Agami Limited is a people-centric business platform that pledges to provide the best and uniform omnichannel services to upgrade the lifestyle of all walks of life across Bangladesh, irrespective of any difference among residents, through the convenience of digital technologies and best in class online-offline services.

We believe all the residents of this 147,570 square kilometers area deserve equal opportunity to access quality services irrespective of their locality, race, color, religion, or gender. People here deserve a chance to enjoy the convenience of megacities from even a small village within their capacity and within the fastest possible time. We want to reduce service inequality across the nation, educate people about the world-class lifestyle, and induce the behavioral shift with our expertise and competencies. With this agenda, we are working with our team and valuable partners to achieve our dream with integrity and genuineness using a B2B2C model to reach customers.

We, as a business, are here to ensure our profit through supporting society with our sustainable and people-centric business model. Keeping that in mind, Agami Limited started its business with an e-commerce platform, "SHOPOTH.COM" to serve everyone, even the rural part of the country, with faster delivery, uncompromised quality and unparalleled customer service experience. To support our business, we have our own e-commerce platform, intelligent integrated inventory management system and personal delivery management system as well.

We have strategic alliance with few of the top local and multinational companies and here a shared distribution model will ensure 500+ warehouses, 5000+ field forces, 3000+ logistics for our business usage across Bangladesh.
