

Company Profile

Our Story

Arbree Limited was founded in 2016, and we have accomplished so much over the years. To create a world where we turn your tech concepts into reality. Our Founder Mahbubul Salehin was inspired to start this company to provide customer-centric and cost-effective IT solutions for start-up businesses.

It has swiftly built up a solid reputation as one of Dhaka's most innovative IT firm, steadily rising to the big leagues as we've even provided our services to semi-government entities. No matter what the size of your enterprise, if you need assistance, Arbree Solutions will find a way to help you.

Core Values

Our solutions are centered on two fundamental principles: cost-effectiveness and simplicity.

Area of Business Activity

We provide software development, web development, mobile application, cloud solutions and other services to aid you in streamlining the needs of organizations. As a package or as a single service, we cater to everyone.

We have numerous clients in each of our business activity areas therefore, we have provided 5 clients from each area to give you a brief idea of the scope of our services. To have an in-depth service portfolio please visit <https://arbreesolutions.com/portfolio.pdf>.

1. Software Development

Arbree Limited's software development involves designing a product or service by writing, creating, and testing the code which will ultimately be used to build. We have created several software for clients based on their product/service as we offer customizable solutions.

Client	Purpose
ENT Foundation & Hospital software	Manage the day-to-day hospital management operations.
Food Ordering System	Allows restaurant owners to setup their online restaurant.
Real Capita CRM	Online real estate management for bookings and investments.
Wealth Management	Enabling private bankers in the UK to generate investment proposals.
iPort	Internal requisition and approval process such as loans, leaves, budget approval, etc.

2. Mobile Application Development

Our solution involves the creation of installable software bundles, implementing backend services such as data access with an API and testing on target devices. The features and functionalities include encouraging seamless user-flow and taking feedback from the end-user.

Client	Purpose
Aamar Pharma	An on-demand medicine delivery service
DigiLite	Brand promoters use the app to collect data from end-user both in online and offline mode
Augilearn	A gaming app concept for children aged 4-7 years old.
Diabetes Monitoring & Management	An app that syncs with health devices on-the-go to present the patient and authorized personnel with live data.

EMAP - Maths Olympiad	a USA site used to enhance mathematical capabilities of children.
------------------------------	---

3. Web Development

We are a leading web application development company and have helped numerous startups and enterprises from diverse industry backgrounds. We pride on our domain expertise as we build highly scalable and secure, yet progressive web application. We also work closely with our clients to ensure they get the best solution possible to their problems.

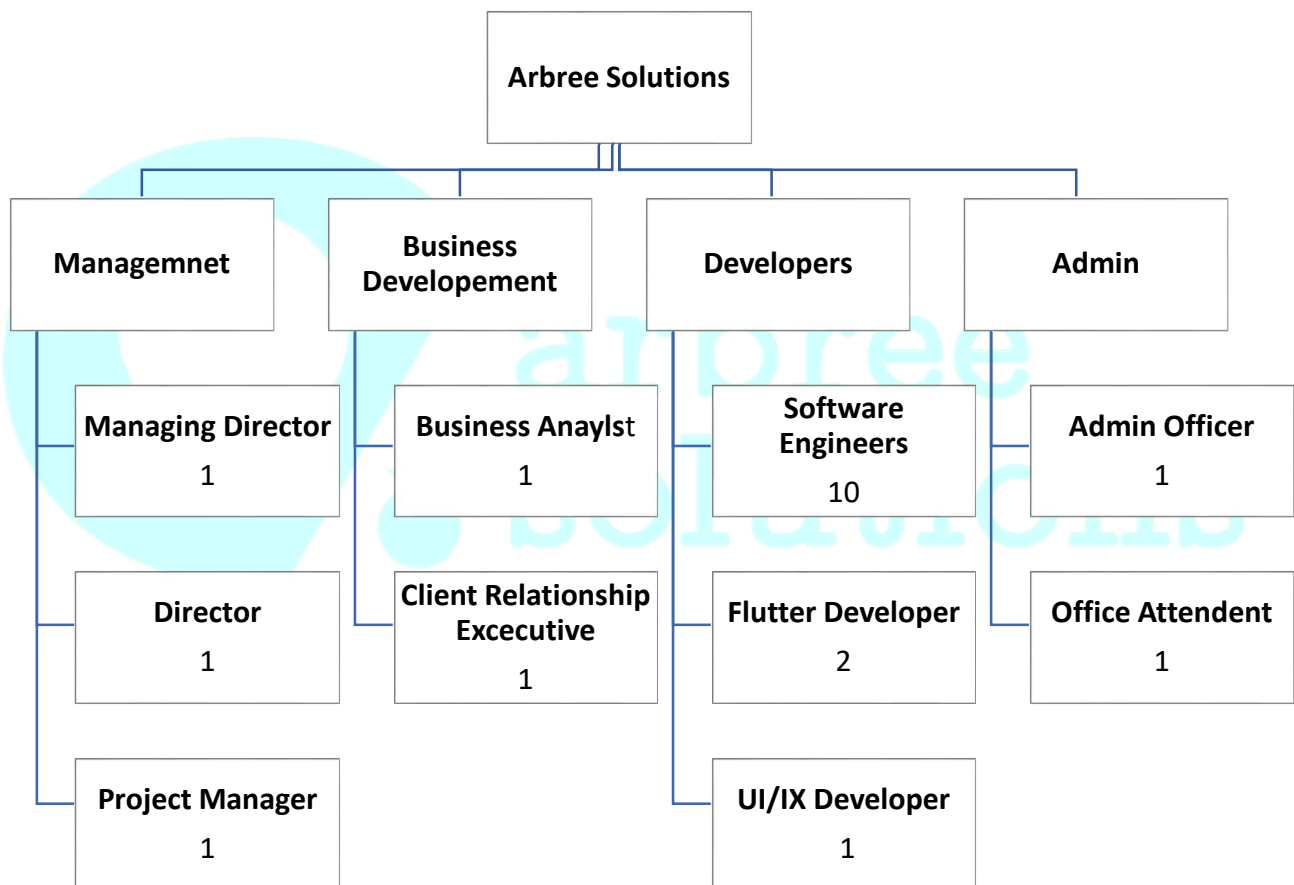

Client	Purpose
Aerolex	A leading UK travel agent that is expanding its operations in Bangladesh
Maplewood Immigration	a Canada-based immigration company website
Solargao Limited	An informative site to highlight products and services rendered by a renewable energy company
Hyper Finance	A UK based private equity fund and asset management website
Singapore's Window LTD	A site which keeps up-to-date on the latest construction technologies

Our Other Services

4. **Cloud Services:** We provide cloud consultation, migration, infrastructure, optimization and many more. Some of our cloud migration solutions include rehosting, revising, rebuilding, and replacing your data.
5. **DevOps Automation:** We take a program or its functionality, then turn it into an easily maintained codebase. We also emphasis on improving the quality of applications and services by minimizing defects and human error through automation testing.
6. **Software Prototyping:** We also engage in prototyping which helps us identify performance, usability and security problems and design solutions. This helps in reducing development time and receive user feedbacks.

7. **Quality Assurance:** We conduct QA personnel test as soon as the code is released, so that the application can be used by users and can be designed to meet their needs.
8. **Systems Integration:** We also provide systems integration where we bring all the system's components together. BPM, networking, and manual programming are just a few of the techniques we use to integrate these components.
