

Introduction

Mitisol Ltd. is an innovative company in the business of IT-based digital security consultancy, providing hardware and software solutions for security purposes for the public and private sectors, including defence forces. Mitisol endeavours to offer the best in class solutions from around the world in terms of cyber security, security checks, and solutions. Our solutions include high tech security surveillance, personal information protection, intellectual property data theft protection, government and industry information systems protection, and more for stand-alone, network, mobile, and cloud platforms.

Who We Are:

As technology involving information and data progress, the gaps in Bangladesh's IT infrastructure grow. The information age brings new threats on both international and local levels. Our children have increasingly exposed to the cyber world, and more unique forms of harassment appear that parents, teachers, and guardians need to be aware of. In the meanwhile, data and information are threatened in the way of smaller scale scams like identity theft and mobile-banking hacks as well as larger-scale attacks like the 2016 Bangladesh Bank cyber heist. In the absence of any large-scale enterprise in the private sector, Mitisol Ltd was founded to make life in the digital Universe safer for all.

MITISOL Ltd is an innovative company in the business of IT-based digital security consultancy, providing hardware and software solutions for security purposes for the public and private sectors, including defence forces. Mitisol endeavours to offer the best in class solutions from around the world in terms of cyber security, security checks, and solutions. Our solutions include high tech security surveillance, personal information protection, intellectual property data theft protection, government and industry information systems protection, and more for stand-alone, network, mobile, and cloud platforms.

To this end, we offer testing services to review the reliability and preparedness of our clients against cyber threats. We are an authorized training centre and offer advanced infrastructure and security training. For learning institutions, we provide a block-chain enabled e-learning platform that is compatible for schools, colleges and universities.

We intend to engage in pro-bono work involving the government to work against cyber-bullying among the youth. We want to create awareness utilizing social, electronic, and print media. Additionally, we foster conducting programs to educate teachers and guardians of new developments and prepare them for cyber-bullying incidents.

Our clients can feel comfortable working in an environment secured against digital threats.

Goal:

Ensure a fearless digital world by providing high-tech security solutions, authentic mentoring, and auditing services with a view to keeping our clients cyber safe.

Vision:

- ❖ Instill countrywide awareness of cyber threats we face as individuals and as a nation
- ❖ Modernize cyber security in financial institutions for banking both digitally and face-to-face
- ❖ Bolster information security and privacy for data belonging to both citizens and institutions
- ❖ Empower our educators and guardians to manage and mitigate cyber bullying amongst our youths
- ❖ Introduce secured e-learning in the educational institutions in Bangladesh
- ❖ Provide accredited training on cyber security in an active learning environment

What We Do:

Our Board of Directors

Ehsan Haque (Chairman)

Ehsan Haque (Chairman) is based in Switzerland; he is an accomplished senior level manager with an extensive background in Banking, with a track record in asset management, securities trading, FX, fund raising, communications and marketing.
