

ABIR IT LTD.

Abir IT Ltd. Was founded in 2017, as a limited company which is operated under the supervision of the dynamic and visionary Mr. Naim Hossain. Initially, the business evolved around developing different modules that smoothens the day-to-day business operation of our clients. With course of time, the organization become more focused in developing intricate business solutions. In the journey of achieving this goal, Abir IT Ltd. started to broaden the horizon of their scope from developing different customized software to the development of a comprehensive ERP solutions. The current senior management is supervising this operation with superior expertise and dedication.

Considering the global need of the post pandemic situation, the visionary founder of Abir IT Ltd. has also decided to work as a Business Process Outsourcing (BPO) service provider. Abir LT Ltd. is also preparing to be involved in serving the local banking industry and in developing some Artificial Intelligence based solutions to tap in to other financial organizations. Thus, the organization hopes to play a vital role in creating job opportunity as well as meeting the global demand.

Since the inception of the business, Abir IT Ltd. has created not only customer loyalty but also a perfect blend of technical and managerial skills. As a result, it has developed confidence for exploring new areas in IT/ITES sector taking poised steps forward in the IT field.

Abir IT Ltd. today takes pleasure in representing itself as “The One- Stop contemporary IT Solution Provider” in various technology related sectors. Our company is specialized and focused in the particular segment of IT and ITES sector.
