Maestro Solutions Ltd. is a well known Software Company, founded in the year 2018 by a group of enthusiastic Engineers. Our products and services include Customized Software Solution. ITES and BPO. We were no 1 provider of IP Log Server and ISP Billing & ERP solution in Bangladesh.

Maestro is a rapidly growing Company providing affordable, reliable and user-friendly software solutions .We are specialized & experienced for customized business oriented Software applications. Our Products like Maxim (Complete Billing & ERP Solution For ISP) , IP Log server(Complete IP Log Solution For ISP that conforms to BTRC requirement) developed with the help of efficient and experienced minds to offer most user friendly solutions after discussion with thousands of related businessmen. In ISP industry we have more than 1000 clients who rely on our solutions.

Ever since its initiation, Maestro has transformed itself into a robust force of Software Solutions provider from Desktop to Distributed Applications, Windows Applications, web application and mobile app on all platforms.

Maestro started and is being driven by a group of software professionals and Engineers, committed to providing services of high quality, reliability and affordability, value-engineered and efficient solutions to all its clients.

Products and Services:

1. Maestro IP Log Server
2. maXim ISP Billing & ERP
3. Access Control, Attendance, HR & Payroll
4. SMS Gateway Service
5. Hotspot Billing and Management
6. Content Filtering and Parental Control

1. Maestro IP Log Server

Log Server for ISPs and Corporate Offices is required by Law Enforcing Authorities. Maestro Log Server is approved by Cyber Police Bureau. Our solution is simple, reliable and does not require additional hardware and save a lot of money by reducing log size with our proprietary log reducing technology. More than 450 ISPs are relying on Maestro IP Log Server.

Some Prime Features of Maestro IP LOG Server:

- 1) No additional hardware required except the Log Server.
- 2) Log can be collected only from remote and multiple routers.
- 3) Log stored with Domain name, Time, Source IP/Port, Dest IP/Port, NAT IP/Port, MAC, Username (for PPPoE and Hotspot).
- 4) Hard Disk requirement is reduced by using our "Log Reducing Technology".
- 5) Web based control panel for monitoring and log search/download.
- 6) Store all TCP log which is recommended by Cyber Police Bureau.
- 7) Smart Log Storage management which provide quick search result.
- 8) Daily auto backup to additional hard disk or remote server.
- 9) Background log download processing for long duration log search which usually timeout in web browser.
- 10) Dashboard show Disk usage, active user graph, log errors for monitoring.
- 11) Router list highlight which router is not syncing log for how long.

2. maXim ISP Billing & ERP

Internet Service Providers are playing a key role in transforming Bangladesh into Digital Bangladesh. Day by day ISPs network and customer base are increasing. They need smart solution to manage customer information, billing. Also during this age of digital payment, ISP need to integrate Online Payment System including Mobile Banking. Our solution provides all these features and additionally SMS gateway, Monitoring System, Accounting and Inventory, HR & Payroll modules are there for complete ISP Management.

Modules of ISP ERP:

- Prepaid Billing for Home/SOHO
- Corporate Customer Management & Invoicing
- Reseller Management
- SMS Gateway
- Payment Gateway
- Customer Portal
- Accounts & Cash
- Inventory
- HR, Payroll & Access Control
- Monitoring
- CRM/Ticketing

3. Access Control, Attendance, HR & Payroll

We provide access control solutions including tripod turnstile, flip door, biometric access control, face detection, vehicle access control and automatic barrier, visitor management etc.

4. SMS Gateway Service

Maestro is a SMS aggregator licensed from BTRC. The SMS gateway software is our own developed for sending promotional and transactional SMS. We also do target based SMS to subscribers in certain geographical areas. We have a secure API which can be added with any application or app for automatic SMS delivery.

M2M Technology offer	Main Feature Our SMS Services
✂ Transactional SMS	✂ User friendly interface
✂ Promotional SMS	✂ Ultimate support
✂ Priority OD	✂ 100 delivery
✂ Enterprise	✂ Long term validity
✂ Voice SMS	✂ Smart API Integration with Software

5. Hotspot Billing and Management:

Hotspot as a service is being popular nowadays, especially in rural areas and crowded spaces like the marketplace. Our solution makes it easy for service providers by enabling self registration with mobile OTP and online payment for hotspot data. Also ISPs can provide free hotspot service to restaurants, schools, food courts etc.

6. Filtering and Parental Control

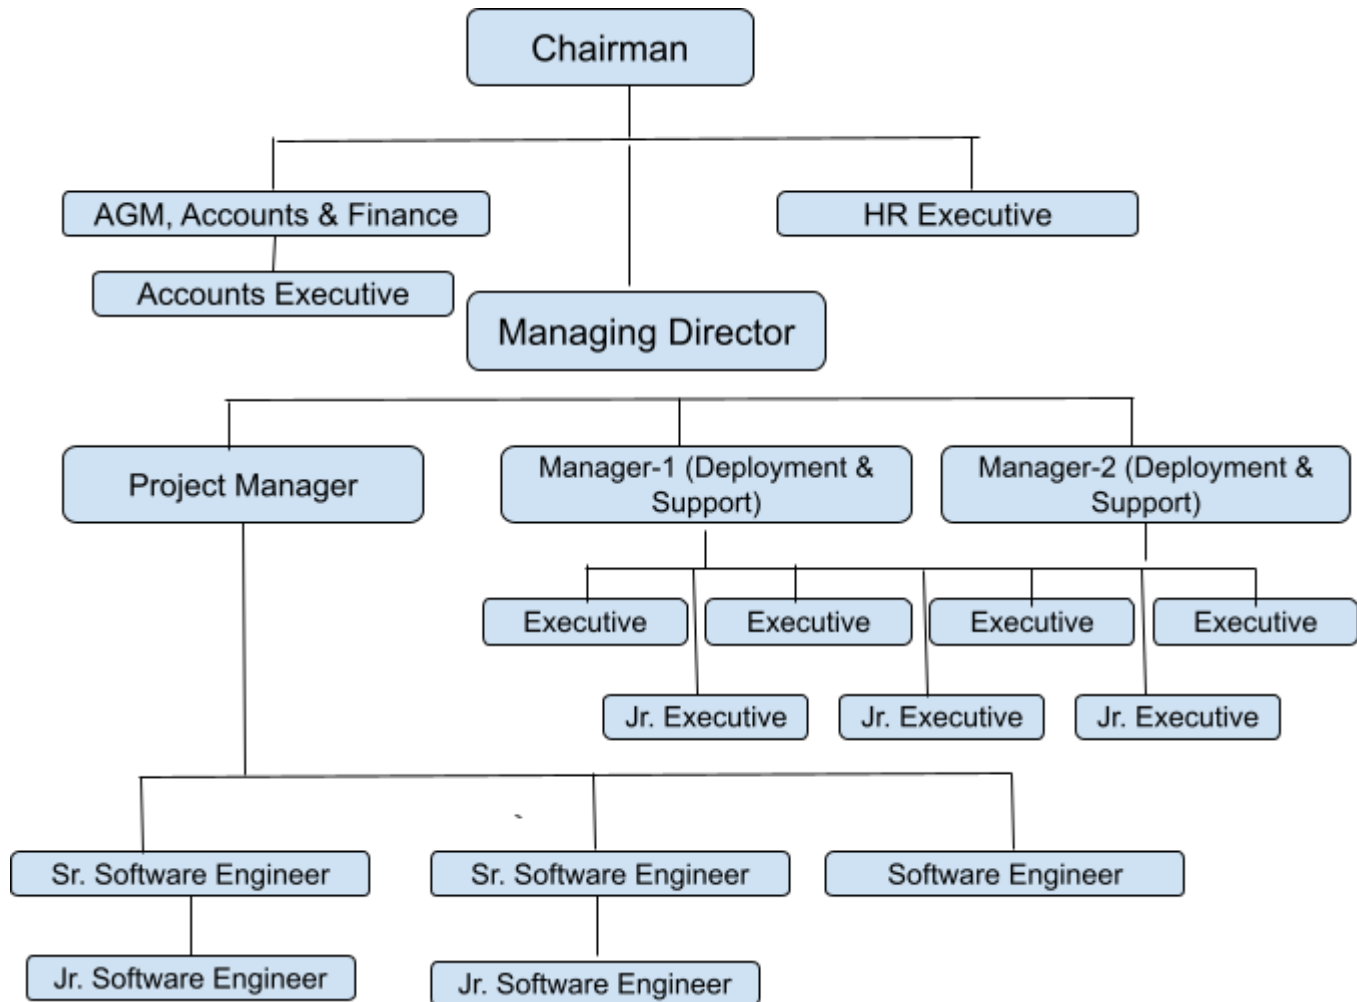

The Internet has become essential for today's life. Even students and children need internet access for online class and study materials. But unrestricted Internet can drive our children to the wrong path and can waste their time. Children become addicted to the internet if allowed for unlimited time.

Govt. of Bangladesh has instructed ISPs to implement PArental control system so that parents can control the internet by category, on/off internet time basis. Parents can also view reports of browsing history of their children.

Our solution will enable ISPs to provide this service to its subscribers easily. Also any parent can set up his own device for internet control for his home.

Company Organogram
