

TAKE IT EASY

WHAT WE DO

AREAS WE HAVE WORKED

For Euphoria, "TECH IT EASY" Is not just a tag line – It's reflects our approach to each of our engagements. Our single point objective Is to support our esteemed clients In the best possible way to ease out the challenges they face In their work process by effective & optimum utilisation of (I)nformation (T)echnology.

We deliver digital transformation and technology services from Ideation to execution enabling our clients to excel In their respective verticals. Euphoria takes an supple and collaborative approach to develop customised solutions across the digital value chain.

SOFTWARE DEVELOPMENT

Customised software development Is the key strength of Euphoria. Since incorporation Euphoria has successfully developed and executed more than hundreds of projects

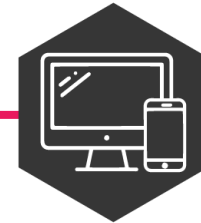

PROCESS AUTOMATION

We have automated many processes but one of the most successful process automation we can say improvising and upgrading a height & weight measuring machine for police

SYSTEM INTEGRATION

Euphoria is working as a system integrator since inception. we have successfully completed many projects including city surveillance jobs throught different districts of West Bengal

ANALYTICS & DATA SCIENCE

In depth analysis Is always a integral part In any of our projects. we always assist our clients beyond our scope of work following different data analytics models and predictive analysis.

MAJOR CLIENTS

Our profound expertise in application management service helps optimize your IT into a strategic asset. Whether you differentiate your concern or reinvent work process or accelerate your revenue growth, we can get you there. We, the Euphorians (as we cherish to label ourselves), thrive together with our clients keeping a collaborative spirit by using proven skill and a flamboyant yet non-oblivious approach to solve the challenges faced by our customers.

STANDARDS MAINTAINED

We are always concerned to maintain quality. The greatest treasure we possess till date is the trust of our clients and we have earned this only because of quality of our products and services that we deliver. Maintaining proper and strict time schedule.

ISO 9001 - 2008

ISO 9001:2008 specifies requirements for a quality management system where an organization

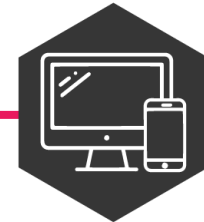

ISO / IEC 27001 - 2013

This is the international standard which is recognised globally for managing risks to the security of information

TIER IV DATACENTRE

We normally keep all our cloud based applications in Tier IV Data Centre, so that, in true sense we can provide the best to our clients

MSME REGISTERED

We are a MSME and NSIC registered organisation.

TRANSPARENT RECRUITMENT MANAGEMENT

We have already proven our existence in this arena. We are providing end-to-end solution on a turn-key basis to Government of West Bengal. We have already completed a drive where number of applicants were 25 Lakhs (Highest in the state).

ONLINE APPLICATION

We are successfully hosting application registration sites for the last 5 years for different organisations and already handles almost 1 crore candidates keeping 100 percent success ratio.

EXAM MANAGEMENT

We have already conducted online and offline exams for the departments. We have provided the department with adequate tools to take the exams and evaluate the answer scripts (CBT/OMR/Subjective)

COUNSELING MANAGEMENT

We have successfully executed online and offline counseling management for different medical/para-medical students in West Bengal.

The image shows a sample OMR answer sheet. At the top, it says "USE BLACK BALL PEN ONLY". Below that, there are "Important Instructions" and two boxes: "CORRECT METHOD" and "WRONG METHOD". The sheet is divided into sections for candidate information: "1. Candidate's Name (in Block Letters Only)", "2. Exam Code", "3. Centre Code", "4. Booklet Series", "5. Enrollment Number", and "6. Booklet Serial". The main body of the sheet consists of a grid of circles for marking answers. At the bottom, there are small icons and numbers representing different sections or questions.

SPECIALISED FIELD RECRUITMENT FOR POLICE DEPARTMENT

Providing a robust Recruitment Application Software and driving the entire recruitment process following TRP principles and enforcing strict principles of transparency and ensuring absolute accuracy and Integrity of the data. We have successfully completed several recruitment drives from West Bengal Police, Jharkhand Police and processed more 10 lakhs of candidates so far. We are also processed almost 6 lakhs candidates for Kolkata police in a single venue.

PHYSICAL MEASUREMENT

Normally, as per requirement, we create onsite setup for taking field exam. we take biometric, verify candidates, register their heights and weights through our improvised devices.

PHYSICAL ELIGIBILITY TEST

We are using RFID technology to conduct race for eligible candidates. we have already conducted 400, 800, 1600 meter and also 5, 10 and 21 km races for different recruiting authorities

RTI & CCTV RECORDING

Till date, we have provided successfully all RTI queries. We also keep CCTV backups for all projects, so that CCTV footage can be used as a secondary evidence

INTELLIGENT TRANSPORT MANAGEMENT

We have witnessed the turn around of South Bengal State Transport Corporation for the last 5 years. Once a traditionally loss making corporation is earning working profit for the last 3 years, we have provided end to end solution for online reservation, inventory control and depot management for this organisation. Using this system they are selling their seats.

ONLINE RESERVATION

Both South Bengal and North Bengal State Transport Corporations are using our system and mobile applications to sell their seat inventories. SBSTC alone sales 20 thousand seats a day.

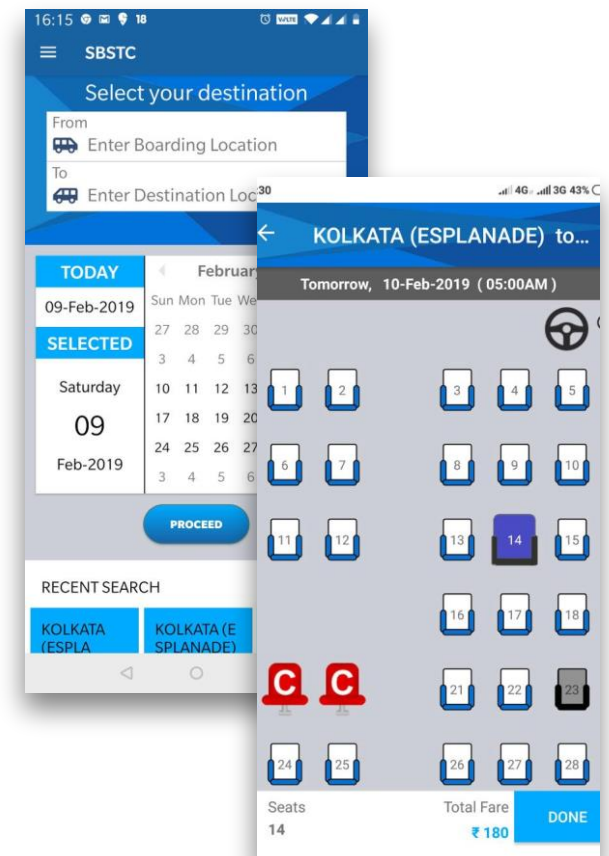

VEHICLE TRACKING

We have Installed vehicle tracking devices In huge number of buses and connected them through a single system. All these buses are being monitored from a single control room

DEPOT MANAGEMENT

Almost all known modules are integrated through this depot management system. Inventory, Accounts, Payroll, Maintenance, Roaster & leave, PF etc. are all part of these organisation

PROPERTY TAX MANAGEMENT

Successful Implementation of this system has awarded the State Govt. with SKOTCH award In 2018. A single system is running in all the ULBs and the UDMA department can monitor it live 24 x 7. We have integrated all the existing municipalities with all their flexibilities. More than Ten Lakhs of assesses are connected to the system. All mode of collections are integrated.

DEMAND GENERATION

The system reconciles with all kind of payments, takes care of individual relaxation rules and generates Tax demands for assesses. It also communicates with assesses through emails and SMS.

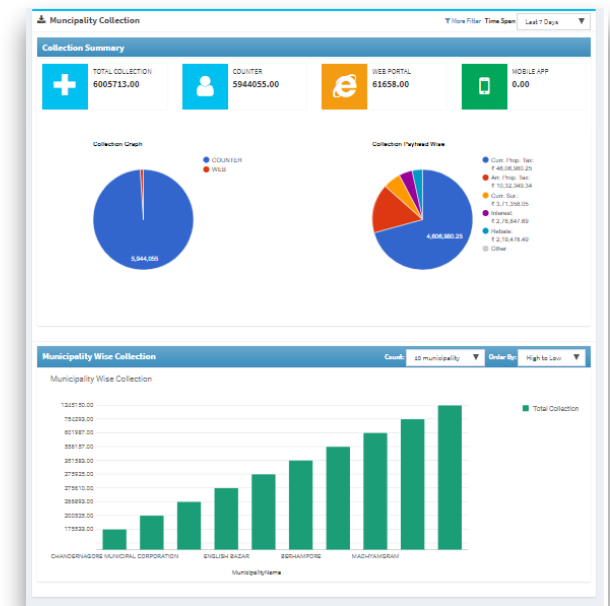

TAX COLLECTION

We have integrated all means of tax collection in this system, one can pay online using portal or mobile app. There is a counter module for payment collection and a hand held/POS based collection module for agents.

OUTSTANDING MANAGEMENT

The system manages the outstanding of an assessee online and at every point of time the system reveals the current outstanding. UDMA can also view the summarised as well as details level drill down reports.

PROPERTY ASSESSMENT MANAGEMENT

The system access records by parcel number, owner name, property address, maintains complete valuation data for each property or import that information from assessors. kept provision for easy application for name/ address change to multiple parcel records, print the valuation statement for a complete breakdown of assessed values by classification for a municipality Print a coding form to indicate any special assessments, A single system can be utilised for all ULBs through a hierarchical control mechanism

ASSESSMENT PROCESS

The system include new assessment along with Mutation, Name change, Separation, Amalgamation

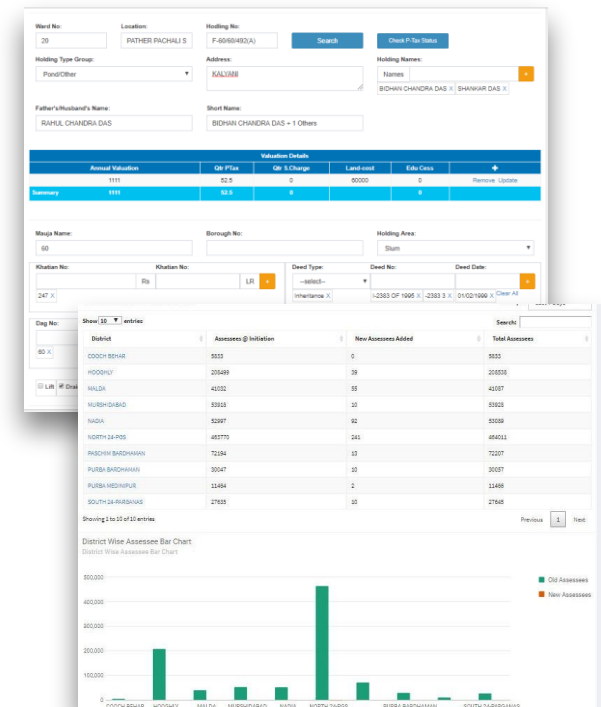

TAX DEMAND & OTHERS

The system generates valuation statement , notice of valuation changes for property records, audit report of the calculated tax amounts and special taxes

CITIZEN MODULE

The citizen can apply for sanctioning of plan online and upload all relevant documents. The system will notify in every stage of process movement both to the designated officers as well as to the citizen.

DETAIL PROJECT REPORT MANAGEMENT

The ULB's and the development authorities has to submit draft project reports to the DPR cell at UDMA. The UDMA department has formullsed checkllst requisites for the submission of DPR. The department will verify the detail documents and finally approve the admnlstrative and financial approval. Thls system uniquely malntains the basic work flow mechanism of a department and helps to have a full control over the situation and the department can have a total view with a top down approach.

DPR SUBMISSION

The ULBs can submit DPR before the sanctioning authorlties. They can submit a project along with multiple sub-projects, they can request for multiple installment of funds on sanctioning of the project..

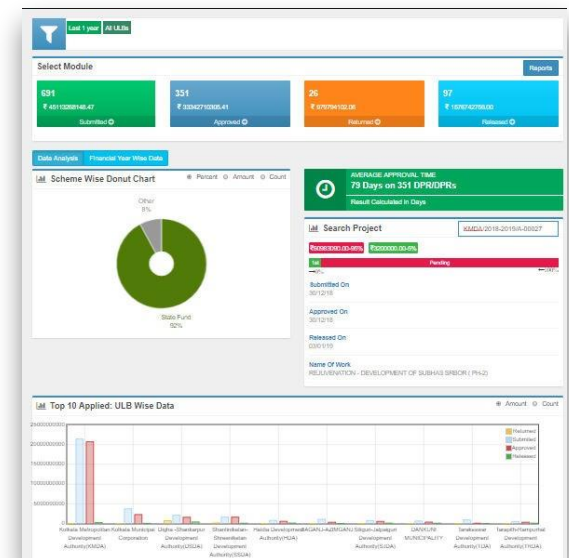

ULB LOGINS

The ULB/Development authority can view the list of all project submitted and current position of approval from the list provided in the dashboard.

DEPARTMENT DASHBOARD

Department can control the situation and monitor on a regular basis using the dashboard. they can sanction a project or a fund, verify documents online or even can schedule a meeting with the ULB for discussion.

DISASTER MANAGEMENT SYSTEM

Incident Management Application will save lives by providing information w.r.t Incident, standard operating procedures available at the screens with a click of a button, delivery of the "Help required/ Support to be provided" message sent to all relief, rescue and support agencies. Its role towards rescue and relief would be eminent and the same will be discussed during these sessions. We are working with Prevlstar Inc to implement their world standard CPS in different parts of India as this is the only DSS that has been approved by NDMA

PLAN MANAGER

CEMPlanner is a web-based planning platform designed to bring planners together and facilitate the planning process to create and maintain standards-based and customizable plans based on state, federal

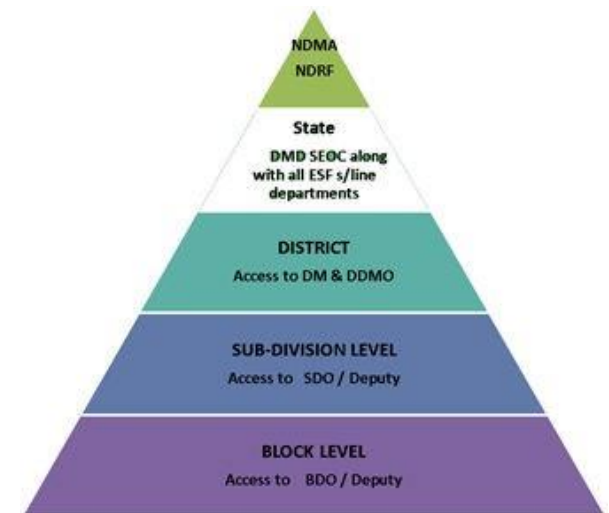

RESOURCE MANAGER

The Resource Manager is a web-based resource monitoring solution that delivers resource visibility and tracking capabilities throughout all phases of all phases of any type of incident

INCIDENT MANAGER

Incident Manager is the quintessential online command center which provides an operational backbone for situational awareness, decision support, and multi-jurisdictional coordination

INTEGRATED SOLUTIONS FOR ESSENTIAL COMMODITIES

We are providing end to end solution to Essential Commodities Supply Corporation. All the modules like procurement, Accounts, Payroll & Establishments, solution for retail outlets, hand held based sales module etc. all are integrated in a common platform for this department. We have also kept provision to integrate with systems of other backward/forward linked organisations like FCI, JCI etc.

PROCUREMENT DIVISION

Procurement to invoicing all are integrated in this system. Procurement of rice/paddy, sugar, jute etc. are being done from the same system. Cross validation of data received from the SHG and the rice mills are also a part of this project

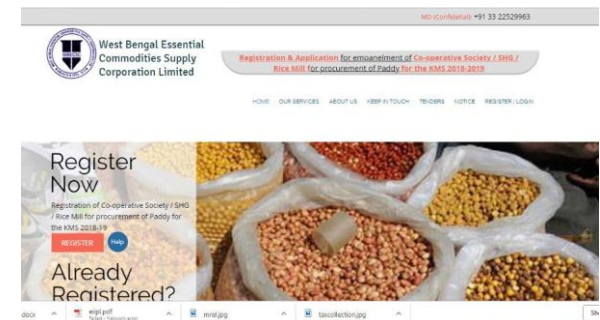

E-OFFICE MANAGEMENT

All the different modules like payroll, Leave, Loan, PF, I tax, Service book, Accounts, Bill processing are integrated.

RETAIL OUTLETS

We have a specialised hand held device / POS based retail module for the department and a ecommerce based mobile application for the buyers, which is again seamlessly integrated with the financial accounting module.

INTEGRATED SOLUTION FOR PAYMENT COLLECTION

We can provide 360 degree solution for any kind of payment collection for PSUs. our solution can be customised for any department. We have modules with online payment gateway Integration, customised hand held devices with card swaping options.

TAX COLLECTION

The system can be utilised for any kind of tax collection or even it can be very successfully used in PDS system, or even in any sales outlet

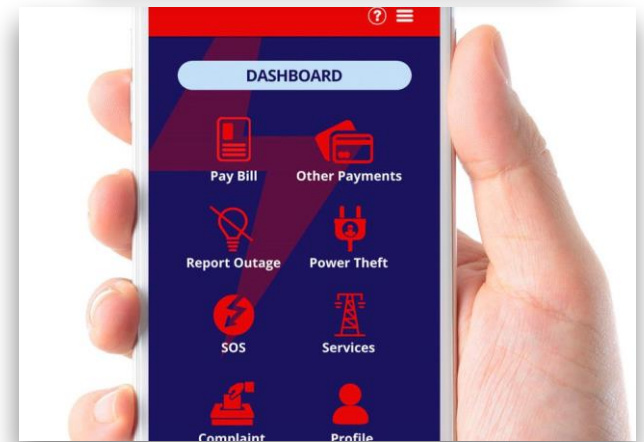

ELECTRICITY BILL/RECHARGE

We have successfully using this system for smart card recharge for electricity supply corporations of Bangladesh. Collection of payment along with secure writing on cards made this project a grand success

ACCOUNTS INTEGRATION

The system is cloud connected and integrated with the financial accounting package

ASSET TRACKING AND SERVICE APPLICATION

The department is purchasing huge Assets every day. The Assets have to be maintained properly and the usage must be done in a proper systematic manner. Unfortunately, due to lack of manpower and proper planning the Asset utilization is not up to the mark. Hence to manage Inventories in a proper systematic way an Asset monitoring and management system needs to be implemented.

ASSET REGISTER

The system will register, classify assets and keep provision for updating ownership for these items. QR code labels can be generated and used for quick identification of these assets.

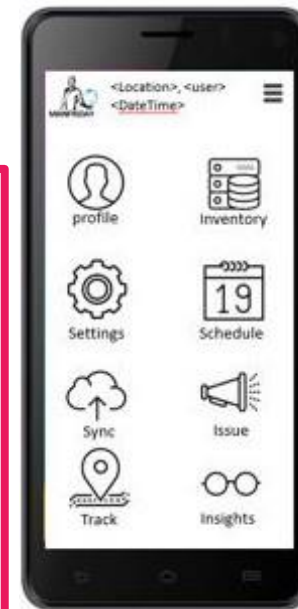

SERVICE CALLS

Custodian of each asset can generate service calls. The system has got provision to integrate service/maintenance module and monitor asset health.

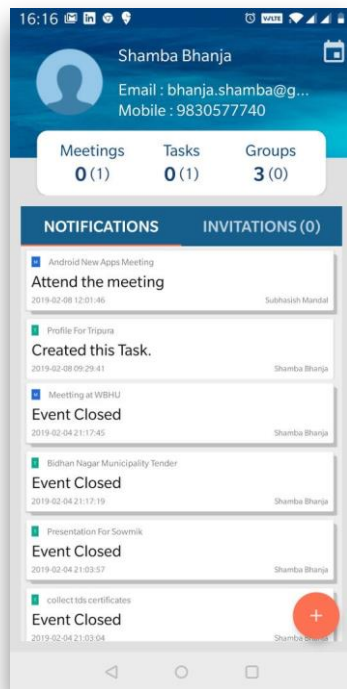

VENDOR MANAGEMENT

The system can manage and rate performance of their vendors. It can monitor and follow up each and every service calls generated from the system and monitor call open period and rate a vendor.

UTILITY MOBILE APPLICATIONS

We have a strong team of application developers and designers, we have already developed many utility apps for common citizen and employees of an organisation, any state government department may offer this kind of apps which can be a single point contacts for them and communications can be made faster.
