OUR SERVICES

CLOUD COMPUTING

There is simply no arguing about the sheer power and necessity of the cloud these days. At Global Tech Information Systems, we offer several forward-looking cloud services meant to help you boost IT efficiency while reducing overhead.

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud platform, offering over 175 fully featured services from data centers globally. Millions of customers—including the fastest-growing startups, largest enterprises, and leading government agencies—are using AWS to lower costs, become more agile, and innovate faster.

The Azure cloud platform is more than 200 products and cloud services designed to help you bring new solutions to life—to solve today's challenges and create the future. Build, run, and manage applications across multiple clouds, on-premises, and at the edge, with the tools and frameworks of your choice.

Google Cloud

The Azure cloud platform is more than 200 products and cloud services designed to help you bring new solutions to life—to solve today's challenges and create the future. Build, run, and manage applications across multiple clouds, on-premises, and at the edge, with the tools and frameworks of your choice.

OUR SERVICES FACILITATE

Your business at any level you need

e-Commerce & Web

offers e-commerce and web services in custom-built solutions that helps customers to have their business to go global

Custom Application Development

managed to aggregate knowledge and experience and deliver all range of enterprise information systems

Cloud Services

offer network services, infrastructure, or business applications in the cloud with security that can be accessed using network connectivity

Big Data, Data Analytics & BI

accelerates time-to-big-data-insight by removing complexities that improved traditional BI analytics application

Storage & Backup

performs storage and backup service that increase the security, performance and availability of your data anytime anywhere

Internet of Things (IOT)

allows home and business users control the device/machines over the cloud
