INTRODUCTION

The modern age is an age of automated job work and information technology where computers are playing a vital role. This is because computers nature of versatility and adaptiveness. It is possible to maintain a complete office with a single computer equipped with the appropriate software and associates. As a result computers are making our job faster & more efficient, while maintaining accuracy in a productive and competitive atmosphere. So Companies which are not yet using computer and appropriate customized software are really in a difficult situation.

Thus the Computer Technology in today's world has changed the way of thinking in business task performing, data handling and works accomplishment. System Netware aims at helping the business people with the computer application and software development catering the need of individuals, companies and business firms. We believe that the change is inevitable and we must be prepared for it. The term "Efficiency" now stands for use of computer applications and software for the business task performance. We the people of System Netware Vow to bring the best of computer technology for the benefit of our client and associates. We have a group of dedicated computer professionals and an expert who easily understand the business of our client and can give solution that is viable both technically and financially. The Teamwork is the main strength of our firm and we always try to keep a high morale in our personnel and staffs to give the highest level of services to our valued clients.

System Netware always puts the highest emphasis and importance to provide clients with complete computer solutions and services. Its aim is to work towards the fulfillment of quality assurance in any projects and providing our clients with the supports to meet with the challenge of competition and obsolesce that hunt the business people out of the market.

The professionals of System Netware maintain a close touch with the latest academic thinking and keep abreast development in computer technology for the best interest of the clients. For special case handling we keep cooperation with the Universities and Institutions specialized in computer technology.

We have also the commitment to reflect the GOB objectives to attain computer literacy and export of computer software to add a new dimension to the export oriented industries and thus earning the foreign exchange to boost up the development of our country.

SERVICES THAT WE PROVIDE

Software Development:

Specially we develop & market the software as per our client's requirement in Windows XP/2000/9x/ Windows NT/2000/XP & Unix platform supporting LAN & WAN in the fields of Accounting, Banking, Payroll, Inventory, MIS, Personal Information Management System (PIMS), Multimedia software etc. In addition, Multilingual support in English, Bengali, Arabic etc. is also available to help our clients get easy with the use of software.

Net Working:

We install and provide support and consultancy services for both LAN and WAN in Novell, Windows NT/2000/XP, Windows 9x, Windows 2000/XP and Unix platform.

Data Entry:

We provide data entry and data processing services in all range of complexity, volume and time critical requirements.

Computer Sales:

All types of brand & Clone machines, Printer, Scanner, UPS, Stabilizer, Computer Accessories etc.

LOGISTICS

5.1 Introduction

System Netware has extensive logistic facilities available for its corporate clients. The necessary logistics requirements to carry out the study, analysis and design of software were identified during the establishment of the firm. That's why it never faced any objection from its client's side regarding logistic support. Description of logistics is presented hereunder.

5.2 Office Accommodation

Office accommodation will be provided for the Client from the project staffs. The facilities to be accommodated will include mainly: -

- Working place for professionals and staff
- Application development and training
- Printing and reproduction section, and
- Utilities.

The office is adequately furnished with the requirements of individual professionals such as:

- Working tables
- Sitting chairs
- File rack

Common facilities for the professionals include

- File cabinet
- Telephone
- Air-conditioning

5.3 Transport, Utilities and Services

The following transport facilities are utilized during the execution of the work and implementation of any project:

- Two Cars for the duration of any study or system analysis for local movement, meeting with the client and collection of necessary data and information
- Normal Bus/Train transport facilities are used where applicable
For carrying out work

Facilities available through a central pool are included but not limited to the followings:

- Computer and data processing
- Drawing and drafting
- Typing
- Photocopying
- Ammonia Printing
- Report binding
- Stationers

5.4 Equipment & Support Staff

We have the following office equipment and computers for study, analysis and development work:

Sl No	Type of Equipment	No	Description
1	Computers	25	Core i7,i5 grade
2	Laptops	13	HP, Compaq, Toshiba , Asus , fujitsu, Dell etc.
3	Printers	6	Laser 3, Bubble-jet 2, Dot 2
4	Network	1	All the computers are connected via a hi speed LAN of twisted pair. The OS platform is Windows NT/2000/XP 4.0. There is one Windows NT/2000/XP Server with one back up NT server
5	Car & Vehicle	2	Toyota Cami Jeep 1300cc model 2001, Daihatsu Rocky DX 2000 CC, Daihatsu Feroza DX 1600 CC, XNOAH-2004 Model 200CC.
6	Photocopiers	1	Canon photocopier
7	Internet	1	High Speed Broad Band
8	A/C	5	Split type ,General/Carrier & KlimAir Brand
9	Scanners	1	Canon, Microtek
10	Software		VISUAL Studio .NET, SQL Server, Oracle , MICROSOFT OFFICE , DELPHI , MICROSOFT VISUAL TEST, NUMEGA CODE REVIEW TOOLS AND numerous other software development tools and utilities
11	Books & journals	200 +	All latest collection of software tools and network related books and journals

GENERAL INFORMATION

Name of the firm	System Netware
Year of Establishment	In 1996 the company was established as System Netware as a proprietary business organization.
Type of Organization	A proprietary business organization
Mailing Address	174 Tejkunipara, Tejgaon Dhaka
Telephone Number	+8801911-349630
Email Address	Towhid1971@gmail.com
Name of Bankers	Uttara Bank Aulad Hossain Market Branch, Dhaka
No of regular employees	35
Name of Directors of the firm	Proprietor: Md. Habib Ibrahim Ehtesham(Towhid).
Branch offices	Sylhet: Rikabi Bazar (2 nd Floor) (Opposite side of M. Saifur Rahman Auditorium.) Sylhet Phone : 0171-4048246 Chittagong: 12 Jamal Khan Road, Chittagong Phone : 0171-829097
Lawer	Sheikh & Associates, Minar Bhaban, Sadarghat, CMM Court, Dhaka
Overseas Partners	Dream Fusion 165 Dundas St. West, Suite 601 Mississauga, Ontario L5B 2N6, Canada Tel : (905) 277-8044, Fax : (905) 507-2939
Major Products	HPM –a hospital ERP solution. “LENDEN” – generalized accounting system. “ICS” – generalized inventory control system ”NXN-Lab Management” - a diagnostic Lab ERP solution. ... And much more.

COMMERCIAL & CUSTOMIZED PRODUCTS OF SYSTEM NETWORK

SL no	Name of the product	Main Features of the product	Web/LAN/WAN Integration	Major Clients
1	Share Broker's Data Processing	This is an essential product for share broker's daily transaction and integrated accounting. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in any SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • The application is all user-friendly command button driven what minimizes user training and human error. • The program intelligently performs all the transactions of a share broker including daily sale & buy order, • Counts sale & by orders, entering hawlas intelligently and automatically maintaining client ledger and company share stock position from that. • Maintains numerous accounting posting without any user intervention. • Gives profit and loss account, trial balance, Balance Sheets and much more. • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities.	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	1. First Securities Services Ltd. 2. M/S Rakibur Rahman & Co, 3. ST Group Of Companies, 4. Borax Apparels Ltd. 5. JR Capital Management Ltd. 6. Jamilur Rahman & Co.
2	Share Issue Data Processing	This is an essential product for share issue data processing organization. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in any SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • The application is very much user-friendly and command button driven what minimizes user training and human error.	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	1. Satcom Computers Ltd. 2. Apex Group of Companies. 3. First Securities Services Ltd. 4. GEM Knitware Ltd.

		• The program intelligently calculates all the reports of a share issue including allotment letters, list of invalid and valid applicants with reason, refund warrant letters, amount to be refunded • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities. • Automatic validity checking in all ranges • Intelligent automation in data entry. • Macro facilities.		
3	Computerized Share Management	This is an essential product for share data processing for any organization interested to offer public shares. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • Share application data entry /edit • Consolidation and summary of application money • Printing of regret letter and bank list • Prepare successful applicants , regret letter, allotment letter • Preparation of report for joint stock company • Prepare detail allotted list • Renunciation, transfer, principal shareholders • Printing of share certificate • Prepare member register • Maintenance of share register • Maintenance of dividend register • Year end closing • Bonus share issue • Query functions and lists • Integrated MIS with graphs and what if analysis tools • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities.	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	1. Apex Group of Companies 2. Bangladesh Autocars Ltd. 3. GEM Knitware & Fabrics Ltd.

		• Automatic validity checking in all ranges • Intelligent automation in data entry. • Macro facilities.		
4	Generalized Accounting System “LENDEX”™	This is an essential product for Computerized accounting system for any organization with large or small no of transactions day by day. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • Data entry, edit facility of daily transaction and preparation of Cash Book • Different reports on Cash Book • Data entry, edit facility for journal Entry • Posting to Sub Subsidiary Ledger, Subsidiary Ledger, General Ledger • Trial Balance Preparation • Monthly • Day wise Analytical Report • Profit & Loss Account Preparation • Balance Sheet Preparation • Schedule for Profit & Loss Account • Schedule for Balance Sheet • Cash & Fund Flow • Work Sheet • Data File Maintenance • Provides integrated database to store all Provident Fund data • Provides quick access to accurate and up-to-date provident data • Provides Management Tools to monitor employees provident fund information • Provides a system which can help an organization to integrate Personnel, Accounts and Establishment department • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities. • Automatic validity checking in all ranges	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web data entry facility, web reporting facility.	Please refer to Client's List for detailed users list

		- Intelligent automation in data entry. - Macro facilities.			
5	Arabia	This is the unique Arabic solution from SYSNET, supports automatic and manual selection of Arabic fonts as Arabic letters come from the right and others come from left. Supports Windows 3.X, Windows 9x, Windows NT/2000/XP in both 16 and 32 bit platform.	No		1. NewYork Apparels 2. Open commercial & Public use.
6	Computerized Payroll “Payperfect”™	This is an essential product for Computerized payroll system for any organization with large no of employees with complex paying system. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. - Provides integrated database to store all Payroll information - Provides quick access to accurate and up-to-date payroll data - Provides Management Tools to monitor employees salary, wages information - Provides a system which can help an organization to integrate Personnel, Accounts and Establishment department - Monthly Input Details - Salary Register - Pay Slip – Individual & All employees - Bank Advise / Salary Disbursement Statement - Bonus Statement - Bonus Disbursement Statement - Monthly Loan installment deduction statement - List of deleted employees. - List of Area, Designation, Department, etc. - Advance Statement. - Data file Maintenance facility - Automatic Update Facilities - Jazzy Reports And User Screens. - Automatic Database Compaction, Repair and Restore from backup facilities. - Automatic validity checking in all ranges	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please refer to Client's List for detailed users list	

		- Intelligent automation in data entry. - Macro facilities.		
7	Computerized Inventory “ICS”™	This is an essential product for Computerized inventory control system for any organization with large stores and warehouses requiring frequent monitoring of product inventory. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. - Provides integrated database to store all store data - Provides quick access to accurate and up-to-date store data - Provided Management Tools to monitor materials information - Provides a system which can help an organization to integrate Store and Accounts Department - Item Detail (Raw and Packing Materials) – add, edit or delete - Store and spares Detail – add, edit or delete - Consumption for the month – Quantity - Consumption for the month – Value - Material Receipt Record Information (MRR) - Store Requisition Information (SR) Stock Position - Qty and Value - L/C Monitoring System - Back-up and restore data files / tables Barcode Options include code generation, printing and recognition - Other Management reports - Data File Maintenance - Automatic Update Facilities - Jazzy Reports And User Screens. - Automatic Database Compaction, Repair and Restore from backup facilities. - Automatic validity checking in all ranges - Intelligent automation in data entry. - Macro facilities.	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web requisition, web mail and stock reporting facility.	Please refer to Client's List for detailed users list
8	Hospital integrated &	This is an essential product for Computerized Clinic management system for any clinic or hospital with large no of patients and in-house medicine department requiring frequent	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web database integration for	Please refer to Client's List for detailed users list

	diagnostic management system “HPM”™	monitoring of hospital beds and available medicine. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • Automatic patient entries in empty beds and release system. • Automatic billing for patients. • Automatic billing for medicine • Automatic doctors and nurses time scheduling. • Barcode Options include code generation, printing and recognition for patient ID in various departments • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities. • Automatic validity checking in all ranges • Intelligent automation in data entry. • Macro facilities. • Built in security system.	web booking, inquiry and status reporting	
9	Election commission data processing system	Voter list and voter id card preparation tools for Bangladesh EC. • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities. • Automatic validity checking in all ranges • Intelligent automation in data entry. • Macro facilities. • Built in security system.	LAN Based application software	Bangladesh Election Commission
10	Survey information system and personnel	This is our customized product for Bangladesh Survey Organization Ltd. for preparation of survey data for user retrieval, resettlement of individual loss of property calculation etc. . Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking	LAN Based application software	Bangladesh Organization Ltd. Survey

	information system	environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation , faster connectivity and enormous flexibility.			
11	Diagnostic Management System	Modules • Counter Operations & Management • Auto Label Printing • Marketing • Doctors Information's • Laboratory reporting System • Management Information System • Finance & Accounting	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web database integration for web booking, inquiry and status reporting	Please Refer to client List	
12	PABX Billing Software	PABX Billing Software with Hospital Management Integration PABX Billing Software with Hotel Management Integration PABX Billing & call Monitoring	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
13	Vehicle Route Control System	This system is aimed to detect traffic congestion in any specific point/ route while issuing new vehicle route permit. The system graphically shows all the intersection point with their actual usage frequency from the database. The system is easily updateable by users at any time and projection can be made with multiple routes at the same time with what if analysis	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	DC Traffic North and south and BRTA	
14	Hotel Management System	A generalized hotel management system for any large 3/5 star residential hotel & restaurant with key modules as • reservation • booking • finance and accounts • inventory • hotel catering • billing • restaurant management • club management	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web database integration for web booking, inquiry and status reporting	Please Refer to client List	
15	Club management System :	Key modules ☐ Membership control ☐ Members ID card printing with barcode Options include code generation, printing and recognition ☐ Billing ☐ Inventory and MIS	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	

		☐ Accounts			
16	ELISA Reader Data management System	This is a hardware interfacing system for Universal ELISA Reader data capturing, storing and reporting facility. Platform Oracle/SQL/Access Available under windows environment.	LAN/WAN Based application software	Please Refer to client List	
17	Cell Counter Data Management System	This is a hardware interfacing system for Universal Cell counter data capturing, storing and reporting facility. Platform Oracle/SQL/Access Available under windows environment.	LAN/WAN Based application software	Please Refer to client List	
18	Tenant Control System	Modules • Auto Bill Preparation • Tenant Ledger over a period • All tenant's outstanding summary over a period • Profit & loss account • Utilities and others income & expenditure account • Statement of receipt & payment • Voucher & Journal entries This is a very handy utility for cataloguing CDs with multiple software. This works like a library where you can search for particular software by name, category, approximate name, utility etc. and the system will quickly show you the desired CD location. It automatically captures the CD Content to memory and creates a catalogue automatically. Must for any large software industry.	LAN/WAN Based application software	Please Refer to client List	
19	CD Profiler Deluxe	This is a very handy utility for cataloguing CDs with multiple software. This works like a library where you can search for particular software by name, category, approximate name, utility etc. and the system will quickly show you the desired CD location. It automatically captures the CD Content to memory and creates a catalogue automatically. Must for any large software industry.	LAN/WAN Based application software	Please Refer to client List	
20	Vehicle Maintenance Management System	Modules ☐ Complete vehicle database for each department ☐ Vehicle history of usage ☐ Vehicle maintenance history ☐ Vehicle maintenance management with alerting system to management ☐ Vehicle roistering with cabin crew allocation	LAN/WAN Based application software	Please Refer to client List	
21	Force Management System	Key modules ☐ Complete force database with photograph and fingerprint and past history with family tracking option ☐ Force deployment & management ☐ Deployment history for each force with success/failure and key roles, supervisor's comment etc. ☐ Leave register ☐ Summary of success/failure and ranking based on activity where activity is a user's variable ☐ Force roistering management with specific site/demographic/mapping system in a complete graphical environment	LAN/WAN Based application software, Web database access and reporting facility	Please Refer to client List	
22	Maintenance Management System	This is an essential tool for any large organization involving numerous machinery's that requires frequent maintenance.	LAN/WAN Based application software	Please Refer to client List	

		Key modules ☐ department wise data storage for all machinery's ☐ Department wise data storage of all maintenance people. ☐ Alerting system for all maintenance schedules. ☐ Pre and post maintenance reporting. ☐ Failure reporting ☐ Maintenance costing ☐ Maintenance manning schedule generation. ☐			
23	Traffic Fine Collection & Warrant Management System	Key modules ☐ Vehicle Case history ☐ Vehicle warrant history ☐ Fine Collection and related accounts ☐ Warrant management and court integration via WAN/Web ☐ MIS ☐ Sergeant PMIS	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, web based database access for view only	Please Refer to client List	
24	Driver License Control System	Module - Database of Driver License - Photograph Scanning & Ghost Option - Plastic Card Printing - Search & Verification Edition - Auto Backup & Recovery with Security System	LAN/WAN Ready application	Please Refer to client List	
25	Restaurant Management System	• Sales & Invoicing • Daily/Monthly/Yearly Statement • Item wise Sales Statement • Raw Material Consumption Statement • Misc. Sales Statement	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
26	Recruiting Agents Manpower Export Control System	Modules • Finance & accounting • Visa information System • Embassy information system. • Alerting system	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
27	School Management System	Modules - Student Information System - o Teachers Information System - o Mark-sheet Tabulation - o Tuition Fees/Fine Collection & related accounts	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	

		- o Attendance - o Report Generation - o Relevant MIS Statements - o Class Routine Generator - o Roistering & Exam Scheduling			
28	Medical Checkup Management System	- Key modules ☐ Counter entry and related accounts ☐ Physical Laboratory ☐ X-Ray ☐ Reporting ☐ MIS	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
29	Real Estate Accounting System	- Modules • Finance & Accounting • Loan Management system. • Booking system. • Defaulters monitoring and management	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
30	Share Trading & Accounts	- Modules - This is an essential product for share broker's daily transaction and integrated accounting. Available in both 16 bit and 32 bit version supporting Windows 3.X, Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable	LAN/WAN Based application software	Please Refer to client List	
31	VISA Distribution for GAMCA	This is a software for GCC Approved Medical Center's association for VISA allocation, Medical card attestation with the respective countries embassies, Database Platform is ORACLE/SQL server with web uploading facility from the respective medical centers , reporting facility for viewing allocated passengers for medical checkup	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
32	Payperfect Deluxe	- Payroll & Attendance Control System ☐ Personal information database with photo and fingerprint ☐ Leave register ☐ Attendance by biometrics/barcode/code based ☐ Employee ID card printing with barcode Options include code generation, printing and recognition ☐ Complete employment record with supervisor comment on success/failure ☐ Payroll control with advance, overtime management.	LAN/WAN Based application software	Please Refer to client List	
33	Central Store Control System	- Modules ☐ Requisition ☐ Receiving	LAN/WAN Based application software, Web requisition and stock reporting facility	Please Refer to client List	

		☐ Delivery ☐ Stock ☐ Supplier's accounts ☐ MIS				
34	Roistering/Employee Scheduling	Modules · Automatic Generation of Roster Scheduling · Dragging & dropping of employees onto roles · Time & role Conflict · Graphical representation This is a universal data capture, store, retrieve and reporting system for automatic hematology analyzers. Platform is ORACLE/SQL Server with close integration to WEB.		Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application	Please Refer to client List	
35	Hematology Analyzer Data Sysmex/Abbott Cell Dyn/Spirit etc management System			LAN/WAN/Web Based application software	Please Refer to client List	
36	Biochemistry Analyzer Data management System	Biochemistry Analyzer Data Virtors/Boeringer/ACE/Humalyzer Management System etc.		LAN/WAN Based application software	Please Refer to client List	
37	Hematology Analyzer Data management System	Sysmex/Abbott Cell Dyn/Spirit etc data capture and validation system.		LAN/WAN Based application software	Please Refer to client List	
38	ELISA READERS & Virus Profilers	Stat Fax/Multiskan etc		LAN/WAN Based application software	Please Refer to client List	
39	Supermarket Inventory “SICS”™	This is an essential product for any departmental Store maintaining Computerized inventory control system. Any Store with large stock and warehouses requiring frequent monitoring of product inventory. Available in both 32 bit and 64 bit version supporting Windows Windows 9x, Windows NT/2000/XP with. Supports multi-user system in a multitasking environment. Scalable unto client server computing needs for enterprise database needs. Has enormous flexibility in database design and user interfaces, user accessibility. It is available in a SQL or ORACLE server based system supporting SQL PASSTHROUGH Queries and stub procedures for faster operation, faster connectivity and enormous flexibility. • Provides integrated database to store all store data • Provides quick access to accurate and up-to-date store data • Provided Management Tools to monitor materials information • Provides a system which can help an organization to integrate Store and Accounts Department Item Detail (Raw and Packing Materials) – add, edit or delete • Store and spares Detail – add, edit or delete • Consumption for the month – Quantity	Automatic Dynamic web page generation of the selected forms and LAN/WAN Ready application, Web requisition, web mail and stock reporting facility.	“KENA KATA” Rikabi Bazar, Opposite Saifur Rahman Auditorium Sylhet		

	• Consumption for the month – Value • Material Receipt Record Information (MRR) • Store Requisition Information (SR) Stock Position - Qty and Value • L/C Monitoring System • Back-up and restore data files / tables • Barcode Options include code generation, printing and recognition • Price Display system in LCD Panel • Membership system for discount and privilege sales • Other Management reports • Data File Maintenance • Automatic Update Facilities • Jazzy Reports And User Screens. • Automatic Database Compaction, Repair and Restore from backup facilities. • Automatic validity checking in all ranges • Intelligent automation in data entry. • Macro facilities.
