JMJ
JMJ CODE

As an oracle and visionary in the ERP sector, JMJ Code has been delivering the most contemporary technologies in the area of innovative business software for 3 years. We always have our finger on the pulse of current market trends. This enables us not only to meet individual company and industry-specific needs but also to flourish continuously.

It was in 2016 when JMJ Code started its journey with eye full of hope and belief to provide software services in Bangladesh. The institutors have invested their time, effort and patience to fulfill their dream to provide maximal output to the clients in this fourth industrial revolution arena. Inception of the journey was not so plain sailing. Our integrity, commitment, expertise, team work, the motto of serving maximal output have made our path smooth and the trust of our clients helps us be on the right track in this mission.

In this era of digitalization and automation, the economy of Bangladesh largely depends on the textile industry. But automation in this sector is not that consequential to emulate the global economy. As there exists substantial gap, JMJ has planned to provide software solutions for this particular industry with a view to reducing human physical activity, paperwork and time constraints. While JMJ was struggling to get big clients, Young Labels, a leading manufacturer of labels, put their trust on us in late 2016 as our first client to take ERP facilities from us. And we have successfully kept our commitment to deliver maximal output within scheduled time and by meeting all the requirements.

As a start-up, we aspire to become the best service providers in the industry by building relationships with the clients. Our clients are our partners and we dream to grow together.

VISION

Creating a platform that enables businesses to avail technology as supplement for their growth and development.

MISSION

Ensuring maximal automation through delivering innovative and reliable solution to fulfill our clients' need with utmost quality and uniform ethics.

CORE VALUES

We have pledged to deliver the best to our clients through prominent practical and dependable technological solutions. We cherish and nurture our interactions with every stakeholder of the business. As we operate on the standpoint “Every Client Matters”, high quality work is prerequisite for every task. We heartily believe that a happy and satisfied customer ensures success, long term engagement and works, a key to generate more business. And we humbly commit to live up to our values.

Integrity

We deal with different confidential information of our clients. When we take a contract, it becomes our allegiance to keep information safe to value the respect and trust of our clients.

Customer Centricity

We have a dedicated team who proactively communicate in order to provide supreme customer support. To drive the quality and ensure customer satisfaction, we always focus on utmost customer centricity.

Passion

We take on challenges with the commitment and take pride in the execution.

WHY US...?

We prioritize on working collaboratively and collegially to reinforce your aspirations, share the risks and achieve your ultimate objectives. Our team is committed to innovate to provide you with world class solutions.

We get results

We help our partners foster economic and social opportunities. We have an impressive track record of tackling hard problems with innovative technology and business models to produce sustainable solution for your business, in whatever way you want and at any scale.

We are open source experts

We're ingenious, collaborative thinkers and effectuators, solving complex business problems with astute technology solutions. We also work with other open source contributors here in Bangladesh and overseas to get the most out of the software we provide.

You are in charge

Our clients are always in the driver's seat in every step of the development process and have complete authority to share opinion if needed within the scope of developing the final solution. From start to finish, we religiously maintain transparency in the whole process and share everything you want to know.

We work as a partner

You will be working with a fantastic team where everyone is equally enthusiastic to help you throughout the course. With our constant focus on innovation and sustainable technology solution, JMJ Code is a fresh and exciting partner to work with.

We believe in future

JMJ Code vows to meet the needs of the current generation without putting the opportunities of future generations at stake. This is why our company sets on sustainability and innovation.

TRUST THE PROCESS

JMJ Code believes in the art of Maximal Automation. We commit only when we know that we can provide the best output. We work on variety of projects but our approach to the clients is uniform and equilateral. How we serve -

Full devotion to the project: Our dedicated team takes responsibilities in the most adept way. They are passionate and desperate to serve the best version of your software solution. This is not because they are told so, but because they care.

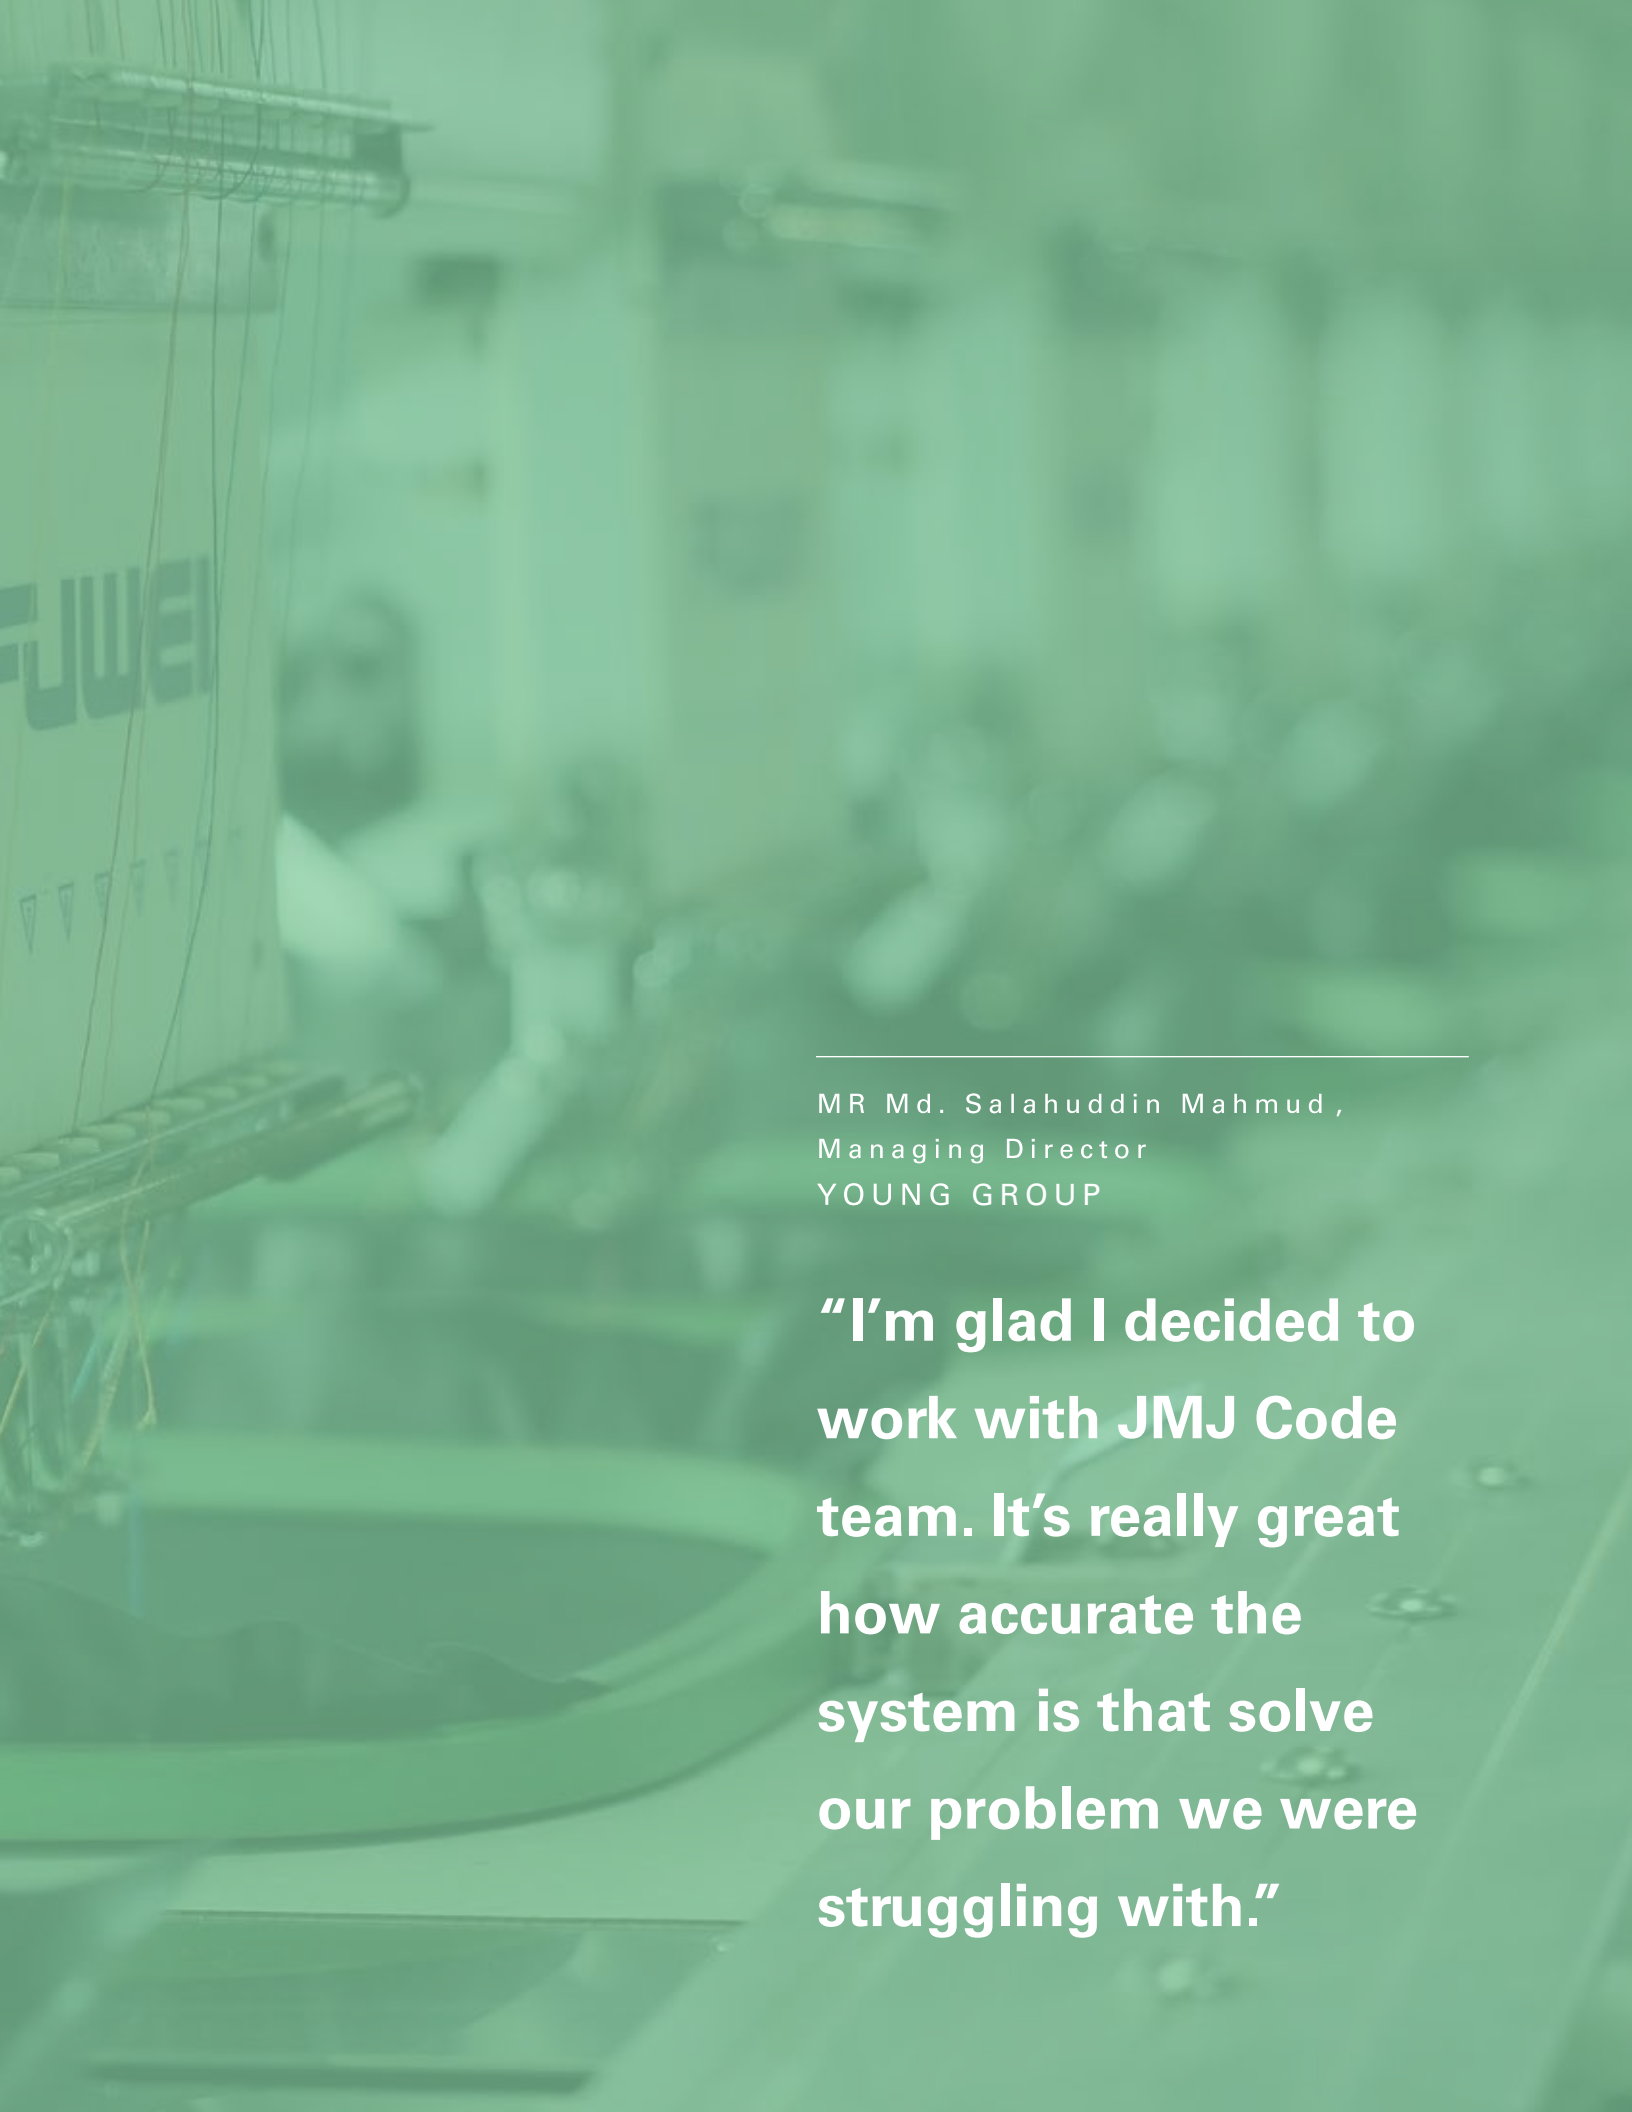

Our approach: Generally, we stick to agile methodology to develop software. This methodology keeps all stakeholders synchronized and evolves through collaboration between self-organizing and cross functional teams.

Teamwork: Team work makes the dream work. To understand the alignment among the teams we have regular knowledge sharing session where every team shares their experience and ideas with others to improve their current project.

Routine interaction with the clients: One of our priorities is quick reaction to the problems. In any kind of discrepancy you can be sure that each of the team members is one phone call or email away.

QA & DEMO testing: We have professional tester to support our quality assurance and quality control team to deliver improved quality. Before delivering the final solution to the clients we offer them a demo testing. During this time, we encourage as much testing as possible to ensure the solution is ready to go live.

Support & maintenance: We know our work is not done once the product goes live. We offer after delivery assistance through monitoring and 24/7 phone or email communication. MJM code always values the partner and is passionate about maintaining the long lasting relationship
