OUR MISSION...

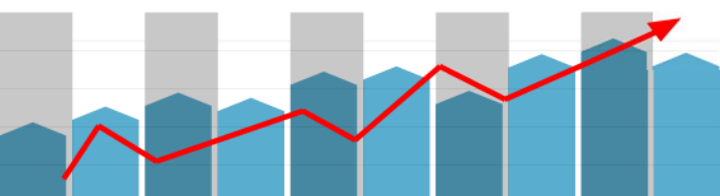

To serve and to protect the interest of our Clients through providing the best services available.

To achieve excellence in providing those services and to encourage their participation through employing the ever evolving information and communication technologies.

To provide both the private and public sector with innovative & robust solutions that exploit the potential of cutting-edge Information Technologies. This we do by listening closely to the needs of our clients as they grapple to align new technologies with business strategies.

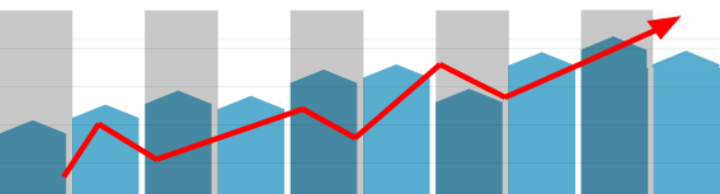

To provide clients with high quality, appropriate, total Information Technology Solutions, at cost-effective rates, in time, all the time - with the required on-going service and support.

The hallmark EIS (Enterprise Info Solutions Ltd.) is the delivery of exceptional services and solutions. This we do by continuously stimulating awareness of total quality principles amongst our professional staff and embracing change, continuous improvement, diversity, technology and innovation; we strive to ensure the delivery of ultimate client satisfaction.

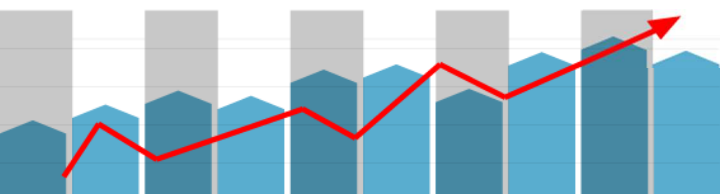

WHY EIS ...

- ❖ **Experience:** We've newly assembled our firm (EIS) running about 10/12 years but we (Directors) are about 25 years experienced to serving local and global clients like Group of Companies, Banks, NGOs, etc.
- ❖ **Strong history of excellent performance:** Our profile shows that we are an IT consultants and Application Development house, experts in Business/System Analysis & Architecture and in providing small/medium/large scale organizations and enterprises with fully integrated Linux, Windows & Web Applications for a complex environments, such as Enterprise Resource Planning (ERP), Online Ticketing Management System (OTMS), Point of Sales (POS), School Management Information System (SMIS), Bridge Scale Management, Hospital Management Information System (HMIS), Hotel & Restaurant Management System, Customer Relationship Management (CRM), Enterprise Content Management System ECMS, Enterprise Portals, E-Commerce,...etc.
- ❖ **Punctuality:** We take into consideration the importance of meeting deadlines; our projects are delivered on or before the due date. We didn't have any delay in delivering any of our projects.
- ❖ **Reliability:** Our proven reliability means that you can count on us to continue deliver our services no matter what the circumstances. Also, we deliver positive, rapid and the best return on investment "ROI" solutions for our customers.
- ❖ **Sustainability:** Through minimizing maintenance and support requirements by providing you with sustainable solutions.
- ❖ Our experience enables us to focus on helping our clients to achieve their missions and not just on meeting contractual requirements.
- ❖ **Risk Management:** Identify, mitigate and track project risks to ensure that trade-offs and decisions are made in an informed manner. Also, sharing the risks so that all parties have an incentive to participate in mitigating the risks and prevent negative outcomes.
- ❖ **Client Partnership:** We form a partnership with our customers which ensure their participation in the development and implementation process and keep them in the loop regarding project events.
- ❖ **Quality:** Dedicated quality assurance team to further accentuate quality norms.
- ❖ **Highly Qualified Staff:** Our staff is the most distinguished features and we are very proud to have such a staff. They are highly qualified both academically and from an experience point of view. They are given extensive training and they are trained on state-of-the-art techniques of consultation, analysis QA, development, deployment, training and support. We always look for commitment in the staff, dynamic character, innovation and acceleration in learning.

- ❖ **Adherence to standards:** We adhere to the worldwide technical concepts such as: Structure Unity, Agile and Open architecture because we believe that the software and data are one of the most valuable assets to our customers, thus changing the hardware should not affect the software applications, we use RDBMS (MS SQL SERVER, PostgreSQL, and Oracle), .NET technology, MS SharePoint, MS Dynamics CRM, AJAX, Visual Studio, Java scripts and Flash. Issues such as security, integrity, consistency and help facilities follow standards are always addressed and always taken care of in our design and development.

Offer several areas of technical expertise including infrastructure, networking, virtualization, office automation, e-commerce, collaboration, business intelligence, and other leading edge disciplines

WHO WE ARE ...

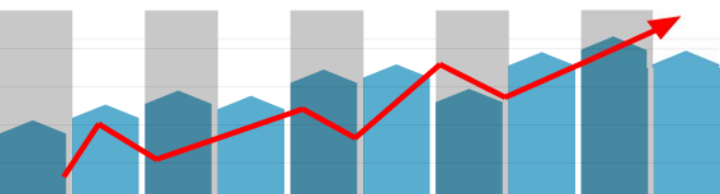

EIS is a Bangladeshi mid-level IT systems provider, known for providing clients with Enterprise world-class solutions addressing their local business needs. EIS offers state-of-the-art technologies including: Enterprise Resource Planning (ERP), Online Ticketing Management System (OTMS), Point of Sales (POS), School Management Information System (SMIS), Bridge Scale Management, Hospital Management Information System (HMIS), Customer Relationship Management (CRM), Enterprise Content Management System ECMS, Enterprise Portals, E-Commerce, etc.

EIS Established in 2010 and is 100% nationally owned.

As an ERP implementer the company was from the first to develop Online Ticket Management web portals and weighbridge (bridge scale) management software, followed by the launch of web hosting services, emails and domain registration.

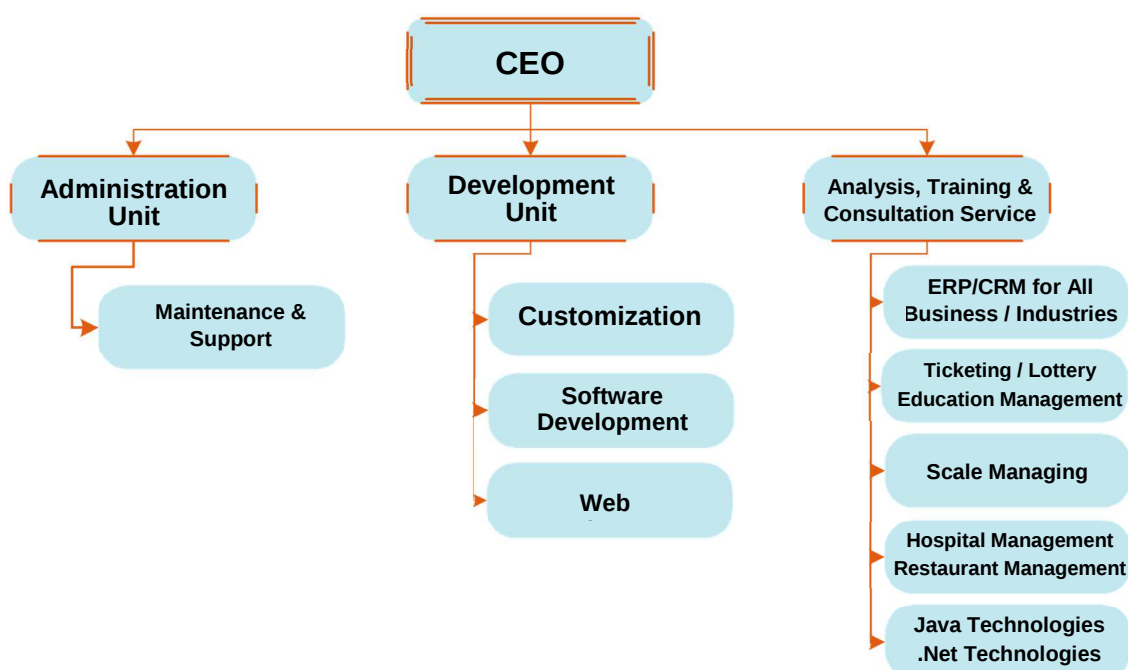

As the market evolved, EIS re-positioned its portfolio offerings and re-structured the organization to focus on enterprise level solution providing and critical various application solutions. In 2014, it began to offer implementation and consultation services for providing virtualization system, network infrastructure, server management, backup & restore, critical industrial machine data management, ERP, CRM, Supply Chain Management, Account & Financial management, Human Resource management, point of sales solutions, demonstrating real added value to customers.

With its growing focus on implementing application and other solutions, EIS has built a dedicated team of highly skilled professionals and a set of operational competencies that form the underpinnings of its competitive advantage. Today, EIS is the preferred local systems Integrator and application solutions provider for major market sectors such as: Government, Semi Government, Local Government, Non-Governmental Organizations (NGOs), Educational, Commercial, Banking & Real Estate.

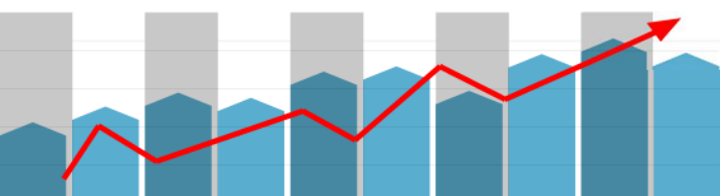

EIS ORGANIZATION ...

EIS is a growing IT company; with a main aim: to keep up with the quality and excellent performance in its projects.

27	BIFT, Bangladesh.	1 Server & 8 Workstations

A CASE STUDY OF BSM GROUP...

BSM Group is the one of largest & leading trading company in Bangladesh. Their head office is located in country's famous business zone Khatungonj of Chattogram. Their main business items are rice, wheat, piglets, electrical items, etc.

The BSM Group imports lots of food grains every year to support the food department of the government, semi-government and public agencies. To accomplish this huge task, they have to do lots of LC, shipment, warehousing, inventory, distribution, billing and banking related work.

BSM Group stored their imported items in around **100 (Hundred) warehouses** all over Bangladesh and delivered from there after delivery order. If DO owner unable to clearing goods within the delivery date, a daily basis rental charge will be applied on the sold goods.

A lots of human error was seen due to these tasks being done manually.

In order to automate those tasks, BSM contracts with a software company. But they fail. The second time they requested another software company to do the work again. They were a bit successful, but they could not fulfill all the requirements of BSM.

In this situation, a genius CFO join the BSM Group. He was known to us earlier, in his previous company, we implemented the ERP software. He knows about our experience. He called us and told about the automation problem of the company. We said that, working with both of the “DreamApp ERP and we (EIS)”, it is possible to solve your problem. After discussions about the method of bidding and work, the BSM's authority gave us a work order.

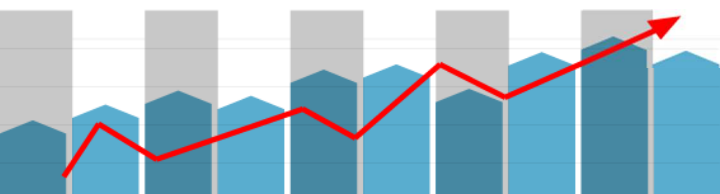

We have a hard time in various obstacles for six months, finally, by the grace of Allah, we bring the company to live ERP software data entry & monitoring.

In this endeavor, many others, including Mr. MD and Mr. CFO of BSM Group, helped us. We are grateful to them.

Now, top authority of BSM Group is monitoring:

1. LCs with costing
2. Shipments
3. Landed cost
4. LC wise inventory, sales, delivery and collection
5. Shipments wise inventory
6. Warehouse wise inventory, delivery, rent & billing
7. Accumulated warehouse inventory, delivery, rent & billing
8. Accumulated sales & collection
9. Inventory aging
10. Import, sales & delivery planning
11. Cheque management, Bank reconciliation
12. Full-fledged accounts & financials, etc.

Finally, the top management of BSM Group expressed great satisfaction and gratitude on us.

A CASE STUDY OF MOSTAFA ORGANIC SHRIMPS PRODUCTS LTD. (MOSPL)...

Mostafa Organic Shrimps Products Ltd. (MOSPL) is the only **organic** Shrimp manufacturer & exporter in Bangladesh. Which is fully compliant and very favorable to foreign buyers. It's corporate head office is located in Chittagong & factory is in Satkhira. Here, consumers from different countries of the world, including Europe and America, buy organic shrimp directly from the farmers, and produce them according to the demand in the factory. Until the export of their own country, every buyer has stored their products in two sophisticated big cold-warehouse of MOSPL.

The method of work here is like a garment industry. Lots of workers and skilled persons are required. There are many processes to work according to the product. To do this huge activity manually, MOSPL has been facing many major problems like,

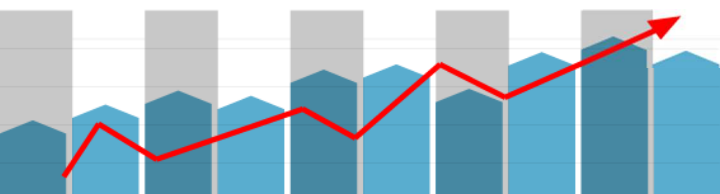

1. Various problems with export related issues
2. Purchase related problems,
3. Production, packaging & stock related problems,
4. Cold warehouse management problems,
5. General Inventory problems,
6. Human Resource & Salary related problems,
7. Accounts, finance and banking problems, etc.

Once the above problems have been exposed, foreign buyers are becoming dissatisfied with the MOSPL, so that the MOSPL's client list becomes smaller.

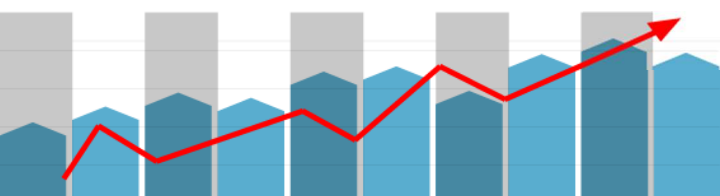

Meanwhile, Mr. MD of MOSPL adopted some strategies to retain the company's clients. His first initiative is "**Automation of the company's manual works by ERP facilitation and providing good service to clients through transparent and quick monitoring.**"

In order to implement the above initiatives, MD also met several software companies. And finally, we were allowed to work with DreamMaps through a detailed discussion with our director Mr. Shamsujjaman Mulla Manik.

By the DreamApps our team has been able to give a good support to the MOSPL, with a tireless effort of about 7/8 months in length. They thanked us a lot.

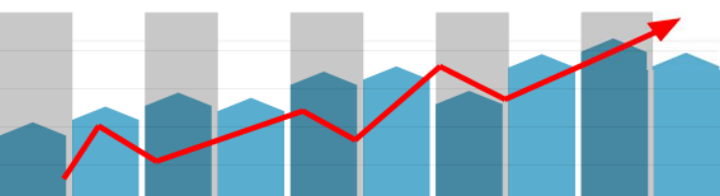

We are currently working on the development and implementation of the following projects:
