

We help organization understand
and solve complex problems through
People, Process and Technology

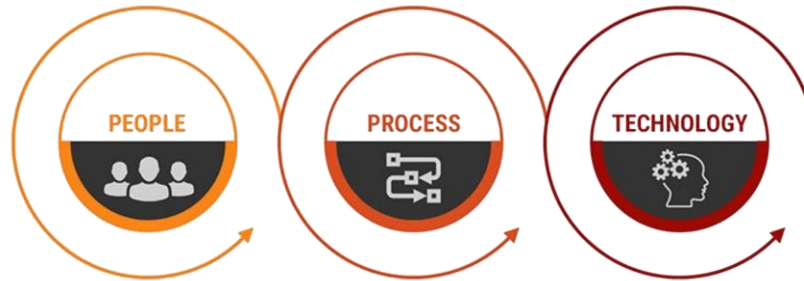

Welcome to Azifa ICT

We put together for our clients nearly 20 years of experience, managing high-volume projects, along with tools and cutting-edge technology to deliver the best in its category.

We RELY on human intelligence. Artificial intelligence is a logical sequence only. We provide expertise and skills to help companies solve business inefficiencies and identify business opportunities. If a process or technology is not working smoothly, we go into the business and dig deep to get to the bottom of the problem. We then propose a suitable INNOVATIVE solution or solutions, whether it's changing an IT system, the way business processes work or even the work that people do. We believe INNOVATION is the only way to WIN.

ABOUT | US

We follow the Proactive Approach to Transform Your Organization with
People, Process & Technology

An effective plan requires a partner who brings together people, process, and technology to help you implement and manage the challenges of business development process.

People

With the cost of keeping an existing customer a fraction of the cost of acquiring a new one, AZIFA ICT understands that people must be a critical part of the equation. We not only bring expertise and assistance through our team, we focus on helping your team reach best-in-class standards and become more confident in their efforts and in the service, they deliver to your clients.

Process

Facing the challenge of keeping up with changes across the Industry, many firms find that what has worked in the past may now be a manual, disconnected, and unscalable arrangement. AZIFA ICT works alongside our clients to help implement improvements and build sound governance procedures that can help lead your organization to better, more adaptable standards.

Technology

Many firms still manually track dormancy periods and deadlines, or they continue to operate with physical documents. AZIFA ICT has a state-of-the-art software solution that automates the entire reporting chain from creation to delivery. We are focused on data security and have strong protections in place to help ensure confidentiality of information.
