

ROOTNEXT SOLUTIONS

COMPANY PROFILE

1. Introduction

RootNext Solutions provides leading-edge software development, software testing technologies and expertise, along with BPO services that enable our customers to accelerate business growth while having confidence in the software and services they deliver. RootNext has completed software testing and development projects for prominent companies across a broad range of industries and technologies.

RootNext believes to develop a unique collaborative model of partnering with clients to deliver great software products to market rapidly and economically. Our ongoing success as offshore partner for some of the world's leading software companies in the large scale Enterprise Computing.

Our offshore facility serves as virtual extension of our partner's local development and software testing teams. If the client does not have any internal Software Quality Assurance staff, we provide an integrated partnership with the client development team also. We support our clients' need to constantly innovate, keep pace with their expectations, adapt to ever changing technologies, tune to transforming business models.
