Software-Aided Business Consultancy, Sales of Ready-made Software, Support in developing Custom-made Software, Software Implementation & Support Services, Training program to develop IT-enabled Business Executives.

COMPANY BACKGROUND

Jamuna Tech, since its inception is working as a 'Software-Aided Business Consulting Firm', dedicated to providing highest quality services to the clients in the track of Accounting, Inventory, Manufacturing & MIS solutions with ready-made software solutions. In collaboration with some software houses, JAMUNA TECH also provides customized solutions to the corporate business entities. Within very short span of time the company has succeeded to make a strong user base all over the country. This achievement reflects JAMUNA TECH Corporation's strong commitments to quality customer services. Targeting development of Human Resource on 'Computerized Business Operations', JAMUNA TECH also conducts a case-study-based excellent training program named, "Computerized Business Operations (CBO)". This training program has been adopted by the Accounting department of University of Dhaka for their students.

Observing requirements for web site designing for the existing clients, JAMUNA TECH has commenced a new wing for web site design, domain registration, hosting etc.

WHY JAMUNA TECH ?

Conceptual Understanding

JAMUNA TECH understands the need of customers best. A full-fledged team of appropriately experienced professionals—is the key to our success to understand customers' requirements better than any one across diverse environments.

Level of Expertise

JAMUNA TECH has the most technologically advanced human resources who have been working in the field of IT since many years with a wide business solution experience.

Systematic Development Approach

Software development is one of the most complex tasks in the world. To produce any quality software, there is no alternative to a structured approach. Perfect route of structured development requires in-depth knowledge of the know-how and investment of both much time and resources. JAMUNA TECH has both the know-how and a big umbrella upon its head to support its quality ventures.

Sustainable Support

Any quality software means flexibility and must be equipped with a rich design for change management. Requirements of present software users may change in course of time & will need to update the software. This is why, they need the software developer available to provide them with necessary modification support.

VISION CHARTER

- To provide customer satisfaction by exceeding expectation through state-of-the-art software of consistently high quality, unequalled training, and ongoing support.
- To compete nationwide and steadily increase customer base by reinvesting profits into marketing and R&D.
- To meet the changing demands of business processes by being in the forefront of technology, allowing business to compete with the highest current standards.
