Our Story

Celebration has a collection of young talented developers from Bangladesh providing IT services (which includes Software solutions, Graphics design services, Web application development/design services and Mobile application developemnt services) not only in Bangladesh but also around the world. Celebration was formed by people who are highly experienced in Software Development and Project Management with a clear vision to provide quality software services.

- Celebration was founded in 2010.
- What started as a small venture of two people has now become a company of 10 people.
- We cater to the needs of both local and international clients with different calibers.
- More than 90 Web, Andorid & iOS application live online.

We are introducing Celebration to take over all your problems and give you an attractive and effective solution. We are providing all type of web and software solutions and services with best quality, fixed time limit, and reasonable price.

Folklore

Celebration is named after thinking about sources of work . We inspired by the rapidly increased creativity in IT industry.

Our Mission

Celebration mission is to become a market leader by consistently exceeding our Customer's expectations; providing them with best of breed technology solutions like business management system, any kind of software solutions, web & mobile application development.

We will continually communicate with, and learn from our Customers, in order to improve our products and services. And, we will keep on top of today's and tomorrow's technology, no matter how fast it moves, to ensure our customers always have the best tools/solutions available to them with efficient cost and due time.

Our VISION

- To be a global leader in the information technology domain.
- To be successful in helping customers apply extraordinary technology to solve their problems.
- To be important, because we will commit to innovate and test boundaries of this industry.

Core Values

Reliability - "Doing the Right Thing without Being Told"

Exigency - "It's now or never ", "Act Today, Not tomorrow"

Attitude - "Be positive and open minded"

Ownership - "Work Like it is one of your own"

Alignment - "When Source Forces Wins, We All Win"

Modernization- "Get Better Every Day"

OUR SERVICES

With over 10 years experience, our software consultants can help you problem solve and give you guidance on your business. We provide consultancy services to small early-stage startups, SMEs, corporates and NGOs across the Globe.

We deliver insights on issues with technology that could be a specific problem to you and a bottleneck to your business growth. Whether you're looking to reduce costs, speed up processes or needing new innovation, we provide insights on user experience technologies, commercial viability, security risks and infrastructure. We'll also provide an action roadmap and estimated time frame for any strategy that we propose.

As a result, your company will benefit from being at the cutting edge of business best practice with its streamlined processes and minimal waste on unnecessary costs such as loss of productivity, staff training time and business practice disruption.

Enterprise Software Development

Whether you are looking for a qualified software development provider to deliver a custom enterprise software solution, an experienced integrator to create a connected software ecosystem or a diversified team of developers to handle a bunch of enterprise apps, you can turn to SourceForces.

Core Features >

- ⦿ Custom enterprise software development
- ⦿ Enterprise application integration
- ⦿ Legacy app upgrade and modernization

Web Design & Development

Whether you need a nice clean landing page or a complex web platform with custom requirements, our team is happy to help. We have vast experience building custom booking systems, travel portals, membership sites, social platforms, online stores, CRM's, and more.

What Exactly We Do >

Great products start with great ideas. If you bring your idea to us, rest assured we will develop a solution that will look outstanding, that will last, and that will be easy to maintain.

- ⊙ Membership Sites
- ⊙ Social Platforms
- ⊙ Real Estate Portals
- ⊙ HealthCare Apps
- ⊙ Booking System
- ⊙ Travel Apps
- ⊙ eCommerce
- ⊙ Marketplaces
- ⊙ News/ Megazines

Mobile Apps Design & Development

We create cost-effective native and hybrid mobile applications for iOS and Android. The latest technology allows us to write the code once and reuse it for creating Progressive Web Applications. It means you don't have to pay for two separate applications and hire two teams of mobile app developers. And it's faster!

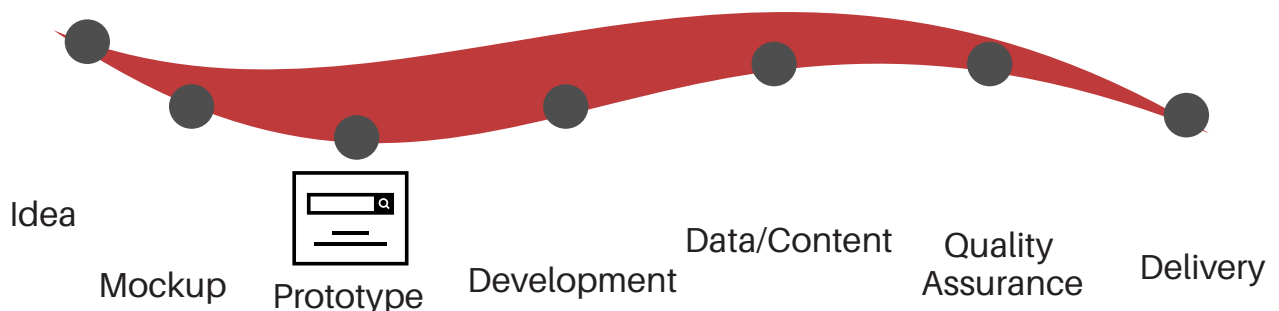

We have an experience in the following business categories:

- ⊙ Financial Apps
- ⊙ Real Estate
- ⊙ HealthCare
- ⊙ Hospitality & Travels
- ⊙ Booking System
- ⊙ eCommerce

WorkFLOW

We follow clear principles of quality software development and use common milestones as a basis for our software development processes. To ensure we get real world feedback as early as possible, we'll split your project into a number of sub-projects so that you can "go live" in stages.

Our project management practices cover the development of customised software, designed meticulously from the ground up, requiring a blend of consistent, proven structure with project specific creativity.

Keeping project on schedule >

Delivering software on time starts with a well-defined and realistic schedule. To ensure we're on track we:

- > set small, frequent milestones and deliverables so that we have regular, measurable updates on project status and can correct small slips quickly
- > schedule the "big rocks first", and aim to get the most important and potentially most risky features completed early in the project
- > track progress diligently on a daily basis over a project extranet, and on a weekly basis in status meetings, so that both sides are in tune with the schedule

Our Expertise

We think beyond specific technologies. We are proficient and experienced with a wide array of tools and systems. Every product is unique and we try to fit the right team with the right skills for that particular product. Our teams have worked on web applications, created desktop applications and built numerous mobile apps.

Tools Frameworks

.Net & Microsoft World
