

COMPANY **PROFILE** OF

MICROTECH INTERACTIVE LTD.

CONNECTING DREAMS...

ABOUT US

OUR COMPANY

Microtech Interactive Ltd. is an IT solution company that develops next-gen technological projects, that help improve the daily life of activities. Our fields of specialty are AR, VR, Simulator, Animation and R&D Projects. We are adept at R&D, which delivers real business value.

Our most well-known project is "Bino". We possess the experience and expertise to meet high technical requirements.

OUR MISSION

Our mission is to connect people and brands through instinctive, interactive and creative digital experiences on physical platforms that would make everyday life more convenient.

OUR VISION

We aim to deliver efficient and effective solutions to organizations by adopting the latest digital business transformation technology. We want to be at the forefront of digital solutions and be a top ten company in our respective field of expertise.

BOARD OF DIRECTORS

MESSAGES

MESSAGE FROM CEO

We are constantly working to develop the technology sector through our experience and expertise. Our AR, VR, & Simulation is used for the betterment of learning in different government projects, defense sectors & schools. We have a professional team, developing new dimensions in the corporate world with cutting-edge technology. We want to create a world where life is easy with the help of our technology.

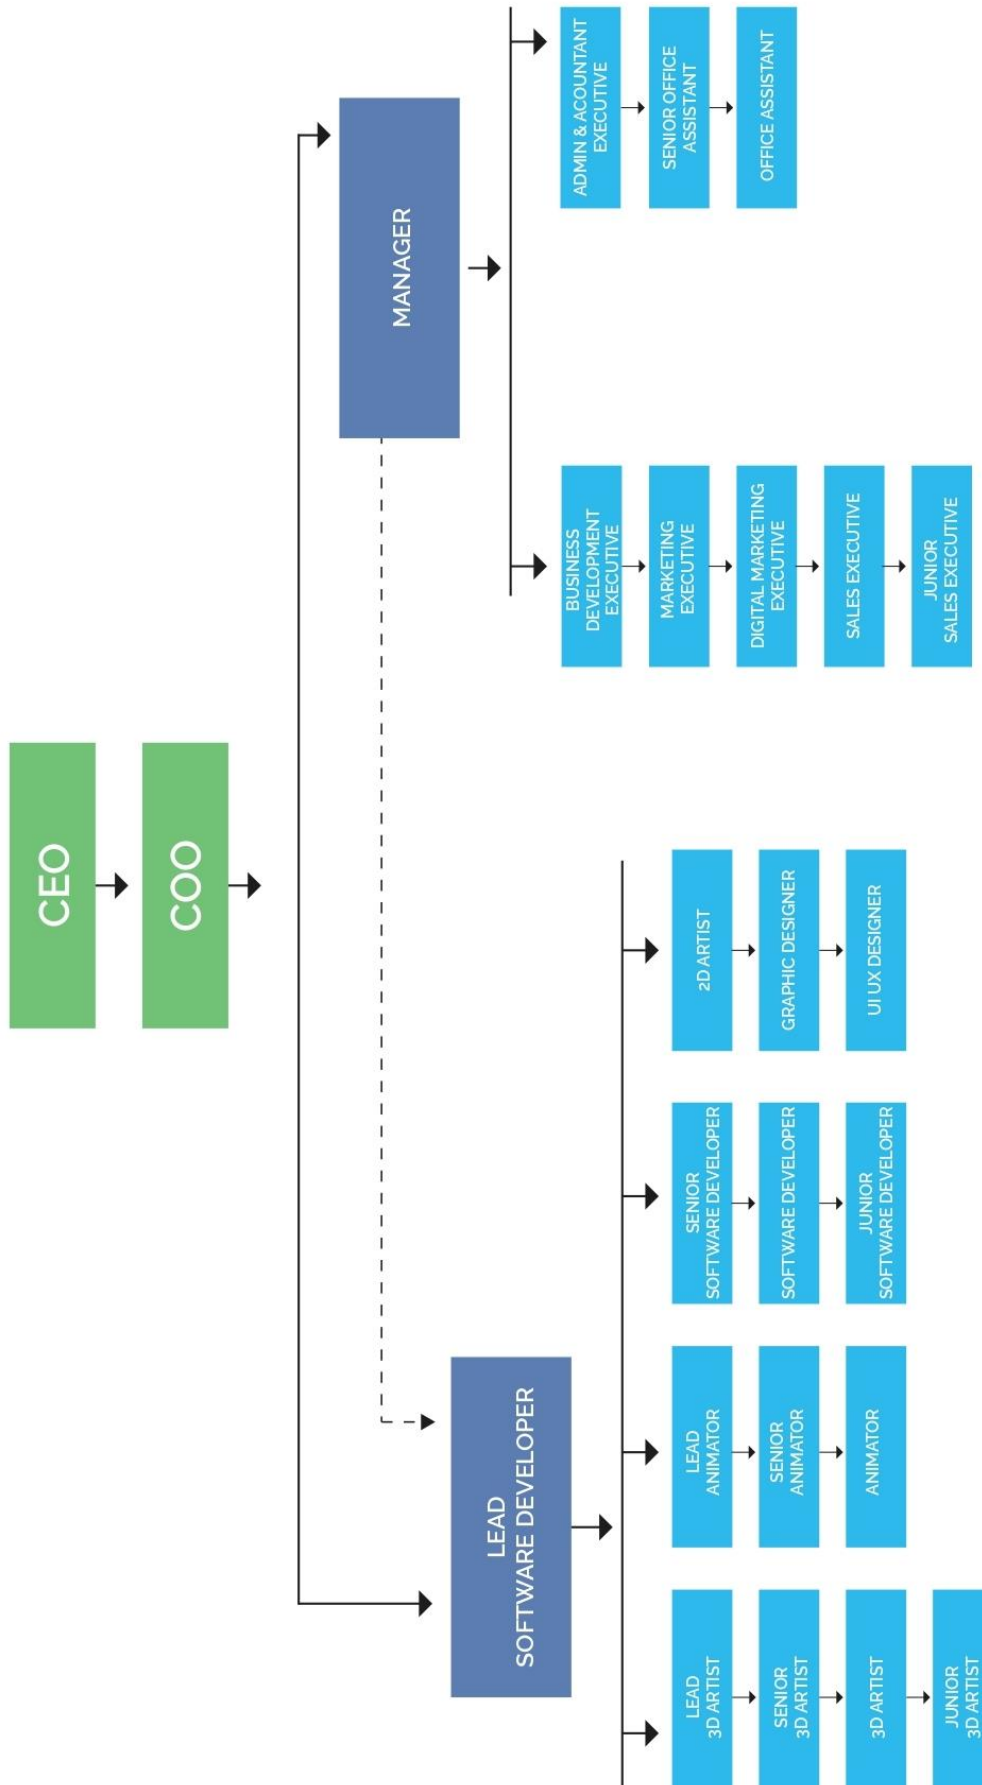

MESSAGE FROM CHAIRMAN

As an organization of information technology in Bangladesh, we start by developing a new era of education for evolution. And now through technology, creativity and skill we are aiming for fourth industrial revolution and digitize our country in the flow of updating technology.

MESSAGE FROM COO

We think ourself as an open-minded group of people who adds value to every project we undertake. We deliver on our promise and exceed expectations in providing innovative & creative deliverables. We want to complete with other big names in the industry by challenging ourselves to exceed our own capability and strive towards excellence.

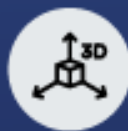

WHAT WE DO

We transform your imagination into reality by using cutting-edge technology. Microtech Interactive Ltd. is an IT solution company, that develops next-level technological projects. Our field of speciality is AR, VR, Simulator, Animation and R&D Projects.

Virtual Reality

Microtech Interactive utilizes the innovative and extraordinary methodologies for programming VR-based applications. Our VR services will enable your business to enter what's to come in the upcoming future. Let our computer-generated simulation direct you toward achieving your business objectives. We are one of the handful of organizations in Bangladesh with advanced VR capabilities. We have demonstrated the state of the artwork through games like Men vs Zombie and with our work related to War Simulation.

3D Model

We build high-quality models along with low-poly 3D content with HMR features for interactive applications, such as 3D props and asset creation, 3D sculpting, Architectural visualization, Interactive 3D simulator, Digital training, Product visualization, etc.

Digitalization

We facilitate corporations to commercialize their businesses by using digital technologies. We believe in continuous innovation and work to keep you perpetually updated with new technologies and rework your business modification. In this advanced era, whenever everything is digital and quick, we tend to assist you to adapt to the changes in the most efficient manner.

Augmented Reality

Augmented reality (AR) is the layering of digital information and objects over our view of the real world. This technology is changing many industries and enabling people to do their jobs with increased efficiency. The devoted Augmented Reality builder's team at Microtech Interactive is dedicated to supplying special services right from gaming to educational, marketing campaigns, medical programs, etc.

Web Development

We believe that the ultimate presence of your business is your website. Our developers have been designing and developing the website via researching the contemporary trend to get the most market value and consumer engagement. Through meticulous workmanship, our creative design team assures you in offering web services using the latest tools, and framework and ensures high security.

Simulation

Simulations can be sped up so behavior can be studied easily over a long period of time. It can avoid danger and loss of life. We provide custom simulator solutions for different sectors starting from education to industrialization. Through our simulators, critical situations can be investigated and fixed without risk.

ACHIEVEMENTS

AWARDS

From the beginning of our journey, we wanted to create innovative products and services. With that vision, we have developed some interactive solutions. Many of solutions got recognition, for example;

- ICT award 2017 for Best National Mobile Application.
- 2018 UNICEF award for Best Internet Contents for Children.
- Basis 2017 Champion on Start-up Category, 2017 GP Accelerator (Batch 3).
- 17th Apicta Award Runner Up 2018, Seedstars Finalist 2017.
- Startup Istanbul Finalist 2017.

BINO

Microtech Interactive Ltd. is developing the next level education curriculum. We have created an Augmented Reality based Android & IOS platform called "Bino". We are starting with pre-school children as our intended audience and work our way through higher classes of students. Keeping the 4th industrial revolution in mind, we want to deliver on our promises to make the new generation ready with the skills of tomorrow.

INTERACTIVE TACTICAL SIMULATOR

RADIO SIMULATOR OF VRC-2000L FOR BANGLADESH ARMY

We believe in making technology available to everyone. We tend to make people's dreams possible through our dedicated R&D team. We continuously work for Bangladesh Army to design and build Interactive Wireless Simulator. This simulator helps them to be more interactive and efficient in communication training.

INTERACTIVE TACTICAL SIMULATOR

VIRTUAL REALITY (VR) SIMULATOR PROJECT FOR BANGLADESH ARMY

Virtual reality is the new era of tech which made VR simulator training a great solution for the Bangladesh Army. They can experience realistic scenarios through this training which helps them to be more precise and confident in the real world.

VIRTUAL REALITY (VR) STUDIO SETUP

VR STUDIO SETUP FOR LIBERATION WAR MUSEUM

Microtech Interactive Ltd. is working in the field of AR and VR from the very beginning. Because of our expertise in this field, Liberation War Museum sought our aid to run a 360-degree movie named "THE LAST GOODBYE" in their film festival-2019. In this project, we provided the hardware and technical assistance successfully.

SIM OF RADIO SET R-168 FITTED WITH APC BTR-80Y

RADIO SIMULATOR OF R-168 FOR BD ARMY

After the success of VRC-2000L Bangladesh Army wanted us to take on a greater challenge for the training simulator of R-168. We gladly took the challenge and our expert team again amazed Bangladesh Army with dedicated work and groundbreaking results.

PLASTIC RECYCLING FACTORY VISUALIZATION

VR VISUALIZATION FOR SIRMAX

Sirmax is one of our international clients from Italy, who are continuously working on recycling. To share with the world how recycling works from trash to a brand-new product, they reached out to us. With visualization through VR, we showed the whole process, how a plastic bottle recycles and used in a new car production. From collecting trash to making polymers and everything that happens inside Sirmax.

MOBILE APPS FOR PATIENT FOLLOW UP OF CRP

MOBILE APPS FOR CRP

We have worked with the Central for the Rehabilitation of the Paralyzed (CRP) for their "Patient Follow-up Application". The application helps them to systematically follow up and monitor their patients' health and their progress. It has built a bridge between CRP and its patients. The app contains a database, that assists doctors to keep track of their patients.

ARTIST & ORGANIZATION MANAGEMENT SYSTEM

DATABASE SITE FOR BANGLADESH SHILPAKALA ACADEMY

Shilpakala Academy took a great initiative for artists of Bangladesh. Their vision was to bring all the artists of all divisions starting from struggling to established artists under one roof. This was a one-stop aid solution to provide financial aid which was appreciated by thousands of deserving artists during the corona pandemic. So, whenever there was any program, foreign tour or donation they could select a suitable candidate and make the best judgement to award the light candidate. We have built the system for Shilpakala Academy which made it digitally possible to complete the fund disbursement process.

বাংলাদেশ শিল্পকলা একাডেমি
BANGLADESH SHILPAKALA ACADEMY

WEBSITE FOR FILM FESTIVAL

EVENT MANAGEMENT WEBSITE FOR FILM FESTIVAL - LIBERATION WAR MUSEUM

We developed could an event management website for the Liberation War Museum. Through this website, the user can get all the information regarding the film festival. The participants could register from all around the world and submit their films for this festival.

WEBSITE & TICKETING SYSTEM

TICKETING SYSTEM FOR NANDAN PARK

We worked with Nandan Park which led us to build their Amusement Park online ticketing system. Anyone could get all the ride information and make a booking online on their website.

GAMES

OUR GAME DEVELOPMENT PROJECTS

Microtech Interactive Ltd. develops games for mobile and PC. We have in created a few hyper-casual games like Crazy Cricket, Richshawala etc, which are available in Google Play Store. We also worked on a multiplayer games like Pokerest (a poker game) available on the App store.
