

COMPANY PROFILE

COMPANY AT A GLANCE

OMNI SOLUTIONS Ltd. (OSL) is a software development company, providing world-class technology solutions since 2011. The company specializes in business-management software development services including customized mobile application development.

OSL is offering a wide range of solutions and services that meet core business end-to-end requirements. Our solution is designed to empower our customers, meet their business needs and capitalize on their existing infrastructure.

BACKGROUND STORY

Omni Solutions Limited traces its inception as an industrial business software solutions provider. Like any other startups our journey was not smooth, nevertheless with every rocky road we came across eventually that added into our learning curve.

Omni's developed software solutions are carefully shaped exactly to its client's requirements and at the same time keeping pace with the changing market trends. While offering end-to-end solutions, the company has its foundation firmly laid on three layers of any business: Quality, Cost Effectiveness and Value for money.

CORPORATE PHILOSOPHY

Integrity OSL holds consistent ethical standards of morality, honesty and transparency in actions as its basic principle.

Responsibility OSL adheres to a philosophy that takes responsibility for anything involving customers, employees, society, government and business processes.

**Accountability**

OSL analyzes job quality and performance. Necessary steps are taken to create and maintain accountability for the activities of both parties.

CULTURE

We pride ourselves on our talented and professional team. Any company can hire good engineers but without a positive culture the goal of building great software cannot be reached. OMNI team members value customer projects as a mission to transform ideas into reality.

Centralized in-house built CRM software is responsible for monitoring and reporting, including business automation, human resource management, project requirements processing, accounting system, etc. This makes it easy to verify customer requirements and submit options at any stage.

Strong technical expertise is OMNI SOLUTIONS' greatest asset. Engineers are experienced in both development platforms and business domains. They worked on projects from trivial to highly challenging level with deep knowledge of various techniques and concepts. Regular internal and external training sessions keep OMNI's workforce at the top of their profession.

MISSION & VISSON

Our vision is to be a creative, effective service provider to meet the leading edge in any business solution.

Our mission is to be a profitable provider of high quality software solutions and services that provide strategic value to our customers and create a company that can attract, recruit and retain smart and talented employees. And also executing creative and effective IT Solutions and deriving continued satisfaction among our valued clients who seek our services round the clock.

With our intensive R & D efforts, quality and competitive cost-effective structure, we are well positioned to take up new challenges to meet the leading edge in any business solution. Having long lasting impact in the field of software development both in creativity and uniqueness
