

Company Profile

BRIEF OF COMPANY:

Foqas is founded to help improve the quality of education. We believe that education provides a fighting chance in life, but unfortunately not everyone gets the opportunity to access quality education. We realized, if we can solve the inequality in education, we can help address some of the major challenges in our society, such as poverty and homelessness. So with Foqas we set on a mission to help facilitate the transition to quality education for all. Our approach is to improve the quality of education with the use of technology and knowledge sharing. We developed multiple software solutions and frameworks to help students, teachers and school administrators effectively manage their classrooms and educational organizations.
