INTRODUCTION

Nusratech is a leading web technology and cloud performance & security solution provider with over 5 years of experience. Our unique positioning on the market enables us to be at the forefront of every new technology and with that unique expertise we help our clients to quickly and cost effectively choose, test and deploy the best solutions to service their customer base.

INDUSTRY-SPECIFIC SOLUTION

Streaming & Media
With the demand for online video rising sharply in recent years, network administrators are seeking cost-effective solutions to accelerate video delivery while improving quality and security.

Online Gaming
The gaming world is one of the most in-demand industries. Game content takes massive amounts of storage space, and speed is everything for a good user experience.

E-Commerce
Speed, stability, security. Ecommerce websites need to deliver all three elements if they want to succeed in today's fast-changing market.

Education
Education has gone far beyond the traditional classroom settings. More schools are incorporating videos into their curriculum to make learning more interesting and effective for the students.

Government
Government officials and employees often handle sensitive data and information. To be seen as a reliable source of information and service platform, web performance and security cannot be compromised in the government and public sector industry.

Telcos & ISPs
The popularity of digital media means that telecommunication operators and internet service providers (ISPs) are often challenged by the rapid growth in internet usages that translating into higher technology costs.
