OUR STORY

BANGLAMARK FinTech was founded by an entrepreneur Rob Steven. The existing payments technology consisted of a patchwork of systems built on outdated infrastructure. With the aim of helping businesses grow, the founders set out to build a platform capable of meeting the rapidly evolving needs of today's fast-growing global businesses.

We focused on building a modern infrastructure directly connected to card networks and local payment methods across the world, allowing for unified commerce and providing shopper data insights to merchants. The BM FinTech platform enables merchants to accept payments in a single system, enabling revenue growth online, on mobile devices and at the point of sale.

The technology is cloud based and custom made for any kind of merchant, so that they can accept secure mobile payments from any type of mobile phone. Our experience from being a pioneer in the M-commerce domain tells us that consumers like simple, functional and secure digital solutions. There are several upsides with mobile payments such as KYC, anti fraud and simple revenue assurance.

VALUES

- Customer Commitment
- Quality
- Integrity
- Teamwork
- Respect for people
- Good citizenship
- A will to win
- Personal Accountability

OUR SOLUTION

Fintech Ltd. has been the industry in cloud migration technology and services. Our cloud application migration software platform – and agile, innovative migration methodology – make moving to the cloud fast, painless, and affordable for enterprise organizations looking to accelerate cloud adoption.

Fintech Ltd. has experience of working with customers at all stages of their cloud journey to enable them to maximize business outcomes through cloud. We provide independent expertise as to how customers can gain the best value from cloud and software providers. We work with customers to identify business objectives and key performance indicators to ensure that these can be tracked in the cloud. This includes how to consider new services, how to forecast cloud usage and how to measure cloud consumption. As a partner for CS-cart, Flobil, Flocash Fintech Ltd. has access to the industry's premier cloud services & security gateway provider. We have executed successful migrations to private and public clouds.
