ABOUT DESHCYBER

Desh Cyber is a USA based Cyber Security business, has become internationally recognized as a trusted partner and industry expert for the delivery of Cyber Security, Cloud Security, and Managed Security services and solutions to meet the needs of their clients.

As industry experts, we are revolutionizing the industry with our cybersecurity services and solutions. We understand the security challenges that you face in your business. The ever-evolving cybersecurity landscape is continuously changing, and it is impossible to stay up to date with these changes. Our team stays abreast of the cybersecurity landscape so that we can provide the best and latest services and solutions to help your business overcome these challenges.

We have the experience of delivering projects for a variety of industries: Telecom, Healthcare, Financials, and many more industries.

Our team has the credentials, skills, experience, and understanding of how to analyze your current cybersecurity state, the processes/tools utilized, and a roadmap/framework to handle cybersecurity threats. Not only do we architect your solution, but we implement it from the ground up. We give you the visibility to monitor your risks and be proactive in security concerns so that you can prevent cyber-attacks. Our services and solutions will secure your environment from the ground up and guide you to understand/monitor it from the top-down, thus allowing for the just in time decision making to protect your environment.

DESHCYBER VISION, MISSION AND VALUES

CORE VALUES

As a company and as individuals we value above all else honesty, integrity, transparency, responsibility, professionalism and mutual respect. We hold ourselves accountable to our clients, employees, shareholders and partners by honouring our commitments, providing results and continually striving to provide the highest quality cyber security services and solutions.

VISION STATEMENT

Our clients are our highest priority. Our VISION is our commitment to the ongoing improvement of the services and solutions we provide to our clients so that we can exceed their expectations. Our commitment and investment in our employees, we can commit to the delivery of high standards and customer service.

MISSION STATEMENT

Our MISSION is a testament to our core values: We help our clients by providing protection and security solutions through introducing actionable security programs giving our clients' peace of mind knowing that their systems are secure.

OUR OBJECTIVES

At Desh Cyber, we have set ourselves strategic objectives that will deliver us with long-term sustainability as a business and remain a strong force in the industry.

- To stay abreast with the cybersecurity challenges so that we can deliver services and solutions to meet these challenges.
- To consistently make a profit so that we can reward our employees and shareholders fairly.
- To increase shareholder value in the business.

WHAT MAKES
DESH CYBER DIFFERENT

The cybersecurity industry is a harsh environment. With more and more competitors entering the market, constant improvements and technological changes, it is now very difficult to stand out. We believe that there are many reasons why we are different from our competitors.

1.

SUPERIOR SERVICES AND SOLUTIONS

We offer a complete solution in a box to meet our clients' needs that is unmatched to our competitors. Our range of services and solutions provide protection and security solutions giving our clients' peace of mind knowing that their systems are secure. We want our clients to know they can rely on us to support and service their cybersecurity needs.

2.

SUPPORT

We take customer support very seriously. Our support team are available 24/7 to answer your questions. We can easily be reached by contacting our emergency telephone number on 8801312 55 33 74. When you have questions or comments, don't hesitate to contact us!

3.

ACCOUNTABILITY

We hold ourselves accountable for every action and transaction that occurs with clients, employees, shareholders and partners by working diligently and honestly. We will honour our commitments, providing results and continually striving to provide the highest quality cyber security services and solutions.

4.

OUR EMPLOYEES

The strength of Desh Cyber is the quality of the employees. Whether it is the management, the engineers, the marketing team, the finance or the customer support, Desh Cyber is the product of a hard-working team dedicated to your success. Valuing and supporting every employee as an individual while helping them reach their full potential is critical to attracting and developing our greatest strength – our people.

OUR
PARTNERS

We have strong relationships with many trusted global partners. These relationships enable us to use the latest technologies to provide you with the best solutions for your business. Here are some of our trusted partners.

WHAT OUR
CLIENTS ARE SAYING!

We have one client Islamic Bank we have provided Security services add some industry specific feedback how customer feedback looks like. we will show it customer who will be validate for us.
"Desh Cyber is knowledgeable and easy to work with. They took the time to understand our processes and provide recommendations that make us a stronger organization. We are comfortable with their audit process"

- **Taher Chowdhury**, Islami Bank Limited

"We are very happy with our relationship with Desh Cyber and the performance of Security advise. With their help, expanding our Risk Assessment, Vendor Management, and Information Security projects was easy yet thorough. Desh Cyber is extremely helpful and always there with a quick, accurate answer. They are very responsive to requests for new or expanded features and modules. We look forward to working with Desh Cyber Limited."

Azad, Eastern Standard Bank Limited

MANAGED SECURITY SERVICE PROVIDER (MSSP) SERVICES AND SOLUTIONS

Cyber security is transverse to all major digital transformation projects of companies. Cloud, IaaS, mobility, analytics: Supporting your projects with cyber security solutions is not only mandatory but can also give the company serious competitive advantages.

As a managed security service provider (MSSP), we provide a range of services and solutions that will protect every bit. We will provide cybersecurity solutions, continuous security monitoring, vulnerability risk assessment, threat intelligence and intrusion management. We can manage all or part of your IT security functions. Our range of MSSP services and solutions cover IT Security Architecture services, IT Audit, DLP, Penetration Testing, Security Audit & Compliance Advisory and PCI compliance that are based upon the principles of the cybersecurity framework.

Our team has the credentials and experience delivering projects for a variety of industries: Telecom, Healthcare, Financial and many more industries.

SECURITY SERVICES

SECURITY INFORMATION AND EVENT MANAGEMENT (SIEM)

Proper System Information and Event management (SIEM) is the key to maintain good cyber defence. This system store interpretation of logs into a central repository for trend analysis purposes. Which allows real-time analysis and security personnel can take defensive action more quickly.

Opting for a co-managed SIEM service has several benefits as opposed to going it alone or hiring third-party services. The following are some of the advantages you get when you share your SIEM task with us:

- Reduced workload,
- Professional training,
- Accurate analysis and response

SECURITY ARCHITECT

Desh Cyber security can help you to design an effective, operative, and comprehensive framework for your organization to achieve your security goals. We understand that the issue has to be looked with a holistic approach; factoring in evolving complex infrastructure, emerging legislative regulations, and evolving cyber security threats. Talk to us for more information.

NEXT GENERATION SECURITY OPERATIONS CENTER (SOC)

A Security Operation Center (SOC) is a centralized location where an information security team monitors, detect, analyze and respond to cyber-security incidents, generally on 24/7/365 day. Our security analysts and engineers oversee all of your activities on your servers, database, network, application, endpoint devices, websites, other critical applications thus giving you more time in your business whilst lowering your operational costs.

We identify threats and analyze them, investigate the source of threats on any vulnerabilities discovered and prevent a similar occurrence in the future as well, and we deal with security problems in real-time as well as continually seeking ways to improve the organization's security posture.

MANAGED SECURITY SERVICES

Security is paramount to your business and Desh Cyber are best at managing all of your IT security needs. Our fully managed security services are monitored and administered 24/7, 365 days a year. We will protect all of your devices and data using the latest technology available. We prevent your IT systems from being threatened by hackers by using cyber threat intelligence which detects and automatically responds to any threats immediately.

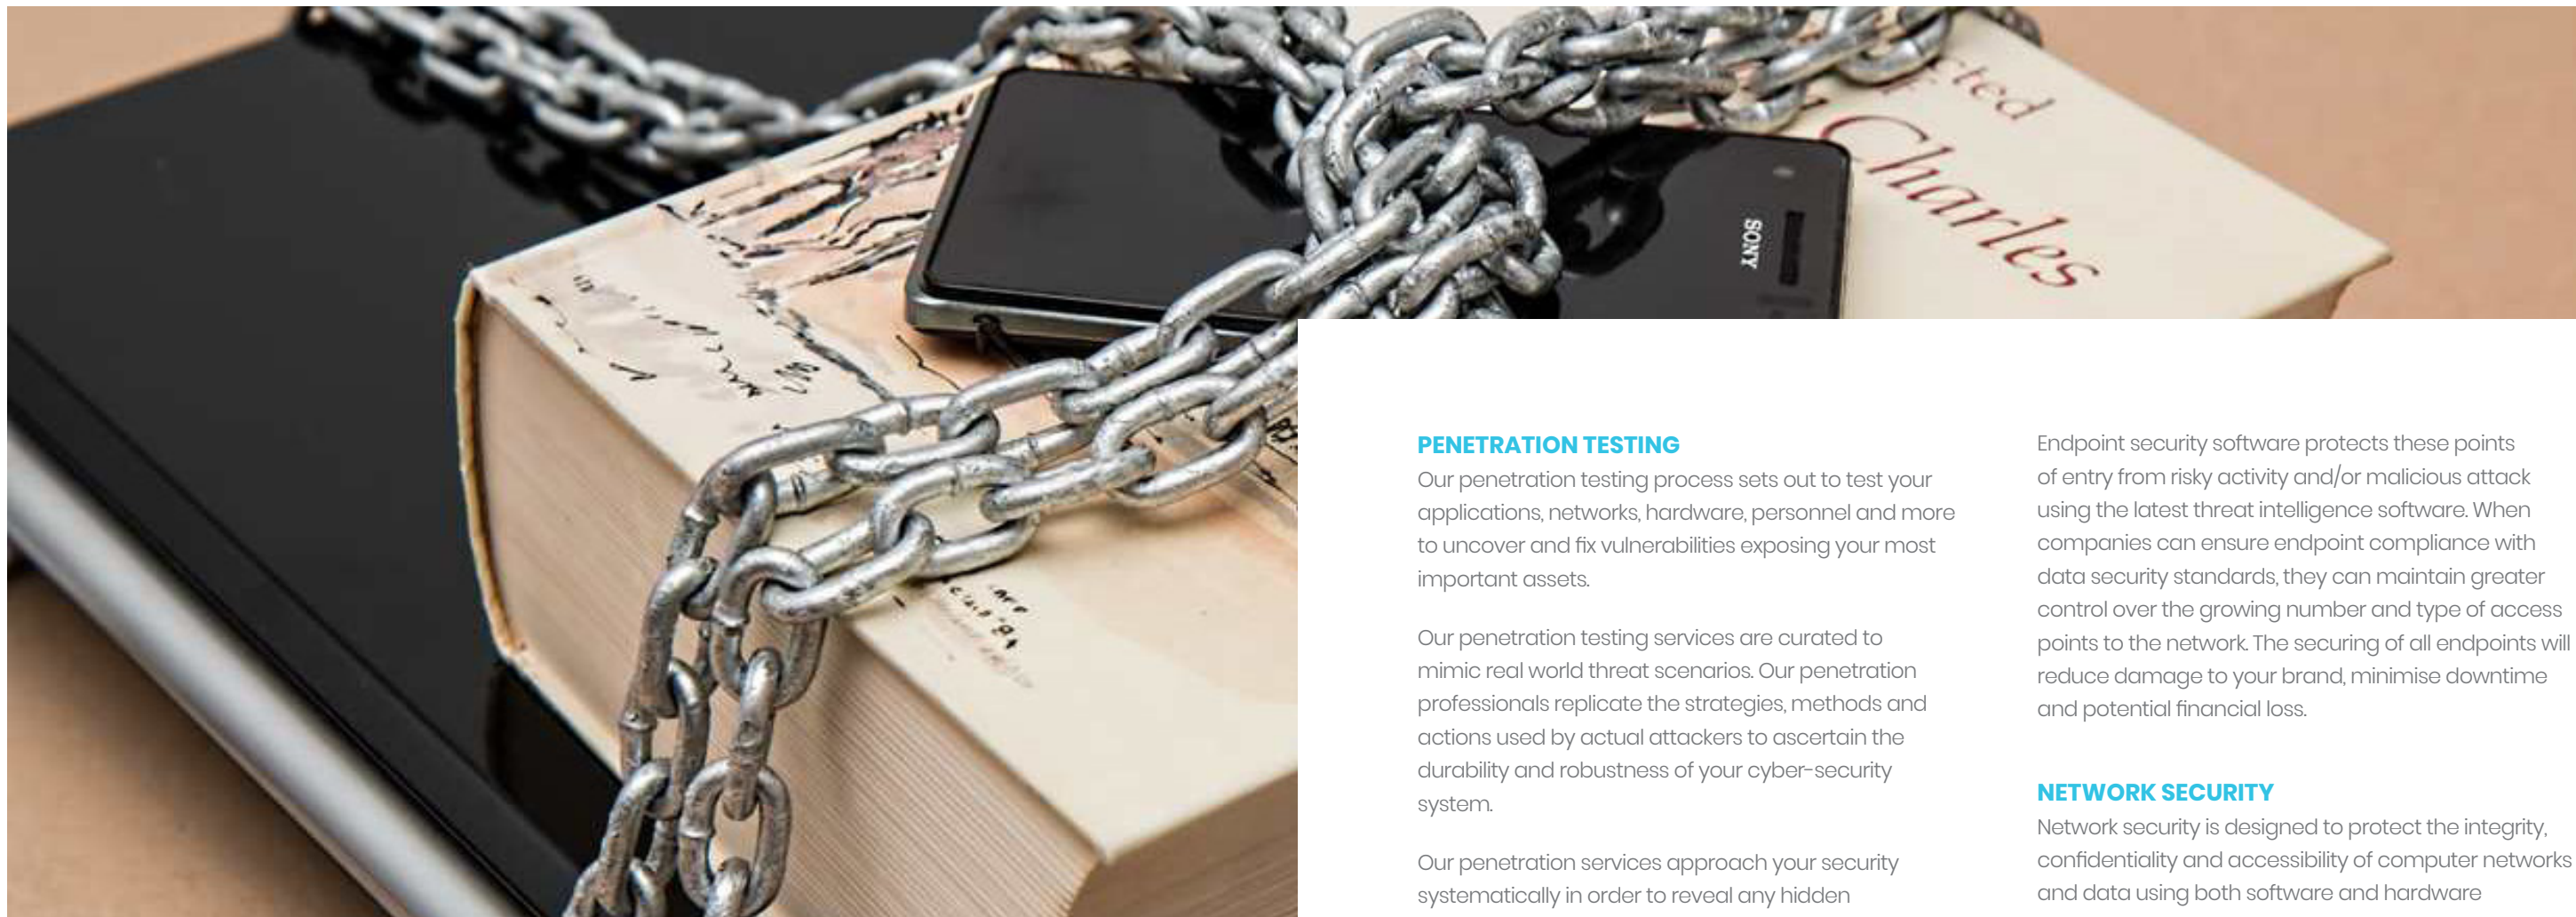

Our managed security services will allow you to expand your business operations and you will enjoy peace of mind knowing that our managed security service will grow with you.

THREAT INTELLIGENCE SERVICES

Our Threat Intelligence Services will outsmart cyber attackers trying to gain access across most technology and environment. Our intelligence searches and identifies your systems for vulnerabilities to threats. Our service will highlight to you where you may be most vulnerable for a threat attack and provide you with the service to minimize these vulnerabilities.

ADVERSARIAL SECURITY TESTING

Our Adversarial Security Testing service identifies any gaps that may exist in your security defences and response capabilities. We will provide the solutions to remedy any gaps that have been identified. Our testing will advise you of any gaps plus the action that is recommended to enhance your security. By remedying these gaps, you will remain compliant with the necessary laws that are applicable.

SECURITY SOLUTIONS

ACTIVE DIRECTORY SECURITY ASSESSMENT

The Active Directory Security assessment is designed to provide you specific actionable guidance to mitigate security risks to your Active Directory and your organization. This solution also provides you with status on your progress relative to Microsoft's recommended roadmap for Securing Privilege Access (SPA), of which Active Directory is a critical component. The assessment covers many areas including:

- Review of operational processes
- Review of the privileged accounts/groups membership as well as regular account hygiene
- Review of the forest and domain trusts
- Review operating system configuration, security patch, and update levels
- Review of domain and domain controller configuration compared to Microsoft recommended guidance
- Review of key Active Directory object permission delegation

PENETRATION TESTING

Our penetration testing process sets out to test your applications, networks, hardware, personnel and more to uncover and fix vulnerabilities exposing your most important assets.

Our penetration testing services are curated to mimic real world threat scenarios. Our penetration professionals replicate the strategies, methods and actions used by actual attackers to ascertain the durability and robustness of your cyber-security system.

Our penetration services approach your security systematically in order to reveal any hidden weaknesses. Our approach to developing the security of your defences works as per the following steps:

- Information Analysis
- Susceptibility Analysis
- Result Assessment

CLOUD SECURITY

Migrating to the cloud comes with new risks and you should be ready for these risks. We can help you with end-to-end security protection in the cloud for all data or transactions. We offer a range of services that will help you when you move to the cloud including vulnerability management, consulting, security testing, security monitoring plus incident response.

ENDPOINT SECURITY

Endpoint security refers to securing endpoints, or end-user devices like desktops, laptops, and mobile devices. Endpoints serve as points of access to an enterprise network and create points of entry that can be exploited by malicious actors.

Endpoint security software protects these points of entry from risky activity and/or malicious attack using the latest threat intelligence software. When companies can ensure endpoint compliance with data security standards, they can maintain greater control over the growing number and type of access points to the network. The securing of all endpoints will reduce damage to your brand, minimise downtime and potential financial loss.

NETWORK SECURITY

Network security is designed to protect the integrity, confidentiality and accessibility of computer networks and data using both software and hardware technologies. Today's network architecture is complex and is faced with a threat environment that is always changing and attackers that are always trying to find and exploit vulnerabilities. We offer a full suite of protective services that will defend your firewall and server and all devices across your network.

VULNERABILITY MANAGEMENT SERVICE

Vulnerability Management as a service is a managed solution to simplify your security and compliance. Our managed service offers complete visibility of vulnerabilities in your applications and network, prioritised to-do lists that you can put to action straight away and scalable service structure that adapts to changes in your environment.

AUDIT & COMPLIANCE SOLUTIONS

We offer a suite of audit and compliance services which compliment our services and solutions.

SWIFT CUSTOMER SECURITY PROGRAM

We are committed to playing an important role in reinforcing and safeguarding the security of the wider ecosystem. Our Customer Security Programme provides a customer security control framework that improves the sharing of information throughout our communities.

The Customer Security Programme operates on three elements. The first element is that our customers will need to protect and secure their own local environment. The second element is that we help with the prevention and detection of fraud in your business relationships and transactions. The final element is the continuous sharing of information with the community.

DOCUMENT LIBRARY

Our Document Library provides a reliable source of information, tools, support resources to help organizations ensure the safe handling of their data.

PCI DSS CERTIFICATION

Our PCI audit team of Qualified Security Assessors are ready to help you achieve compliance and certification for PCI DSS. Our PCI Audit Team will assess your internal quality assurance procedures both on and offsite. If we are satisfied with the outcome, you will be issued with a Report on Compliance (ROC) and appropriate certification documentation.

If the outcome is not satisfactory, we will provide a remediation report that outlines the areas of non-compliance. You will be given a chance to rectify the areas of non-compliance so that we can verify and issue our Report on Compliance. After receiving compliance and certification, there will be ongoing checks to verify that your business remains compliant.

ISO 2700 STANDARD COMPLIANCE

Using this standard will help your organization manage the security of assets such as financial information, intellectual property, employee details or information entrusted to you by third parties. We offer professional advice on this standard and will assist you with remaining compliant with the requirements of this standard.

CERTIFICATION

Our team members have achieved the top certifications in the industry. Here is a brief outline of the certifications for each team member.

- Harun Roshid has gained the Cyber Security Certificate- CISA, CISM
- Shahin Kamruzzaman is highly qualified with many industry leading certificates including the Certified Information Systems Security Professional (CISSP).

Each team member continues to undertake further training supported by the company so that they are abreast with the latest technology that is available in the market.

If you are looking to bolster your cybersecurity defences, do not leave it until it is too late.

We can help you to adopt the best possible approach and help you in your choice of services and solutions that best fits your cybersecurity needs.
