Convergence Tech (BD) is the pioneer Information Technology company registered in Bangladesh. Convergence Tech helps organizations from project initiation through execution and capability building. Our experienced team work hand-in-hand with you to ensure quick ramp ups, on-time delivery, and sustainable change. We deliver end to end industry solutions for power and utility, FSI, Public sector, Media & Communications and Manufacturing. We aim to bring value for the customer. Our core philosophy- adhere to the highest professional standards, improve our clients' performance significantly, and create an unrivaled environment for exceptional people.

WHO WE ARE

We help you generate the energy, speed, and direction your organization needs to break free from the forces holding you back. When we work with clients to create sustained improvement through a transformation, we apply a process that we call an execution assessment. This is a turnkey approach to measuring their capabilities against ten essential best practices that will drive a successful transformation. We believe in consultative approach with the customer at the beginning of a transformation, when we're conducting an independent diligence review of the entire enterprise, we interview individuals throughout the organization, observe operations, and survey people close to the transformation. This allows us from day one to start a conversation about what they need to do to make sure their transformation has a sustained impact.

WE ARE SPECIALIZED IN DATA CENTER SOLUTIONS

Real-time access to secure and reliable data is crucial in today's competitive global business environment. We provide cloud base, software defined data center solutions. We help customer to keep pace with accelerating business demands for more storage and compute resources to take full advantage of new technologies designed to improve infrastructure performance, scale and economics.

We are experienced in converged server technologies. We have been providing new server technologies like Oracle Database Appliances (ODA), Oracle Private Cloud Appliances (PCA), Cisco Hyper Converged Infrastructure, Huawei Kunlun Mission Critical Server, Huawei Fusion Cube Hyper Converged Server Technologies.

Enterprise data centers are doing more than ever, from ever-expanding storage management to bandwidth-intensive virtualized and cloud applications. With Convergence Tech infrastructure solutions, your data center is ready for all this and more.
