Backdoor is a new information security company in the country's growing ICT sector formed with an objective to strengthen digital security in Bangladesh. It is operated by a promising team having expertise and skills in digital forensic, cybercrime investigation and protection of any systems.

Vision: Our Vision is to become a leader in global information security space.

OUR COMPLETED & UPCOMING PROJECTS

1. Backdoor starts journey with indigenously developed SHUROKKHA App for Bangladesh Police to protect women from harassment and other crimes.
2. Backdoor has set-up the first-ever Security Operation Center (SOC) in Bangladesh primarily to help banks protect their networks and secure transactions. The company is dreaming to expand this service to the country's largest corporate sector.
3. Backdoor has already prepared a training module under a project titled "Cyber Policing" to build capacity of law-enforcers in forensic investigation in all the 64 districts.
4. Backdoor recently submitted a proposal at ICT Division under which university students and teachers will be given training on cyber security. The proposal is under consideration.
5. Currently, Backdoor is planning to set up a digital forensic lab and a training center to create experts in digital forensic investigation.
