ABOUT US

PRIMEX Infosys is a technology driven and customer focused company that provides UI/UX design, mobile app development, app and responsive website development to global customers across all industries. We never stop at improving our services including engineering techniques, management practices and developmental methods. Our app developers can offer you customized solutions to suit your needs. They are aware about the latest app versions and can ensure good performance of the apps. Our designers, too, are experts in creating themes and icons for smart phones and touch screen devices. Websites are designed in user-friendly manner making navigation simple and faster.

What We Do

Web & APP Development

With right strategies and technologies, our web & app (iOS & android) design and development team gives your business the required boost through visually appealing and interactive websites, which ensures greater conversion and genuine business leads.

SEO and SMM

With right strategies and technologies, our web & app (iOS & android) design and development team gives your business the required boost through visually appealing and interactive websites, which ensures greater conversion and genuine business leads.

Web Design

The most impressive website experiences are rooted in smart design, embody clear vision, and are backed by the right technology. Best-in-class digital projects require technology that perfectly supports the design. We rely on the right tools for the job, not a one-size-fits-all tech stack.

Graphic Design

The conversation with your audience goes beyond the digital space, and tactile communications certainly still have relevance. From brochures to billboards to boxes and everywhere in-between, we're well-versed in bringing your story to life no matter the medium.

Based on your requirement, you can choose from hourly, fully dedicated and partly dedicated engagement models and spend accordingly. Our developers use W3C standard of coding to create clean and beautiful websites which will increase its ranking on the search engine results page.

APP Development

Meady App. A all in one Medical assistance app. Design & Developed By Primex Infosys

Business Automation

Automation software is being used by businesses to reduce the costs associated with completing particular process. It is a way of reducing labour intensive activities. Manual triggers are being replaced by software which integrates disparate systems to enable an end to end business process. Costs are saved by the reduced need for people.

ERP & HRM

Access Control

We serve you from access control, CCTV IP cam, to all you need for your swift workflow.

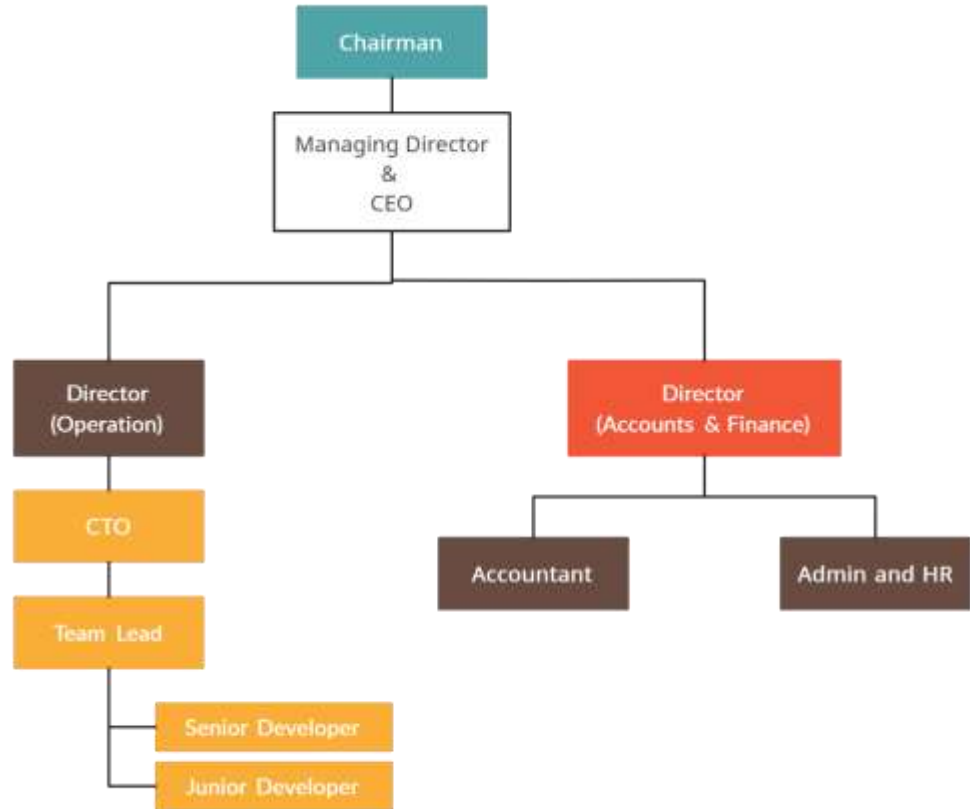

Event Management

With a team of young creative dynamic & dedicated professionals we have pushed all areas of event management to new frontiers, Whether it is artists management, product launch, exhibition, road show, fashion show, celebrity management as well as corporate indoor outdoor event. We are committed to deliver more than the client expectation.

Consultancy Service

Our consultancy service is based on what is better for your organization and how you should be utilizing your resources.
