

CUSTOM WEB AND MOBILE APPLICATIONS DEVELOPMENT SHOP

Idlewild Digital - Our diverse team offers high level software development and simple websites as well as ongoing support and online marketing. We've developed very complex custom software as well as extremely cost effective websites. Communication and excellent results are obtained by first listening to the clients needs. Each and every client is extremely important to us as word of mouth is our primary source of business. Happy clients lead to introductions to new clients. We're eager to hear how we can be of service

TECHNOLOGIES

We use latest/cutting-edge technologies for rapid development and what brings great online business for our clients. Here are the list of technologies we use -

OUR BEST SERVICES

Our company delivers amazing software ready to launch. We are offering a broad range of out-of-the box solutions that can be customised and configured to match specific business needs

EDI DEVELOPMENT

EDI is a method of data transmission between business partners through computer-to-computer communication. As an alternative to postal mail, fax and email, EDI has been the preferred method of data communication for businesses since the 1970's. A major advantage of EDI vs other formats (such as a .csv file) are the EDI standards that ensure every data field is consistent.

ENTERPRISE RESOURCE PLANNING

ERP is the integrated management of main business processes, often in real time and mediated by software and technology.

The ERP system integrates varied organizational systems and facilitates error-free transactions and production, thereby enhancing the organization's efficiency. However, developing an ERP system differs from traditional system development

SOFTWARE DEVELOPMENT

Each solution is based on the needs of the client. Communication and planning are key.

We offer software development services to international customers across multiple industries. We understand the challenges that our customers face within and across these industries. We provide practical, pragmatic and powerful solutions to address those challenges.

Getting great software out to users is the single goal that drives us. Our mix of skills and talent means we have everything to meet that goal in one place. Design, development, testing, deployment, content and anything in between those clearly defined roles - we cover it all

DESIGN UI/UX

The design and the user experience can make or break you. We take the time to understand your goals and your customer's demands.

We offer design UI/UX services to international customers across multiple industries. We understand the challenges that our customers face within and across these industries. We provide practical, pragmatic and powerful solutions to address those challenges.

Design, development, testing, deployment, content and anything in between those clearly defined roles - we have got it all covered.

ENTERPRISE CONTENT MANAGEMENT

We provide enterprise content and documents management solution for all industries using cutting-edge technologies.

We offer enterprise content management services to international customers across multiple industries. We understand the challenges that our customers face within and across these industries. We provide practical, pragmatic and powerful solutions to address those challenges.

Getting great content management service out to users is the single goal that drives us. Our mix of skills and talent means we have everything to meet that goal in one place. Design, development, testing, deployment, content and anything in between those clearly defined roles - we cover it all.

SUPPORT

Cost effective and efficient. When we take on a new client we realize that a mutually beneficial long term relationship needs excellent support at a cost that's reasonable.

Our customers come in many shapes and sizes, in every sector from manufacturing to a small office.

We offer your business an unrivalled range of cost effective IT support services, specifically tailored to the needs of your business.
