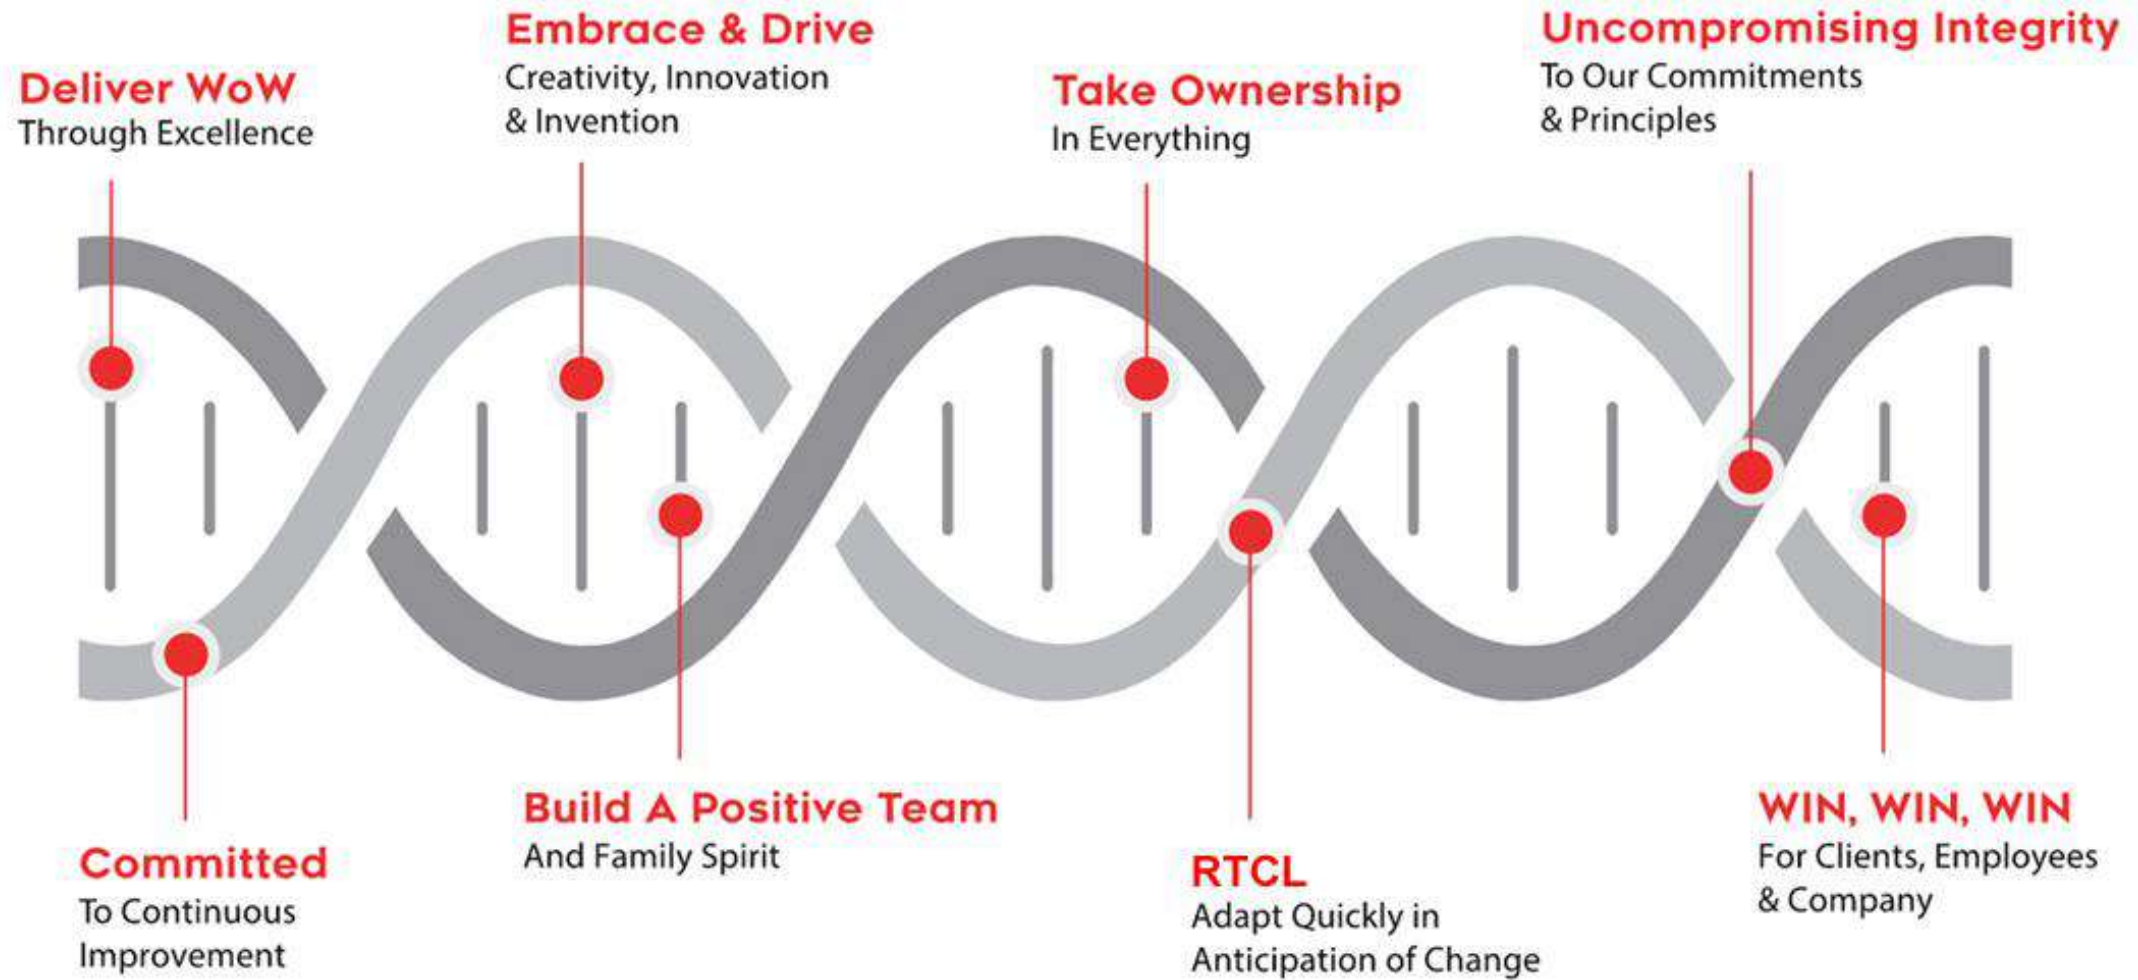

eCommerce Development

For 06 years in the industry, we've firmed up a mature vision of the ecommerce experience to aspire – highly engaging, customer-centric and consistent across all touchpoints. We closely explore customer psychology: what customers expect from ecommerce brands, how they behave on digital channels, what can impact their purchasing decisions and more. Along with customer knowledge, we extend our technology expertise to be able to translate our vision of winning customer experience into tangible ecommerce solutions.

Our DNA

Glance at our offerings

**WHAT
WE DO**

01

End-to-End Products Engineering

Build High Performing and Profitable
Products

02

Enterprise Digital Transformation

Get Your Brand a 360 Degree
Digital Face Uplift

03

Team Augmentation

Access to World-Class Infrastructure
to build your Product

MICROSOFT	OPENSOURCE	JAVA	FRAMEWORK	CMS	ECOMMERCE
 Microsoft Azure					
 .NET MVC	 Java	Struts	 yii framework	 WordPress	 oscommerce

Our Engagement models

Project Basis

- > Fixed Price
- > Time & Material Model

Team Augmentation

- > Resource as a Service (Offshore, Onsite & Hybrid)
- > Offshore Development Center (ODC/BOT)

Product Engineering

- > Consulting & Planning
- > Discover, Design, Develop, Deploy, and Iterate
- > Support & Maintain

RTCL METHODOLOGY

RTCL software development comprises various approaches to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages rapid and flexible response to change.

RTCL software development values -

- **Individuals and Interactions** over processes and tools
- **Working Software** over comprehensive documentation
- **Customer Collaboration** over contract negotiation
- **Responding to Change** over following a plan

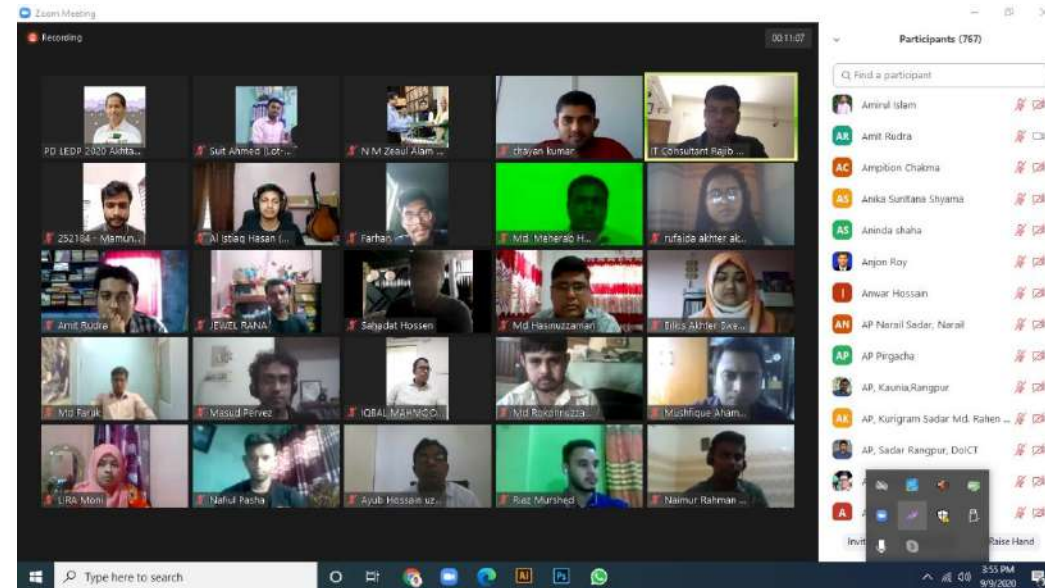

RTCL software development principles :

1. Customer satisfaction by early and continuous delivery of valuable software.
2. Welcome changing requirements, even in late development.
3. Deliver working software frequently (weeks rather than months)
4. Close, daily cooperation between business people and developers
5. Projects are built around motivated individuals, who should be trusted
6. Face-to-face conversation is the best form of communication (co-location)
7. Working software is the primary measure of progress
8. Sustainable development, able to maintain a constant pace
9. Continuous attention to technical excellence and good design
10. Simplicity—the art of maximizing the amount of work not done - is essential
11. Best architectures, requirements, and designs emerge from self-organizing teams
12. Regularly, the team reflects on how to become more effective, and adjusts accordingly
13. Core Software: ERP, Accounting Software, School management Software, Hotel management etc.

Sl. No.	Project / Training name	Title
1.	Training	Web design, graphic, Android Apps Development, SEO, SMM etc.
2.	Outsourcing training	Digital Marketing, Web Development, Graphics, SEO, Android App Development etc.
