

Mission Statement

Deliver innovative, scalable, and practical solutions that increase productivity.

Company Overview

Our main goal is to develop innovative solutions that address real-world problems by understanding the unique needs of the markets we serve. We foster an environment of creativity with easy access to resources, ensuring an open environment to exchange ideas that powers the innovative solution/platforms that we develop.

Shonod applying state-of-the-art software practices has also positioned itself to provide complete IT/ITES solutions. Shonod has designed and engineered high quality and cost-effective applications for both private and public sector. Shonod has transformed the businesses for a number of local and international clients through the art of digitization.

Our Customers Mean the World

At Shonod, we strive to provide exactly what our customers are looking for. A huge part of our brainstorming process is looking at our client feedback to make sure you're well taken care of.

Areas of Expertise

Software

One of major focus areas for Shonod is software development service for medium to large enterprises as their IT outsourcing partner. These enterprises are mainly in education, Autism – health care, RMG.

We are personally committed to delivering the very best. Everything, from customer support to product design and development, is provided by our dedicated (and adorable) team.

Education

Education is vital and every individual has right to get proper education. We created the digitalstudyroom.com with the user's perspective in mind. We wanted to offer a platform that will provide Tutorials with ease explanation. We keep it simple, so users can focus on understanding the topic and visualize the topic with animation. Best of all - it's very less costly. You can get online, offline and start studying right away and with your own pace.
