GOOD DAY DEAR PARTNERS,

Thank you for your interest in Nazihar IT.

We are living in the era of Information Technology. There is no need to describe the importance and significance of the wide-spread use of software systems. There is always a demand for custom software as each business has its own requirement. There are many teams and companies out there to fulfill the software requirements. I must say there are numerous teams who are doing this with the utmost excellence. However, there are many reasons for which all the teams are not successful. In short, I would like to emphasize some of the reasons. Firstly, the ideas and principles of software engineering are not implemented everywhere. For the changing nature of requirements and complexity of enterprise applications, we must consider good adaptability. Agile, specially scrum is used as the industry standard for the software development process which gives us adaptability, better communication with the client, transparency on the development and much more. The second most distressing issue is improper architecture, sub-standard design and non-professional coding, resulting in many scalability, performance and security issues.

We are keen in these issues at Nazihar IT. We have defined our development standards for project management, methodologies, project templates for different requirements, reusable libraries, coding and naming standards according to industry standards and best practices. It also enables us to efficiently use of resource resulting low development cost.

This is the way how we produce creative, effective and cost-effective customized solutions for you, and measure our success by your success, you are our partners, we are sharing success together.

Best regards.

Zillur Rahman

Zillur Rahman

Managing Director of the Nazihar IT

WE PRODUCE CREATIVE, EFFECTIVE AND COST-EFFECTIVE CUSTOMIZED SOLUTIONS FOR YOU, AND MEASURE OUR SUCCESS BY YOUR SUCCESS, YOU ARE OUR PARTNERS, WE ARE SHARING SUCCESS TOGETHER.

Message From Managing Director

Zillur Rahman, Managing Director of the Company born in well-known business family in Noakhali, Bangladesh. After completing his Graduation, he engages himself in business. He became a successful business man in short time of his business career with his sincerity, honesty, conceptual and practical problem solving minded. He has started his carrier as an entrepreneur of Nazihar Fashion Ltd since 1994. He is also the Managing Director of Hemtech Apparels Ltd, Jamanah Ltd and other allied industries.

During his tenor of business career, he gained business knowledge in textiles and readymade garments industries. He is highly expert in business development, strategic management & strategic decision-making activities. He has keen knowledge in SWOT analysis, Risk analysis, Feasibility studies, Industrial labor management, Inventory management, Corporate management, Modern concept for proper decision making and all other vast knowledge to run an industrial group smoothly and successfully. He traveled various countries of the world for business development of the group.

Mr Rahman has bagged to his credit a vast experience and knowledge in Modern Methods, Technology, Production and Marketing & Management techniques of readymade garments and IT industries by attaching several courses/seminars and visiting similar industrial concerns of other countries. Having rich experience in various industrial/trading concerns Mr. Rahamn has acquired the required experience, fitness and administrative efficiency to run such a business unit.

A successful business operations and management Executive, experienced in building high-performance executive teams and leading sophisticated manufacturing, financial and service organizations. A strategic visionary with a clear sense of purpose and urgency when faced with diverse situational challenges during periods of both declining trends, he has managed and lead large teams of professionals and companies with great and rewarding achievements.

OUR STORY

Nazihar IT Solution Limited is a sister concern of Nazihar Group. Nazihar IT Solution Limited derived from Nazihar Sourcing Limited. Nazihar IT started its journey in 2019 with an ambition to build a software team which will provide software services using cutting edge technologies ensuring quality and reliability. We were already working to define our standards and be proficient in the industry best practices.

Nazihar IT started with two projects in hand. The both projects initiated from repeat customers who previously worked with us in projects initiated from freelancer sites. Those two were very successful projects and we were hired for several other projects from the same. The projects were enterprise applications in different domains and platforms including web, desktop and the combinations.

Nazihar IT was also providing mobile and tablet solution. In the later years, we worked on more projects for other customer as well as for the two from very beginning. We did not look for new projects in the

freelancer sites as we already had enough work to do. We also started building ERP. This is still under development and a release is planned by the end of 2020.

Currently, we have formed a new team for development dedicated for projects in freelancer sites. We will be looking for new projects having fair budget and long term relationship with the companies.

We have also started IT training wing with an objective to train in a way which will make the participants versed and capable to develop software in commercial environment, rather making just a coder. We also found a knowledge gap in the freshers joining industries from the recruitment experience of a decade. We decided to develop an industry readiness program to train various industries aspects, standards, design patterns, processes etc. We are jointly working with the Universities to start seminars on Industry Readiness Program.

An idea in the moment has sparked a global movement. And we're just getting started.

IN EACH STEP OF DEVELOPMENT, WE USE CREATIVE IDEAS, CUTTING-EDGE TECHNOLOGIES AND PROVEN METHODOLOGIES. IT IS REST ASSURED THAT THE SOFTWARE WILL BE TOP-RATED AND MOST USER-FRIENDLY.

ABOUT US

Nazihar IT Solution Limited is a sister concern of Nazihar Group. Nazihar IT Solution Limited derived from Nazihar Sourcing Limited.

Nazihar sourcing commenced business operational procedure of IT under Nazihar sourcing limited an entity which is registered in UK. Since then onward Nazihar Sourcing enacted the IT niche in Bangladesh and overseas.

Nazihar Sourcing Limited led to the emanation of Nazihar IT Solution Limited in 2019 after becoming the Implementation Partner of Global fintech giant Temenos Core Banking Software Solution provider whilst the former became the CBS Solution provider to Janata Bank Limited. Since its foray Nazihar IT Solution Limited is delving to embark on to provide solution to other financial institutions and diversify its IT business to provide software solution and sustainable technological support to other public and private organizations and enterprises of the country.

WHO WE ARE

Our software team is specialized in producing software to assist you to operate your entire industry smoothly.

Our development team consists of experienced and qualified system analysts, application developers, solution developers, database administrators, programmers and testers. Almost all of them are certified professionals in their respected areas including MCAD, MCSO, MCDBA, OCP etc. In each step of development, we use creative ideas, cutting-edge technologies and proven methodologies. It is rest assured that the software will be top-rated and most user-friendly.

WHAT WE DO

- Software Development
- Web Application Development
- Mobile App Development
- Database Development
- IT Training
- Project planning and Management
- Embedded/IOT Solutions
- Automated Testing
- Manual Testing
- Technology Consultancy
- Prototyping and R&D
- Product Maintenance

OUR VALUES

- Quality
- Creativity
- Technology
- Innovation
- Customer Satisfaction

**Project
success rate is
100%**

**OUR MISSION
IS TO BUILD A
TRUSTWORTHY AND
PROFITABLE GLOBAL IT
SERVICE PROVIDER DEVELOPING
THE NEXT GENERATION OF
COMPLEX SOFTWARE-
INTENSIVE SYSTEMS FOR
OUR CUSTOMERS.**

KEY FACTORS

Processes, tools, technologies expert
Active customer participation
Respondent to changes
No compromization in quality. Close
collaboration & transparency
Robust development cycle ensuring
budgets and timelines

EXTENSIBLE

The developed system fully satisfies
customer requirements. We develop
the system using loose coupled mod-
ules which enable us to adapt to the
change faster. It gives us wide set of
abilities for broadening the system
functions in the future.

MARKET FOCUSED

Starting from planning to its entire
operations, our software will
successfully lead you to your
ultimate objective. While developing
software products we use modern,
well, and proven processes and
technologies in practice.

SERVICES

Nazihar IT is a competent provider of any kind of software solutions including mission critical business applications, complex engineering software, data centric analytical software, smart device solutions, web solutions and so on. Our expertise lies in clearly perceiving the business goals of our customers, choosing the most appropriate technologies and efficiently developing solutions catered to the business needs.

SOFTWARE Development

Nazihar IT is an experienced software development firm providing offshore software development services. Our cost-effective solutions are built specifically for organizations by utilizing an intimate understanding of their business and industry landscape. We offer rich, user friendly and robust applications in combination with any modern database system. The application can be totally standalone running in a single machine, network solutions or internet connected application.

Services include:

- ~ Enterprise Applications
- ~ Desktop Applications
- ~ Web Application
- ~ API and Add-ins
- ~ Software Maintenance
- ~ Software Re-engineering

DATABASE Development

We offer different types of database development services from design to reporting. Nazihar IT is experienced in standard database technologies like Oracle, Microsoft SQL Server, MySQL, PostgreSQL and different Big Data and Cloud database systems. We maintain best practices in planning, development, maintenance and security including ongoing monitoring and automation when need.

Services are:

- ~ Database Design
- ~ Database Development
- ~ Database Integration
- ~ Database Performance Tuning
- ~ Data Warehouse
- ~ Database Analysis & Reporting
- ~ Data Security
- ~ Database Migration

SOFTWARE TESTING

Nazihar IT owe it to ourselves and to our clients to deliver the best application it can by providing Software Quality Assurance. We offer different types of software testing services from test case design to test report generation. Nazihar IT is experienced in Functional and nonfunctional testing. We maintain best practices in test planning, test case design, test environment creation, test case execution, bug reporting process, and finally test report generation.

Services are:

- ~ Black box and White box Test
- ~ Integration Test
- ~ Regression Test
- ~ Performance Test
- ~ Compatibility Test
- ~ Data and UI Security Test
- ~ Load Test

MOBILE APP DEVELOPMENT

Our team of experienced mobile apps developers and designers can build an app that will live up to your vision enabling you to leverage mobility to maximize productivity. Nazihar IT is developing business critical solutions for mobile devices for Android, iPhone, Windows Phone and BlackBerry giving you and your team more flexibility when you are moving. Nazihar IT team is experienced in developing mobile application since 2004 using old timer PDA, Pocket PC and Java enabled phones.

Platforms.

- ~ Android
- ~ iOS
- ~ Windows Mobile

TECHNOLOGY CONSULTANCY

Nazihar IT provides high-end and mission critical enterprise solutions meeting all your requirements to achieve your ultimate business goal. We offer consultancy services that span the entire IT lifecycle, from business process reengineering to software system design, development and implementation. Our consultancy services are tailored to satisfy your business requirements with the help of our individual and combined experience in design, implementation, and management of IT and communication systems around the world.

Consultancy Areas

- ~ Enterprise Solutions
- ~ Application Development Services
- ~ Mobile Development Services
- ~ Software Application Testing Services
- ~ Technical and Management Training
- ~ Project Management

IT TRAINING

Nazihar IT offers high-end professional trainings on cutting edge technologies. The trainings are designed and delivered by the industry experts who have expertise in the respective fields. Our basic goal of providing IT training to train professionals who will not only gain the technical skill but also achieve the working capabilities with the best tools and practices of the industry. We offer training on Programming, Test Automation, Project Management, Engineering Drawing and leading ERP Applications like SAP and Sage ERP.

Training Areas

- ~ .Net Programming
- ~ Java Programming
- ~ Database
- ~ Software Quality Assurance
- ~ Project Management
- ~ CAD
- ~ SAP

We promise only what we can deliver. Then deliver more than what we promise.

HOW WE WORK

We follow Agile Methodology specifically Scrum framework for software development. We have adopted Test Driven Development and Continuous Integration among the different agile practices.

01

PRODUCT BACKLOG CREATION

Before any project work begins. we need to create a product backlog. It replaces the traditional requirements specification artifacts. This is essentially a list of the goals that need to be achieved in order to create a finished product. These are the list of epic or stories listed in order of priority. We conduct backlog refinement sessions to ensure that it contains the appropriate items, are prioritized, and that the items at the top are ready for delivery.

02

SPRINT PLANNING - SPRINT BACKLOG CREATION

Sprint is an iteration, a time boxed effort in which we produce a specified working software. During a sprint planning session, we set a sprint goal and create a sprint backlog from the product backlog. Sprint planning is a collaborative effort involving the Development Team, Scrum Master and the Product Owner to clarify the de- tails of the user stories and their respective acceptance criteria.

03

SPRINT PLANNING - TASKS DENOMINATION

In the second part of Sprint planning session we break down the stories in sprint backlog into tasks which can be tracked easily. The tasks are then checked for dependencies and the required time is estimated. We may also update the sprint back- log as more details are visible at this point. After that, we update the scrum board with stories in story to do section and tasks in the task to do section. The scrum board is used and updated during the whole sprint.

04

WORKING ON THE SPRINT

This is time where the actual coding, testing, UI designing, technical write- ups etc. are performed. We stand for 5- minutes daily scrum meetings to sync everyone with the latest development, improve communications, eliminate other meetings and identify impediments to development for removal, highlight and promote quick decision-making. We track our development work in the sprint board, remaining hours are plotted in a burndown chart.

05

TESTING AND DEBUGGING

This is not a **separate** phase at the end of coding as done typically, rather it is done inside the sprint. When the stories are ready for review, they are tested according to the acceptance criteria of the stories. The bug is fixed and retested if required. We perform the Integration and regression testing when all stories in the sprint are done. It ensure that the deliverable or increment is in working condition and ready.

06

SPRINT REVIEW, RETROSPECTIVE

At the end of the sprint, we hold a sprint review session where every- one is involved. In the session, the work is demonstrated. We also plan for any changes that need to be done according to feedback.
We hold a sprint retrospective session after the sprint is concluded to see what went well, what went wrong and what can be improved in the process. It enables us to continuous- ly evolve and improve.

WORK PROCESS

We believe in constant innovation and improvements. The Agile methodology emphasizes communication and collaboration. Our team is flexible to adapt to the emerging business realities. It helps us to successfully manage and accomplish the goals of our customers projects worldwide.

KEY AGILE BENEFITS

- Increased collaboration
- Early & predictable delivery
- Improved quality
- Adaptable to change
- Better visibility to risk
- Increase project control

BUSINESS TEAM

our MD is responsible to manage the business team. He is also plays role of both Software Architect and Business Analyst at our end. He is the primary point of contact at our end for both business and technical issues.

DEVELOPMENT TEAM

Development team are cross functional and formed with members from different special- ties as needed. In cases when customers are not available for the role of a product owner in agile environment, our team does all needful communications with them and acts a PO.
